Riley (II.),Charles A. Riley,1995 A multidisciplinary look at the role of color in contemporary aesthetics Primitivism in Modern Art Robert Goldwater,1986 This now classic study maps the profound effect of primitive art on modern as well as the primitivizing strain in modern art itself Robert Goldwater describes how and why works by primitive artists attracted modern painters and sculptors and he delineates the differences between what is truly primitive or archaic and what intentionally embodies such elements His analysis distinguishes the romanticism of Gauguin an emotional primitivism exemplified by the Brücke and Blaue Reiter groups in Germany the intellectual primitivism of Picasso and Modigliani and a primitivism of the subconscious in Mir Klee and Dali Two of Goldwater s related essays Judgments of Primitive Art 1905 1965 and Art History and Anthropology have been added for this new paperback edition **Post-Impressionism** Nathalia Brodskaja,2023-12-28 Whilst Impressionism marked the first steps toward modern painting by revolutionising an artistic medium stifled by academic conventions Post Impressionism even more revolutionary completely liberated colour and opened it to new unknown horizons Anchored in his epoch relying on the new chromatic

studies of Michel Eugène Chevreul Georges Seurat transcribed the chemist's theory of colours into tiny points that created an entire image With his heavy strokes Van Gogh illustrated the midday sun whilst Cézanne renounced perspective Rich in its variety and in the singularity of its artists Post Impressionism was a passage taken by all the well known figures of 20th century painting it is here presented for the great pleasure of the reader by Nathalia Brodska a

Painting and Reality Etienne Gilson,2023-08-15 A classic study of the art of painting and its relationship to reality In this book tienne Gilson puts forward a bold interpretation of the kind of reality depicted in paintings and its relation to the natural order Drawing on insights from the writings of great painters from Leonardo Reynolds and Constable to Mondrian and Klee Gilson shows how painting is foreign to the order of language and knowledge Painting he argues seeks to add new beings to nature not to represent those that already exist For this reason we must distinguish it from another art that of picturing which seeks to produce images of actual or possible beings Though pictures play an important part in human life they do not belong in the art of painting Through this distinction Gilson sheds new light on the evolution of modern painting A magisterial work of scholarship by an acclaimed historian of philosophy Painting and Reality features paintings from both classical and modern schools and includes extended selections

from the writings of Reynolds Delacroix Gris Gill and Ozenfant *Nature's Experiments and the Search for Symbolist Form*
Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis douard Vuillard August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature s experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists solutions to the problem of symbolist form and provided a ready made methodology for fin de si cle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation automatism the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism *Nature s Experiments and the Search for Symbolist Form* demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism
