Restoring Demand In The World Economy Trade Finance And Technology:

Restoring Demand in the World Economy Joseph Halevi, Jean-Marc Fontaine, 1998 During the past two decades the macroeconomic policy debate has been dominated both in developed and developing countries by supply side considerations Distinguished contributors to this important new book conclusively argue that this has led towards depression at a world level and particularly in transitional and developing economies *Restoring Demand in the World Economy* examines the necessity to rehabilitate the role of effective demand in both the analysis of past economic events and in shaping current economic policy At the theoretical level the contributors argue conclusively that the level of effective demand and the aggregate distribution of income play a dominant role in the macroeconomic framework of all economic systems This economic theory is then applied to specific situations including austerity and monetary union in Europe the demand implosion in Eastern Europe and the former USSR the problem of financial fragility in developing countries the demand links between East Asia Japan and the United States inflation paranoia deflationary gaps and imbalances in the major industrial countries the failure of post war schemes for the stabilization of global demand This important contribution presents a strong case for rehabilitating the role of demand in economic policy and decision making This book will be of use to economic theorists policymakers and academics with an interest in international economics

Economic Dynamics in Transitional Economies Bruno Sergi, 2020-07-24 Learn more about the transitional economies of Central and Eastern Europe This book examines the economic dynamics of Central and Eastern European post Communist countries It illuminates the paths these countries are taking toward restructuring their markets increasing international trade and bettering their connections with the European Union and other countries Beginning with a comparative analysis of the three P governments Pigouvian Partizan and Paternalistic and continuing with a discussion of the interrelated political and economic difficulties of transition author Bruno Sergi proposes a surprising solution Inspired by the Bruxelles consensus he proposes that the European Commission should become a fourth P government replacing the role formerly played by the Washington consensus in the restructuring of post Communist economies *Economic Dynamics in Transitional Economies* also explores regional comparative macroeconomics the aftereffects of the Washington Consensus integration of Eastern and Western European economies interrelations between national and regional monetary activity political and economic policy reform involvement of European Union member countries We are living in historic times and *Economic Dynamics in Transitional Economies* will be a welcome guide to the rough roads ahead This thorough assessment of current political and economic realities will stimulate debate about new European paradigms the role of the European Union and the difficulties of post Communist transition These issues promise to be vital to the region's success in the new century

Marxist Perspectives on South Korea in the Global Economy Martin Hart-Landsberg, Seongjin Jeong, Westra Richard, 2017-03-02 This volume brings together work by international scholars to provide a unique analysis of the past present and possible future trajectory of

Korea's political economy from a distinctly Marxist perspective The volume differentiates the Marxian approach to the political economy of Korean development from the Keynesian social democratic approach that currently dominates the critical literature In doing so the volume provides a unique view of the development of the South Korean Economy

Post-Keynesian Essays from Down Under Volume II: Essays on Policy and Applied Economics G. Harcourt, Peter Kriesler, Joseph Halevi, John Nevile, 2017-03-21 Joseph Halevi G C Harcourt Peter Kriesler and J W Nevile bring together a collection of their most influential papers on post Keynesian thought Their work stresses the importance of the underlying institutional framework of the economy as a historical process and therefore of path determinacy In addition their essays suggest the ultimate goal of economics is as a tool to inform policy and make the world a better place with better being defined by an overriding concern with social justice Volume II assess application and policies *Knowledge as Value* Ian Morley, Mira Crouch, 2008 This book considers the place and value of knowledge in contemporary society Knowledge is not a self evident concept both its denotations and connotations are historically situated Since the Enlightenment knowledge has been a matter of discovery through effort and knowledge for its own sake a taken for granted ideal underwriting progressive education as a process which not only taught for and about something but also ennobled the soul While this ideal has not been explicitly rejected in recent decades there has been a tacit move away from a strong emphasis on its centrality even in Higher Education The authors address the values that inform knowledge production in its present forms and seek to identify social and cultural factors that support these values Against the background of increasingly restrictive conditions of academic work the first section of this volume offers incisive critiques of Higher Education with examples drawn from Australia and New Zealand The second group of chapters considers how academics have viewed and have tried to adapt to present circumstances The third section comprises papers that consider epistemological issues in the generation and promulgation of knowledge The chapters in this volume are indicative of the work that needs to be done so that we can come to comprehend and perhaps try and improve our relationship to learning and knowledge in the 21st Century This timely book will be of particular interest to workers in higher education it should also inform and challenge all those who have concerns for the future of the intellectual life of our civilization **Money, Macroeconomics and Keynes** Philip Arestis, Meghnad Desai, Sheila Dow, 2013-06-17 This volume along with its companion volume *Methodology Microeconomics and Keynes* is published in honour of Victoria Chick inspired by her own contributions to knowledge in all of these areas and their interconnections It represents both consolidation and the breaking of new ground in Keynesian monetary theory and macroeconomics by leading figures in these fields **Methodology, Microeconomics and Keynes** Philip Arestis, Meghnad Desai, Sheila C. Dow, 2002 This volume a companion to *Money Macroeconomics and Keynes* represents both consolidation and the breaking of new ground in Keynesian methodology and microeconomics by leading figures in these fields Essays in Honour of Victoria Chick: Methodology, microeconomics, and Keynes Victoria Chick, 2002 This volume a companion to

