**Leisure and Liberty in North America** Pierre Lagayette, 2008 Depuis Aristote le loisir est un temps libre c'est dire propice la r flexion ou la m ditation ce que les Grecs consid raient comme le bien supr me de notre existence Le loisir pour des hommes libres c'est l occasion de penser leur libert de choisir la mani re dont il vont assurer le progr s de leur connaissances y compris la connaissance de soi alors m me qu ils sont d barrass s des contraintes de la n cessit le travail et la r ussite sociale Au fil du temps se sont greff es celle de loisir les notions de jeu d amusement ou de r cr ation La libert devient ludique dans ce contexte et l amusement l expression d une libre pratique de la vie en soci t Activit autrefois r serv e une lite

le loisir a fini par s'insinuer dans l'ordre social particulièrement en Amérique du Nord où il voulait être plus galitaire et au cours des siècles il s'est imposé comme l'un des pivots principaux de l'American Way of Life. Mais aux idées originelles est venue subrepticement se substituer la logique du gain et de la réussite individuelle. À ceux qui penseraient encore le loisir comme un moyen de libération culturelle, l'instrumentalisation des loisirs dans une économie dominée par le profit dément cette idée. Qu'il s'agisse de tourisme, de voyages, de parcs d'attraction ou plus simplement de cinéma ou de gastronomie, tout est prêt à exalter la valeur financière du loisir par-delà ses valeurs esthétiques ou morales. Transformé en simple bien de consommation, le loisir ne cesse d'interroger les questions d'environnement, d'identité ethnique ou de genre. À cet égard, peut-on encore le considérer comme un facteur de libération sociale ou culturelle ? Crée-t-il les conditions favorables à la mise en œuvre d'un niveau de liberté individuelle ou collective plus élevé ? Il reste que le loisir, malgré ses dérives consuméristes, n'en tient pas moins une place grandissante dans l'identité des peuples et dans le flux planétaire des cultures. À ce titre, il nous est aussi vital que le travail dont il est l'indivisible complément.

A Cultural History of Objects in Antiquity Robin Osborne, 2022-08-31. A Cultural History of Objects in Antiquity covers the period 500 BCE to 500 CE examining ancient objects from machines and buildings to furniture and fashion. Many of our current attitudes to the world of things are shaped by ideas forged in classical antiquity. We now understand that we do not merely do things to objects; they do things to us. Reinterpreting objects in Greece and Rome casts new light on our understanding of ourselves and turns the ancient world upside down. The 6 volume set of the Cultural History of Objects examines how objects have been created, used, interpreted and set loose in the world over the last 2500 years. Over this time the West has developed particular attitudes to the material world at the centre of which is the idea of the object. The themes covered in each volume are objecthood, technology, economic objects, everyday objects, art, architecture, bodily objects, object worlds. Robin Osborne is Professor of Ancient History at the University of Cambridge, UK. Volume 1 in the Cultural History of Objects set. General Editors: Dan Hicks and William Whyte.

Digital Cities Neil Leach, 2009-08-31. Guest edited by Neil Leach. What is the impact of digital technologies on the design and analysis of cities? For the last 15 years the profound impact of computer-aided techniques on architecture has been well charted. From the use of standard drafting packages to the more experimental use of generative design tools and parametric modelling, digital technologies have come to play a major role in architectural production. But how are they helping architects and designers to operate at the urban scale? And how might they be changing the way in which we perceive and understand our cities? Features some of the world's leading experimental practices such as Zaha Hadid Architects, R Sie n Biothing and Xefirotarch. Takes in exciting emerging practices such as moh architects, kokkugia and THEVERYMANY and work by students at some of the most progressive schools such as the AA, Dessau Institute of Architecture and RMIT. Contributors include Michael Batty, Benjamin Bratton, Alain Chiaradia, Manuel DeLanda, Vicente Guallart and Peter Trummer.

Music, Art and Diplomacy: East-West Cultural Interactions and the Cold War Simo Mikkonen, Pekka Suutari, 2017-05-15. Music, Art and Diplomacy shows how a

vibrant field of cultural exchange between East and West was taking place during the Cold War which contrasts with the orthodox understanding of two divided and antithetical blocs The series of case studies on cultural exchanges focusing on the decades following the Second World War cover episodes involving art classical music theatre dance and film Despite the fluctuating fortunes of diplomatic relations between East and West there was a continuous circulation of cultural producers and products Contributors explore the interaction of arts and politics the role of the arts in diplomacy and the part the arts played in the development of the Cold War Art has always shunned political borders wavering between the guidance of individual and governmental patrons and borderless expression While this volume provides insight into how political players tried to harness the arts to serve their own political purposes at the same time it is clear that the arts and artists exploited the Cold War framework to reach their own individual and professional objectives Utilizing archives available only since the collapse of the Soviet Union the volume provides a valuable socio cultural approach to understanding the Cold War and cultural diplomacy

Collision David Cecchetto, Nancy Cuthbert, Julie Lassonde, 2008-12-18 With very few exceptions interdisciplinary art and interarts practices examined as such including the perspective of artist researchers and not subsumed under a singular category of performance or visual art have until now been largely ignored While it would be simplistic to think that this collection somehow rectifies the piecemeal status of this discourse our wager is that this collection works towards presenting an understanding of this status as in a certain sense constitutive of the field Beginning with an introduction to the very multiplicities that compose and complicate interdisciplinary practices then moving into questions of body technology location movement space practice performativity aesthetics this collection covers an enormous amount while still retaining an overarching sense of unity in the context of the subject as a whole Each of these sections negotiates a series of interrelated collisions in order to address a range of theoretical positions as well as a variety of international and cultural perspectives In addition to addressing the notion of interdisciplinarity and the challenges of specific interarts practices this publication seeks to question how we might understand interarts practice in a way that does not exclude perspectives such as spirituality law political activism and community development to name only a few The inclusion of these disparate practices within this

publication itself a site of collision of the poetic the conversational and the theoretical is thus not presented as an attempt to unify or normalize them but rather as a productive charting of their radical explosion a collision that is always a colliding
