Stromquist, Karen Monkman, 2014-03-04 We offer in this book a collection of chapters that reflect a broad range of issues linking globalization to education in an accessible yet theoretically grounded and detailed form The authors analyze phenomena on the global plane in local spaces and in the connections between the global and the local New developments such as the growing impact of technology on education the emergence of new policy actors the growing expansion and segmentation of higher education the salience of human rights among others are emerging as powerful agendas shaping all levels of education In fundamental ways the forces of globalization challenge the previous approaches and theories of national development Recognizing the areas of convergence dissonance and conflict should help us grasp with greater clarity the implications of globalization for education and knowledge in the XXI century The contributors to this book include both well known scholars in the field of comparative education as well as young scholars The chapters present a balanced geographical coverage in terms of authors and the

countries regions examined The second edition has been thoroughly updated throughout and contains seven new chapters The expanding interest in the intersection of education and globalization has brought up several new topics including the salience of global education policies notably EFA the expansion and differentiation of higher education the emphasis on work related training the increasing role of non state actors such as the transnational corporations and greater attention to human rights Also in this new edition is a chapter on qualitative methodologies especially suitable to the understanding of the intersection of globalization and education

**Education, Equity and Transformation** Crain Soudien,Peter Kallaway,2012-12-06 The papers for this special issue were selected from a pool of nearly 700 presentations which were made at the 10th Congress of the World Council of Comparative Education Societies WCCES which was held in Cape Town South Africa from 12 to 17 July 1998 The congress was hosted by the Southern African Comparative and History of Education Society SACHES and held on the campuses of the University of the Western Cape and the University of Cape Town The papers were selected by the convenors of the conference s standing commissions which provided a significant focus for the conference proceedings These commissions were on the following themes Teachers and teacher education Curriculum Higher education Lifelong learning Language literacy and basic education Gender and education Policy Theory and theory shifts Basic education in Africa Peace and Justice Dependency European Education Policy Research in Africa Culture Indigenous Knowledge and Learning The papers presented as the discussion below makes clear ranged widely in subject matter and theoretical perspective and addressed issues of concern both to individual countries and to regions of the world While some of the papers use comparison as an approach it remains a matter of concern that the comparative perspective is so little in evidence It is hoped that the comparative research approach will be more in evidence in the future

**Community Engagement in Higher Education** W. James Jacob,Stewart E. Sutin,John C. Weidman,John L. Yeager,2015-06-17 There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local national and international levels But what is community engagement Even if this interest is genuine and widespread there are many different concepts of community service outreach and engagement The wide range of activity encompassed by community engagement suggests that a precise definition of the community mission is difficult and organizing and coordinating such activities is a complex task This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster it Contributors provide empirical research findings including several case study examples that respond to the following higher education community engagement issues What is the community and what does it need and expect from higher

education institutions Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities technical universities community colleges or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on educating internationally competent researchers and professionals How can a university be global and at the same time locally relevant Is it or should it be left to the institutions to determine the scope and mode of their community engagement or is a state mandate preferable and feasible If community engagement or community service are mandatory what are the consequences of not complying with the mandate How effective are policy mandates and university engagement for regional and local economic development What are the principal features and relationships of regionally engaged universities Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it or should it be made mandatory for both faculty and students How can community engagement be better integrated with the other two traditional missions of the university research and teaching
