Rethinking Development In East Asia From Illusory Miracle To Economic Crisis:

Rethinking Development in East Asia Pietro Masina,2001-12-14 Focuses on three interrelated aspects the impact of evolving international and regional dynamics on national development strategies the rethinking of national and regional development models after the crisis and the analysis of the socio economic transformations produced in East Asian countries during the period of accelerated economic growth an **Rethinking Development in East Asia** Pietro P. Masina,2002

Rethinking Development in East Asia Pietro P. Masina,2002 Masina reassesses the last thirty years of economic development in East Asia in light of recent dramatic events challenging scholars and policy makers to critically review development strategies **Rethinking Development Geographies** Marcus Power,2004-08-02 Development as a concept is notoriously imprecise vague and presumptuous Struggles over the meaning of this fiercely contested term have had profound implications on the destinies of people and places across the globe Rethinking Development Geographies offers a stimulating and critical introduction to the study of geography and development In doing so it sets out to explore the spatiality of development thinking and practices The book highlights the geopolitical nature of development and its origins in Empire and the Cold War It also reflects critically on the historical engagement of geographers with the Tropics the Third World and the South The dominant economic and political philosophies that shape the policies and perspectives of major institutions are discussed The interconnections between globalization and development are highlighted through an examination of local national and transnational resistance to various forms of development The text provides an accessible introduction to the complex and confusing world of contemporary global development Informative diagrams cartoons and case studies are used throughout While exploring global geographies of economic and political change Rethinking Development Geographies is also grounded in a concern with people and places the view from below the views of women and the view from the South

China and East Asia's Post-Crises Community Wei Liang,Faizullah Khilji,2012-10-04 China and East Asia s Post Crises Community A Region in Flux by Wei Liang and Faizullah Khilji explores how an East Asian community is taking shape as a result of China s emergence as a global economic power and the shocks of the financial crises emanating from the globalized financial system Today s East Asia shows a sharp break from the East Asia of the Cold War era in both basis and orientation Important elements in this shift include the regional economic integration propelled by China s emergence as a processed manufacturing center in the world economy the common problems posed by the working of the dollar based international financial system and the desire to develop institutions that help to formalize the economic integration and financial cooperation that is taking place and may thus help protect and safeguard economic prosperity in the region Liang and Khilji show how the approach to regional economic cooperation and developing institutions comes from the bottom up lacking any leader nation grand vision or ideology The manner in which the region comes to work together also has implications for the governance of the world economy in particular the economic model that underlies policy formulation the working of the

international financial system and the approach to the multilateral trading system From a security oriented US centric regional structure characterized as the hub and spokes system set up after the Second World War this region is now more nearly an informal economic community which increasingly appears to be China centric China and East Asia's Post Crises Community presents one of the first attempts to weave together different strands of the current discussion to develop a framework for understanding a rapidly evolving East Asia region *Southeast Asia* Jonathan Rigg, 2004-08-02 The growth economies of Southeast Asia are presented by the World Bank and others as exemplars of development miracle economies to be emulated How did the region attain such status Are the other countries of Southeast Asia able to achieve such a rapid growth This book charts the development of Southeast Asia examining the economies of Vietnam Laos Cambodia and Burma alongside the established Asian market economies Drawing on case studies from across the region the author assesses poverty and ways in which the poor are identified and viewed Process and change in the rural and urban worlds are examined in detail focusing on the strengthening rural urban interaction as farmers make a living in the urban industrial sector and factories relocate into agricultural areas Giving prominence to indigenous notions of development based on Buddhism Islam and the so called Asian Way the author critically assesses the conceptual foundations of development ideas of post developmentalism and the miracle thesis In the light of the experience of one of the most vibrant regions in the world the book places emphasis on the process of modernization within wider debates of development and challenges the notion that development has been a mirage for many and a tragedy for some *Vietnam's Development Strategies* Pietro Masina, 2006-09-27 This book presents a critical review of the Vietnamese reform process and analyses the most crucial issues in the post Asian crisis debate arguing that a wider debate is needed in order for national policy makers to make well informed decisions *The New Political Economy of Southeast Asia* Rajah Rasiah, Johannes Dragsbaek Schmidt, 2010-01-01 This well researched book examines the dramatic transformation of Southeast Asian countries from agricultural and mining economies to industrial nations In doing so it explores the effects of development policy on a number of interdisciplinary issues and the emergence of new social and political pressures created by industrialization These include their heightened vulnerability to complex economic crises their use of sophisticated instruments in the labour process and increased awareness of environmental issues The distinguished authors present a regional and cross border focus on transnational actors and institutions and the policy issues and problems which have a wider impact on spatial configurations in the region This insightful study will appeal to researchers academics and policymakers working on the economics and development of Southeast Asia **Contested Citizenship in East Asia** Kyung-Sup Chang, Bryan S. Turner, 2012-03-22 Theories of citizenship from the West pre eminently those by T H Marshall provide only a limited insight into East Asian political history The Marshallian trajectory juridical political and social rights was not repeated in Asia and the late nineteenth century debate about liberalism and citizenship among intellectuals in Japan and China was eventually stifled by war colonialism and

authoritarian governments both nationalist and communist Subsequent attempts to import western style democratic values and citizenship were to a large extent failures Social rights have rarely been systematically incorporated into the political ideology and administrative framework of ruling governments In reality the predominant concern of both the state elite and the ordinary citizens was economic development and a modicum of material well being rather than civil liberties The developmental state and its politics take precedence in the everyday political process of most East Asian societies These essays provide a systematic and comparative account of the tensions between rapid economic growth and citizenship and the ways in which those tensions are played out in civil society

