from premodern modern and contemporary Chinese studies as well as from critical geography art history and the environmental humanities Byrnes offers innovative readings of eighth century poetry paintings from the twelfth through twenty first centuries contemporary film nineteenth century British travelogues and Chinese and Western maps among other sources Fixing Landscape shows that premodern poetry and visual art have something urgent to tell us about a contemporary experiment in spatial production Poems and paintings may not build dams but Byrnes argues that the Three Gorges Dam would not exist as we know it without them *Forms of English History in Literature, Landscape, and Architecture* J.

Women, Modernity, and Landscape Architecture Sonja Dümpelmann, John Beardsley, 2015-02-11 Modernity was critically important to the formation and evolution of landscape architecture yet its histories in the discipline are still being written This book looks closely at the work and influences of some of the least studied figures of the era established and less well known female landscape architects who pursued modernist ideals in their designs The women discussed in this volume belong to the pioneering first two generations of professional landscape architects and were outstanding in the field They not only developed notable practices but some also became leaders in landscape architectural education as the first professors in the discipline or prolific lecturers and authors As early professionals who navigated the world of a male dominated intellectual and menial work force they were exponents of modernity In addition many personalities discussed in this volume were either figures of transition between tradition and modernism like Silvia Crowe Maria Teresa Parpagliolo or they fully embraced and furthered the modernist agenda like Rosa Kliass Cornelia Oberlander The chapters offer new perspectives and contribute to the development of a more balanced and integrated landscape architectural historiography of the twentieth century Contributions come from practitioners and academics who discuss women based in USA Canada Brazil New Zealand South Africa the former USSR Sweden Britain Germany Austria France and Italy Ideal reading for those studying landscape history women s studies and cultural geography Eating the Landscape Enrique Salmón, 2012-11-15 Eating is not only a political act it is also a cultural act that reaffirms one s identity and worldview Enrique Salmón writes in *Eating the Landscape* Traversing a range of cultures including the Tohono O odham of the Sonoran Desert and the Rar muri of the Sierra Tarahumara the book is an illuminating journey through the southwest United States and northern Mexico Salmón weaves his historical and cultural knowledge as a renowned indigenous ethnobotanist with stories American Indian farmers have shared with him to illustrate how traditional indigenous foodways from the cultivation of crops to the preparation of meals are rooted in a time honored understanding of environmental stewardship In this fascinating personal narrative Salmón focuses on an array of indigenous farmers who uphold traditional agricultural practices in the face of modern changes to food

systems such as extensive industrialization and the genetic modification of food crops. Despite the vast cultural and geographic diversity of the region he explores, Salm n reveals common themes: the importance of participation in a reciprocal relationship with the land; the connection between each group's cultural identity and their ecosystems; and the indispensable correlation of land consciousness and food consciousness. Salm n shows that these collective philosophies provide the foundation for indigenous resilience as the farmers contend with global climate change and other disruptions to long established foodways. This resilience, along with the rich stores of traditional ecological knowledge maintained by indigenous agriculturalists, Salm n explains, may be the key to sustaining food sources for humans in years to come. As many of us begin to question the origins and collateral costs of the food we consume, Salm n's call for a return to more traditional food practices in this wide ranging and insightful book is especially timely. *Eating the Landscape* is an essential resource for ethnobotanists, food sovereignty proponents, and advocates of the local food and slow food movements. *Unfolding the Biopolymer Landscape* Viness Pillay, Yahya E. Choonara, Pradeep Kumar, 2016-01-25. The need for the development of biomaterials as scaffold for tissue regeneration is driven by the increasing demands for materials that mimic functions of extracellular matrices of body tissues. *Unfolding the Biopolymer Landscape* provides a unique account of biopolymeric interventions inherent to biotechnological applications: soft tissue engineering, ophthalmic drug delivery, biotextiles, environmentally responsive systems, neurotherapeutics, and emulsions based formulations for food and pharmaceutical applications. Chapters in this volume also cover biomedical applications and implications of cationic polymers, collagen based substrates, multifunctional polymers, shape memory biopolymers, hybrid semisynthetic biomaterials, microbial exopolysaccharides, biomaterials mimicking the extracellular microenvironment, derivatized polysaccharides, and metallic biomaterials. Each chapter is distinctly written by experts in the respective fields, and emphasis is given on the mechanistic profile of the performance of biopolymers and biomedical applications. This book provides both basic and advanced biopolymer information for scientific experts and early career researchers in the field of drug delivery, tissue engineering, nanomedicine, food technology, peptide science, biomaterial design, and nutrition. This volume provides a unique account of biopolymeric interventions inherent to biotechnological applications: soft tissue engineering, ophthalmic drug delivery, biotextiles, environmentally responsive systems, neurotherapeutics, and emulsions based formulations for food and pharmaceutical applications. **Uncharted: The New Landscape of Tourism** Juan Elvira, David Goodman, 2022-02-25.
