Restoring North America's Birds Lessons From Landscape Ecology:

Restoring North America's Birds Robert A. Askins, 2008-10-01
The decline of bird species in a wide range of North American habitats—forests, prairies, shrublands, mountain regions, marshes, and deserts—has inspired two decades of intense scientific study of bird ecology and conservation. But for professional scientists and amateur birders alike, interpreting the results of these diverse studies is often complex and bewildering. This accessible book pulls together recent research on bird species and habitats to show how basic ecological principles apply in seemingly different situations. Robert A. Askins provides an engaging introduction to bird ecology and concepts of landscape ecology, focusing on such intriguing species as Bachman's Warbler, Red Crossbill, Mountain Plover, and Marbled Murrelet. Understanding the ancient landscapes of North America and how humans have changed them, Askins says, is essential for devising plans to protect and restore bird populations. In addition to such obvious changes to the landscape as the clearing of forests and plowing of prairies, more subtle changes also dramatically affect birds. Species may disappear when we interrupt natural disturbances by suppressing wildfires or trapping out beaver, or when we disrupt habitat with roads and housing developments. Askins challenges some of the assumptions that underlie current conservation efforts and offers concrete recommendations based on sound ecological principles for protecting the rich natural diversity of North America's birds.

Saving Migrant Birds John Faaborg, 2014-02-19

Rigorous and well-defended, Faaborg makes many fresh and in some cases provocative points regarding management guidelines for migrant birds. Kenneth Able, Great Plains Research. In the 1980s, numerous scientific surveys documented both declining bird populations, especially among Neotropical songbirds that winter in the tropics, and the loss of tropical rain forest habitat. Drawing the seemingly obvious conclusion, scientists and environmental activists linked songbird declines to loss of tropical habitats and alerted the world to an impending ecological catastrophe. Their warnings led to the establishment of the Neotropical Migratory Bird Conservation Program, also known as Partners in Flight, the self-proclaimed largest conservation effort in history. Looking back over more than a decade of efforts to save migrant birds, John Faaborg offers the first serious evaluation of the state of songbird populations today, the effectiveness of conservation programs such as Partners in Flight, and the reliability and completeness of scientific research on migrant birds. Taking neither an alarmist nor a complacent approach, he shows that many factors besides habitat loss affect bird populations and that Neotropical migrants as a group are not declining dramatically, though some species adapt to habitat alteration more successfully than others. Faaborg's state-of-the-art survey thus clarifies the kinds of information we will need and the conservation efforts we should undertake to ensure the long-term survival of Neotropical migrant birds. Presents a carefully and closely reasoned argument about the magnitude of the conservation problems facing migrant birds, how we can reduce these problems, and how current conservation efforts have enormous value even if there is no immediate crisis. Scott K. Robinson, Professor and Head, Department of Animal Biology, University of Illinois.

Ecology of the Shortgrass Steppe W. K. Lauenroth, I. C.

