Ethics of Contemporary Art Theo Reeves-Everson, 2020-11-26 What happens when the shock of artistic transgression wears off when scandal dissipates when outrage becomes a tired routine In this original new book Theo Reeves Everson argues that transgressive art no longer succeeds on its own terms in societies where language prohibition and morality have become increasingly malleable This compels us to rethink the relationship between contemporary art and ethics and focus our attention on the potential of artworks to propose new values rather than simply challenge pre existing moral codes Assembling a novel theoretical framework from the writings of Félix Guattari Jacques Lacan and others *Ethics of Contemporary Art* narrates a journey away from transgression towards a new critical paradigm for the relationship between ethics and aesthetics that places questions of subjectivity centre stage Along the way artworks by Kader Attia Artur Zmijewski Dora Garcia and others serve as springboards launching discussions of the varied pathways along which a

renewed ethics of contemporary art might develop

Confessional Video Art and Subjectivity Jaye Early,2025-01-23 This is the first book of its kind to examine the development of the confessional subject in video art and demonstrate how it can provide a vital platform for navigating the politics of self subjectivity and resistance in society In doing so it reframes video art the most ubiquitous and yet most understudied art form of recent decades as an urgent socio political tool that is increasingly popular among contemporary artists as a means of exploring a broad range of social issues from politics and identity to the body and technologies of self representation Analysing a diverse selection of case studies from the 1960s up to the present day covering the work of Yoko Ono Gillian Wearing Ryan Trecartin Tracey Emin Anatasia Klose and Heath Franco among others the book brings together theory and practice to look afresh at contemporary video art through a Foucauldian lens It also brings the analysis of video art up to date by showing how social media and digital self representation has informed and further politicized time based art practices **Confessional Video Art and Subjectivity** shows how forms of confessional discourse not only play an important function in the construction of subjectivity but also open spaces for personal resistance and agency within contemporary video art As a result it offers researchers of contemporary art practice and media and cultural studies an updated framework through which to view this constantly evolving genre and a deeper understanding of wider contemporary video practices

The Great Parade Pierre Théberge,Galleries Nationales du Grand Palais (Parijs),National Gallery of Canada,2004-01-01 A beautiful book that showcases how circus figures and artifacts have been portrayed in art over the past two centuries The circus is a dazzling world filled with acrobats and harlequins tumblers and riders monsters and celestial creatures Now this engaging book sets that world in a new light examining how painters sculptors and photographers from the eighteenth century to the present have used the circus as a springboard for their imaginative expression and have envisioned the clown as a metaphor for the modern artist The book presents more than 175 works by such artists as Degas Toulouse Lautrec Rouault Picasso Chagall and L ger Some of these are masterful works shown for the first time these range from the 18 meter stage curtain Picasso designed in 1917 for Erik Satie s ballet *Parade* to more intimate works such as Nadar and Tournachon s photographs of Pierrot as played by celebrated mime Charles Debureau

Minor Photography Mieke Bleyen,2012 The first book to apply the concept of the minor to the theory of photography The notion of the minor developed by Gilles Deleuze and Félix Guattari in *Kafka Towards a minor literature* 1975 is introduced and connected applied here for the very first time to the field of photography theory Deleuze and Guattari defined minor literature in terms of deterritorialization politicization and collectivization By transferring the minor to the medium of photography this book enlarges the idea of the minor and opens it up to all kinds of mutations in the process The essays gathered in this book discuss the ways in which photography can make the dominant codes of representation stammer and how it can produce new effects and address people yet to come The authors consider the minor as a valuable tool to help

photography research move beyond or in between binary and hierarchized ways of thinking of high and low art for example or centre and periphery As such it aims to contribute to a rethinking of photography as multiplicity and variation

Consequently the term is connected with both marginal and canonical photographic practices covering photographers as different as Miroslav Tichy Paul McCarthy Tacita Dean Dan Graham and Paul Noug After developing a theory of the minor this book explores how the operations of the minor can be found in major art practices It closes by tackling the question of photography as variation in case studies of belated forms of surrealist photography This publication is GPRC labeled
