## **Restoration And Rehabilitation Of The Desert Environment:**

Restoration and Rehabilitation of the Desert Environment N. Al-Awadhi, M.T. Balba, C. Kamizawa, 2012-12-02 These proceedings contain technical papers presented at the Kuwait Japan Symposium on Restoration and Rehabilitation of the Desert Environment which was held in Kuwait on 3-4 March 1996. Kuwait was selected as the site for this fourth symposium because of its enormous need for restoring and rehabilitating its desert environment and because of the progress which Kuwait and Japan have been making collectively in these efforts at both pilot and field scale levels. Kuwait's desert land has recently suffered from one of the worst man-made disasters of all time having been polluted with vast amounts of oil from the nearly 7000 oil wells that were destroyed during the Gulf War. The three themes for the symposium were remediation of the polluted soil, enhancement of the visual impact of greenery, and recycling of wastewater for rehabilitation purposes. The first theme was highlighted with presentations on the KISR PEC Oil Lake Beds Remediation Project. The second theme was launched with a broad-based discussion on new strategies and alternatives for greening the desert and a summary of the Kuwait National Greenery Plan which is now being prepared. The third theme featured presentations on water resource management in Japan and in KISR's Reverse Osmosis Project to make municipal wastewater recyclable for greenery use in densely populated areas. The closing session culminated in perspectives and recommendations from both Kuwait and Japan and with a historical summary of the long-standing Kuwait Japan Collaborative Program. **Proposed Northern & Eastern Mojave Desert Management Plan, Final Environmental Impact Statement, Vol. II, July 2002, (APPENDICES)**, 2002
