Requirements as a Regulatory Barrier ,2007 Residential Care of Children Mark E. Courtney,Dorota Iwaniec,2009-03-25 For centuries societies have relied upon residential care settings to provide homes for children and for much of that period a debate has raged over whether such settings are appropriate places for children to be raised In recent years this debate has taken on an international dimension as human rights policies have called into question the legitimacy of residential care of children Unfortunately the ideological fervor that usually accompanies such discussions prevents a more nuanced understanding of the reasons that countries continue to make use of residential care Residential Care of Children Comparative Perspectives fills major gaps in knowledge about residential care and is intended to inform debates within and between nations about the appropriate use of such institutions Eleven country specific chapters written by child welfare experts from around the world provide an in depth understanding of the historical development of residential care the current state of affairs and predictions for the future Chapters describe how residential care is defined in each country how it has evolved over time factors that have contributed to the observed pattern of development of residential care and potential

concerns for the future An integrative chapter presents a critical cross national perspective identifying common themes and analyzing underlying factors Seeking to explain rather than cast judgment Residential Care of Children Comparative Perspectives will be fruitful reading for policymakers program administrators advocates practitioners and scholars interested in creating better services for vulnerable children and youth 108-2 Committee Print: Committee on Ways and Means, 2004 Green Book, Etc., March 2004, * United States. Congress. House. Committee on Ways and Means,2004 **Costs Associated with First-Time Homelessness for Families and Individuals** Brooke Spellman,2010-10 Examines costs associated with the use of homeless and mainstream service delivery systems by families and individuals experiencing homelessness for the first time in six study communities Assigning costs to public programs is a first step toward developing measures of the value of public interventions compared to the public costs incurred by ignoring or avoiding the problems those interventions are intended to address The study finds that the experience of homelessness is diverse and the associated costs vary tremendously depending on the pattern of homelessness and family or individual status It is not however a study of either cost effectiveness or quality of care but rather a calculation of costs associated with homelessness Illustrations
