Selecting Instructional Materials National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Developing the Capacity to Select Effective Instructional Materials, 1999-12-17 The National Science Education Standards set broad content goals for teaching grades K 12 For

science teaching programs to achieve these goals indeed for science teaching to be most effective teachers and students need textbooks lab kits videos and other materials that are clear accurate and help students achieve the goals set by the standards Selecting Instructional Materials provides a rigorously field tested procedure to help education decisionmakers evaluate and choose materials for the science classroom The recommended procedure is unique adaptable to local needs and realistic given the time and money limitations typical to school districts This volume includes a guide outlining the entire process for school district facilitators and provides review instruments for each step It critically reviews the current selection process for science teaching materials in the 20 states where the state board of education sets forth a recommended list and in the 30 states where materials are selected entirely by local decisionmakers Selecting Instructional Materials explores how purchasing decisions are influenced by parent attitudes political considerations and the marketing skills of those who produce and sell science teaching materials It will be indispensable to state and local education decisionmakers science program administrators and teachers and science education advocates

Resources in Education, 2001 **Middle School Science Education** Bernard J. Nebel, 2011 No one would dream of teaching math as a helter skelter of computational skills and concepts Yet this is what typically occurs in teaching science at the K 8 level Look for a difference in the Building Foundations of Scientific Understanding series Nebel constructs and organizes lessons so that scientific skills are developed and integrated in a systematic logical way while still allowing flexibility to accommodate the individuality of children Additionally Skills of inquiry and rational thought become habits of mind as each lesson draws students hands on to examine reflect question discuss test and reason their way toward rational conclusions Lessons become meaningful and retention is enhanced by constantly relating lessons to real world experience Standards are achieved not by teaching to the test but by being natural outcomes of integrated learning Math reading writing and other subjects are easily integrated Lists of additional readings are provided with each lesson Special training for teachers is not required Teachers will learn along with their students and be excellent role models in doing so Costs are kept minimal by utilizing commonly available items and materials Doing Good Science in Middle School, Expanded 2nd Edition Olaf Jorgenson, Rick Vanosdall, Vicki Massey, Jackie Cleveland, 2014-04-01 We are among those who have come to enjoy the blossoming intellects often comical behaviors and insatiable curiosity of middle schoolers and choose to work with them With more than 130 years of combined experience in the profession we've gathered a lot of ideas to share We know from our interactions with educators around the country that precious few quality resources exist to assist science teachers in the middle and this was a central impetus for updating Doing Good Science in Middle School From the preface This lively book contains the kind of guidance that could only come from veterans of the middle school science trenches The authors know you're crazy busy so they made the book easy to use whether you want to read it cover to cover or pick out sections to help you with lesson planning and classroom management They also know you face new challenges so they thoroughly revised this second edition to meet the needs of today's students

The book contains big picture concepts such as how to understand middle school learners and explore the nature of science with them a comprehensive overview of science and engineering practices STEM and inquiry based middle school science instruction aligned with A Framework for K 12 Science Education and the Next Generation Science Standards 10 new and updated teacher tested activities that integrate STEM with literacy skill building information on best instructional practices and professional development resources and connections to the Common Core State Standards in English language arts and mathematics If you re a new teacher you ll gain a solid foundation in how to teach science and engineering practices while better understanding your often enigmatic middle grade students If you re a veteran teacher you ll benefit from a fresh view of what your colleagues are doing in new times Either way Doing Good Science in Middle School is a rich opportunity to reaffirm that what you do is good science

Inquiry-Based Science Activities in Grades 6-12 Patrick Brown,James Concannon,2018-03-19 This new book shows middle and high school science teachers how to use evidence based inquiry to help students achieve deeper conceptual understanding Drawing on a wealth of research authors Pat Brown and Jim Concannon demonstrate how direct hands on experience in the science classroom can enable your students to become more self reliant learners They also provide a plethora of model lessons aligned with the Next Generation Science Standards NGSS and offer advice on how to create your own lesson plans and activities to satisfy the demands of your curriculum With the resources in this book you and your students will be able to ditch the textbook and embark upon an exciting and rewarding journey to scientific discovery
