Environment William W. Murdoch,1975 **Environment** William W. Murdoch,1971 Environment, Resources, Pollution Society William W. Murdoch,1971 **Resources in Education** ,1978-05 Sustainable Environmental Law Celia Campbell-Mohn,1993 The Changing Law of the Sea Ralph Zacklin,1974 **China's Sustainable Use of Natural Resources** China Development Research Foundation,2020-04-22 This book examines China's resource endowment and the country's current exploitation and use of resources and analyzes the main challenges and potential opportunities facing the country. It then discusses how to improve the efficiency with which resources are used by taking a full life cycle approach to resource use. After summing up the evolution of China's policies and systems relating to resources and the environment, this book goes on to study how China's participation in global resource allocation and global resource governance has progressed under its open economy situation as well as challenges facing that participation. Based on all these analyses, the report proposes two targets for managing the total quantities of two specific metrics. That is, it recommends aiming to reach peak consumption of resources and peak emission of pollutants by 2030. In addition, it makes a number of specific policy recommendations. The China Development Research Foundation (CDRF) is a public foundation initiated by the Development Research Center of the State Council (DRC). Its mission is to advance good governance and public policy to promote economic development and social progress. The Foundation has approached its mandate in a number of ways, including support for evidence-based policy research, leadership training, high-level forums and symposiums to promote economic cooperation and development, and the promotion of responsible public policy. As China continues to move steadily ahead with policy reforms and investments for more inclusive development, the demands for research, transparent and accountable processes, and citizenship engagement are expanding. The Foundation is striving to meet these challenges and to coordinate policy research work which supports the work of government, civil society, and enterprises in furthering equitable development in China.

Akwalefo Bernadette Djeudo,2013 In this book the reader is told that the unjust gap between the rich and the poor leading to social injustice in Cameroon and the world results from elite globalization and the reliance on the concept of sharing the National cake The idea of baking the cake collectively and sharing it in an equitable manner so that everyone has a fair share is not known by the political and administrative culture Consequently Cameroonians spend more time talking about their share of the national cake instead of how to make the cake The underlying principle of governance in Cameroon is best captured in the clause national cake Call it public resources Should the cake owned by everybody be baked or shared Many politicians and administrators get lost amidst the intricacies of power and the grandeur that comes with it and feel that the national cake is only to be shared They forget that they had made promises prior to their appointments and regard the civil service as an end rather than a means to an end Money to them is the defining value and the primary mediator of relationships among persons and institutions Ideals of equity are out the window and at the national and local levels governments and citizens alike have become economic beggars and a consumer nation has been created Beggars don t create jobs they take from those who have Nothing paralyzes a nation like citizens who lack a sense of mission for their country In my opinion Cameroonians should spend less time on politicking and more on constructive endeavors They should be challenged activated motivated and transformed into nation builders or bakers of the national cake that will be equitably shared They should be builders of a sustainable emerging and democratic Cameroon united in diversity An emerging and sustainable nation refers to a nation that is embarked on a holistic development that can continue indefinitely into the future by properly addressing human political social cultural economic ecological and spiritual dimensions of development This author envisions a better quality of life for all Cameroonians through the development of a just moral creative spiritual economically vibrant caring diverse yet cohesive society characterized by appropriate productivity participatory and democratic processes and living in harmony within the limits of the carrying capacity of nature and the integrity of creation In Part one of this book therefore this author describes the problems affecting the process of baking and sharing the national cake in Cameroon as reflected in neopatrimonialistic and clientelistic ties In Part two the author carries out an assessment of the material capital and human resources of the country including technical personnel and investigate the possibilities of augmenting these resources if found to be deficient in relation to the nation s requirements This part also indicate the factors which are tending to retard economic and sustainable development and determine the conditions which in view of the current social and political situation should be established for the successful

execution of President Biya's major ambitions and accomplishment programme. The discussion framework in this part follows the seven dimensions of development: spiritual, human, social, cultural, political, economic, and ecological. In Part three of the book, a complementary Plan to the Cameroon Vision 2035 that will lead to the most effective and balanced utilisation of the country's resources in making the national cake is formulated, and the nature of the machinery which will be necessary for securing the successful implementation and financing of the plan is determined.
