Retailing, Principles & Practices Dale M. Lewison, M. Wayne DeLozier, 1982
Retailing in the 21st Century Manfred Krafft, Murali K. Mantrala, 2009-12-17
Retailing in the new millennium stands as an exciting, complex, and critical sector of business in most developed as well as emerging economies. Today, the retailing industry is being buffeted by a number of forces simultaneously: e.g., increasing competition within and across retailing formats, the growth of online retailing, the advent of radio frequency identification (RFID) technology, the explosion in customer-level data availability, the global expansion of major retail chains like Wal-Mart and METRO Group, and so on. Making sense of it all is not easy but of vital importance to retailing practitioners, analysts, and policymakers. With crisp and insightful contributions from some of the world's leading experts, *Retailing in the 21st Century* is a compendium of state-of-the-art, cutting-edge knowledge for successful retailing today.

Retailing in Emerging Markets Malobi Mukherjee, Richard Cuthbertson, Elizabeth Howard, 2014-09-25
Retailing is changing extremely rapidly in the emerging economies, both as a driver of social and economic change and a consequence of economic development and the rise of consumer societies. Changes that took many decades in Europe or North America are happening at a much greater speed in emerging markets, while regulations continue to be hotly contested in these markets, raising questions about appropriate business strategies for both globalising firms and local contenders. While much has been written about retail in emerging markets, the focus has been primarily on the nature of entry strategies for Western retail companies. This book seeks to capture the impact of both internal and external regulations on retail development and strategy in emerging markets. It provides a comprehensive and up-to-date assessment of the development of retailing in a wide range of emerging economies and seeks to capture the interplay between both retail policy and retail strategy and the theoretical implications of this on retail development as a whole. This book will be of interest to academics, researchers, and advanced students with an interest in retail development in emerging markets, international business strategy, and international marketing.