Money Macroeconomics and Keynes represents both consolidation and the breaking of new ground in Keynesian methodology and microeconomics by leading figures in these fields

Dynamic Capabilities Between Firm

Organisation and Local Systems of Production Riccardo Leoncini, Sandro Montresor, 2007-12-21 Changes in technology and demand require firms to learn how to continuously reshape unique and non imitable resources and competences A firm's capacity to achieve this is captured by the concept of dynamic capabilities This book offers an analysis of how firms manage to reconfigure their pool of idiosyncratic resources skills and competencies to

Trade Finance during the Great Trade

Collapse Jean-Pierre Chauffour, 2011-06-22 On September 15 2008 Lehman Brothers the fourth largest U S investment bank filed for bankruptcy Global credit markets tightened Spreads skyrocketed International trade plummeted by double digits Banks were reportedly unable to meet the demand from their customers to finance their international trade operations leaving a trade finance gap estimated at around US 25 billion Governments and international institutions felt compelled to intervene based on the information that some 80 90 percent of world trade relies on some form of trade finance As the recovery unfolds the time has come to provide policy makers and analysts with a comprehensive assessment of the role of trade finance in the 2008 09 great trade collapse and the subsequent role of governments and institutions to help restore trade finance markets After reviewing the underpinning of trade finance and interfirm trade credit Trade Finance during the Great Trade Collapse aims to answer the following questions Was the availability and cost of trade finance a major constraint on trade during the 2008 09 global economic crisis What are the underpinnings and limits of national and international public interventions in support of trade finance markets in times of crisis How effective were the public and private sector mechanisms put in place during the crisis to support trade and trade finance To what extent have the new banking regulations under Basel II and Basel III exacerbated the trade finance shortfall during the crisis and in the post crisis environment respectively Trade Finance during the Great Trade Collapse is the product of a fruitful collaboration during the crisis among the World Bank Group international financial partners private banks and academia Trade is the lifeblood of the world economy and the sharp collapse in trade volumes was one of the most dramatic consequences of the global financial crisis It was the moment the financial crisis hit the real economy and when parts of the world far from the epicenter of financial turbulence felt its full fury This book is extremely timely and full of critical insights into the role of trade finance and the potential damaging impact from the unintended consequences of regulatory changes Peter Sands CEO Standard Chartered Bank

Confronting Global Neoliberalism

Patrick Bond, Paul Clooney, 2011-02-28 With the world's attention fixed on the travails of leading global economies due to a still unfolding financial crisis of gigantic proportions there has been a studied silence on the fate of the third world as the malaise increasingly impacts it This silence is particularly disturbing because questions of potential pitfalls in the neoliberal policy package which the third world unlike Western Europe and Japan was largely forced to adopt were never countenanced as One third world state after another discovered that

international institutions were in effect hostile to their governments if they chose alternative developmental models or otherwise resisted the neoliberal triage of liberalization privatization and deregulation This collection is a tour de force effectively countering not only the neoliberal ideology of development as a whole but the marginalizing within today's mainstream crisis discourse of any discussion of the monstrous misallocation of global resources wrought by the so called Washington Consensus and the suffering and destruction it has wreaked on third world peoples and economies This edited volume is intended as both a textbook for introductory classes in global development or area studies and as a conduit for advanced students policymakers NGO activists and an educated readership to gain knowledge about the socio economic conditions existing across much of the world we live in and the policies that brought them about The specially commissioned and peer reviewed chapters are written by experts in the fields of economics politics sociology and international studies Chapter authors hail from around the world including Brazil Mexico Canada United States United Kingdom South Africa South Korea and Thailand The countries regions neoliberal experience and potential futures covered in this book are Brazil China Cuba Egypt Mexico Southeast Asia Indonesia Malaysia and Vietnam South Africa South Korea Syria Thailand and Venezuela

Global Money, Capital Restructuring, and the Changing Patterns of Labour Riccardo Bellofiore, 1999 Mostly economists mostly from Europe but also trainers labor analysts and others and contributors from most continents critically appraise an increasingly widespread interpretation of the place of labor in the global economy It holds that the globalism of capitalism is a qualitative and irreversible change that a new stage has been reached in the regulation of labor that increases both the creativity and the alienation of workers and that productivity is growing so much faster than production that wage labor may soon end

Polish Marxism after Luxemburg Jan Toporowski, 2022-12-09 In *Polish Marxism after Luxemburg* Jan Toporowski and leading experts offer a unique and insightful overview of Polish political economic ideas since the early 20th century building an introduction to some key themes and figurehead political economists

Export Credit Arrangements in Capital-Scarce Developing Countries Benedict Oramah, Richman Dzene, 2025-04-21 Since the emergence of Export Credit Agencies ECAs in and around the 1900s they have underpinned the trade industrial and economic expansion of many economies of the world These institutions were at the heart of the industrial revolutions of advanced economies of the early 1900s and the emergence of many Asian economies such as China and India In this book we

highlight the evolution of ECAs globally and in developing countries outlining the significant changes that have occurred and present case studies of selected ECAs to elicit differential experiences and lessons which will constitute the guiding principles for the revival or creation of ECAs in developing countries These principles are particularly imperative as governments in Africa and elsewhere have either most recently established or are contemplating the establishment of ECAs