Burke,2008-08-28 Ecology of the Shortgrass Steppe A Long Term Perspective summarizes and synthesizes more than sixty years of research that has been conducted throughout the shortgrass region in North America The shortgrass steppe was an important focus of the International Biological Program s Grassland Biome project which ran from the late 1960s until the mid 1970s The work conducted by the Grassland Biome project was preceded by almost forty years of research by U S Department of Agriculture researchers primarily from the Agricultural Research Service and was followed by the Shortgrass Steppe Long Term Ecological Research project This volume is an enormously rich source of data and insight into the structure and function of a semiarid grassland Birds of conservation concern, 2002 , *Technical Guide to Forest Wildlife Habitat Management in New England* Richard M. Paradise Found Steve Nicholls,2009-08-01 The first Europeans to set foot on North America stood in awe of the natural abundance before them The skies were filled with birds seas and rivers teemed with fish and the forests and grasslands were a hunter s dream with populations of game too abundant and diverse to even fathom It s no wonder these first settlers thought they had discovered a paradise of sorts Fortunately for us they left a legacy of copious records documenting what they saw and these observations make it possible to craft a far more detailed evocation of North America before its settlement than any other place on the planet Here Steve Nicholls brings this spectacular environment back to vivid life demonstrating with both historical narrative and scientific inquiry just what an amazing place North America was and how it looked when the explorers first found it The story of the continent s colonization forms a backdrop to its natural history which Nicholls explores in chapters on the North Atlantic the East Coast the Subtropical Caribbean the West Coast Baja California and the Great Plains Seamlessly blending firsthand accounts from centuries past with the findings of scientists today Nicholls also introduces us to a myriad cast of characters who have chronicled the changing landscape from pre Revolutionary era settlers to researchers whom he has met in the field A director and writer of Emmy Award winning wildlife documentaries for the Smithsonian Channel Animal Planet National Geographic and PBS Nicholls deploys a cinematic flair for capturing nature at its most mesmerizing throughout But Paradise Found is much more than a celebration of what once was it is also a reminder of how much we have lost along the way and an urgent call to action so future generations are more responsible stewards of the world around them The result is popular science of the highest order a book as remarkable as the landscape it recreates and as inspired as the men and women who discovered it Habitats and Ecological Communities of Indiana John O. Whitaker, Jr.,Charles J. Amlaner, Jr.,Marion T. Jackson,George R. Parker,Peter E. systems and describes the nature and impact of two man made habitats agricultural and developed lands The book considers extirpated and endangered species alongside invasives and exotics and evaluates floral and faunal distribution at century intervals to chart ecological change **Bilateral Ecopolitics** Philippe Le Prestre, Peter Stoett, 2017-05-15 The context in which environmental policy decision making occurs has changed resulting from widening environmental problems increased demands from groups and citizens continuing pressure on the continent's resources and normative shifts The complexity of current issues is related to an even broader contextual shift the globalization of environmental issues exacerbated by trade liberalization especially on a regional level and the potential contradictions between trade and the environmental international agenda that this implies This volume studies the new dimensions of resource conflict between Canada and the United States accounting for the emergence of new bilateral environmental issues and detailing how trade liberalization has fostered both disputes and policy convergence It also examines the recent shifts in America towards a unilateral foreign policy and how this affects active Canadian diplomacy Ideal as a resource tool for students and academics this book will be a key resource in the areas of global governance US Canadian foreign policy and environmental policy **Bird Conservation Implementation and Integration in the Americas** , 2005 Kootenai National Forest (N.F.), Sparring Bulls , 2010

Bird Tracks & Sign Mark Elbroch, Eleanor Marks, 2001-11-01 Songbirds waterfowl owls shorebirds warblers woodpeckers nightjars birds of prey Dozens of feather groups photographed in color *The American Bird Conservancy Guide to Bird Conservation* Daniel J. Lebbin, Michael J. Parr, George H. Fenwick, 2010-10-15 Whether we live in cities in the suburbs or in the country birds are ubiquitous features of daily life so much so that we often take them for granted But even the casual observer is aware that birds don't fill our skies in the number they once did That awareness has spawned conservation action that has led to notable successes including the recovery of some of the nation's most emblematic species such as the Bald Eagle Brown Pelican Whooping Crane and Peregrine Falcon Despite this a third of all American bird species are in trouble in many cases they're in imminent danger of extinction The most authoritative account ever published of the threats these species face The American Bird Conservancy Guide to Bird Conservation will be the definitive book on the subject The Guide presents for the first time anywhere a classification system and threat analysis for bird habitats in the United States the most thorough and scientifically credible assessment of threats to birds published to date as well as a new list of birds of conservation concern Filled with beautiful color illustrations and original range maps the Guide is a timely important and inspiring reference for birders and anyone else interested in conserving North America's avian fauna But this book is far more than another shout of crisis The Guide also lays out a concrete and achievable plan of long term action to safeguard our country's rich bird life Ultimately it is an argument for hope Whether you spend your early weekend mornings crouched in silence with binoculars in hand hoping to check another species off your list or you've never given much thought to bird conservation you'll appreciate the visual power and intellectual scope of these pages *Revised Land and Resource*