Developmental Politics in Transition C. Kyung-Sup, B. Fine, L. Weiss, 2012-08-31 Blending theory and case studies this volume explores a vitally important and topical aspect of developmentalism which remains a focal point for scholarly and policy debates around democracy and social development in the global political economy Includes case studies from China Vietnam India Brazil Uganda South Korea Ireland Australia

Understanding FDI-Assisted Economic Development Sanjaya Lall, Rajneesh Narula, 2013-09-13 It is nowadays well accepted that both economic growth and development are highly dependent on improving not just the availability of capital but also access to technological capabilities infrastructure and resources This has gone hand in hand with an increasing economic liberalization of most developing countries The role of the MNE as a viable source of both capital and technology is one of the key features of this new openness In the process of embracing FDI as a solution to the myriad of economic ills something even the World Bank has begun to do little attempt is made to understand the rationale and the costs associated with this policy stance Simply put FDI is not a condition sine qua non for development Too much emphasis has been placed on attracting FDI and not on understanding how to optimise the benefits for the host economy This volume aims to encourage and promote research related to these issues This volume was previously published as a special issue of the European Journal of Development Research

Kinship and Food in South East Asia Monica Janowski, Fiona Kerlogue, 2007 There has been a growing acceptance that food has an important role in establishing and structuring social and kin relations in South East Asian societies This study looks at a wide variety of groups in the region and demonstrates that within all of them the feeding relationship is fundamental to the establishment and the nature of relations within generations and between generations Presenting material from ten societies in the region the papers included in this volume argue that the feeding of foods drink and meals based on the focal starch crop grown by these agricultural groups rice in eight of the groups covered here sago in one and cassava in one is used to manipulate biological kinship and to construct a kinship particular to humans which is nevertheless founded in a natural process the flow of life blessings and potency between generations

Limits to Regional Integration Professor Søren Døsenrode, 2015-03-28 This comprehensive volume written by high profiled academics covers themes within regional integration by examining eleven cases ranging from the lack of integration in the Arctic and the Middle East to ongoing or progressing integration in Europe in an effort to uncover what blocks

regional integration The results of this discussion are used for developing new theoretical insights **Limits to Regional Integration** Søren Dosenrode, 2016-03-09 Regionalization in general and regional integration in particular have taken place at a growing pace since the end of the Cold War when states were set free from various security overlays Regional integration is logical as it is supposed to advance wealth and peace Still the picture is far from clear and the process of regional integration is not automatic disintegration takes place as we saw in the cases of the Soviet Union Yugoslavia and Czechoslovakia to mention a few This is the case not only in states recently brought together but also in traditional states like Britain The Netherlands and Spain where strong groups strive for independence In some places regionalization is flourishing but regional integration is not Some regional integration projects like the North American Free Trade Agreement and Mercosur seem to stagnate Certainly there are limits to regional integration This comprehensive volume written by high profiled academics covers these themes by examining eleven cases ranging from the lack of integration in the Arctic and the Middle East to ongoing or progressing integration in Europe to uncover what blocks regional integration the results of which are used for developing new theoretical insights Understanding Development Paul Hopper, 2018-03-02 Understanding Development offers a comprehensive introduction to the multidimensional and evolving nature of international development in the contemporary world This new edition has been fully revised and expanded to incorporate the key events trends and debates that are shaping development today such as humanitarianism and the global refugee crisis the growing number of fragile states and the contested nature of trade and trade deals Building on the book's original framework the second edition also includes three new chapters which explore development in relation to global policy formation focusing on the end of the UN Millennium Development Goals in 2015 and the start of the UN Sustainable Development Goals which will run until 2030 Designed to offer something different to the standard introductions to the topic this issues driven text examines the debates that have generated the most interest and passion among practitioners and non practitioners alike Always attentive to the contested and plural nature of the field it makes the case for a genuinely interdisciplinary approach which takes full account of the impact of globalization Both wide ranging and critical Understanding Development is the essential student guide to one of the most challenging subjects of our age *Contemporary China* Jürgen Haacke, Peter Preston, 2013-12-19 With a large and growing economy and a leadership dedicated both to domestic reform and the further integration into international society and the world economy China is facing and posing important challenges at the local national regional and wider international level This book analyses the developmental trajectories of China up to and into the new millennium Focusing on the substance and underlying forces of change it considers issues and developments in monetary policy foreign exchange policy the trade regime state owned enterprise reform regional economic development as well as social changes particularly those related to social welfare reform and the Internet The book also covers economic and political developments in Greater China particularly the prospects of reunification after Taiwan's presidential elections and analyses the core issues and

challenges in China's contemporary relations with the USA Japan South East Asia and Europe **South Korea in Transition** Kyung-Sup Chang, 2017-07-05 South Korea has continued to impress the world in the way it has harnessed social modernization economic development political democratization and most recently multi faceted globalization Relying on both established and inventive citizenship perspectives the authors in this volume collectively show that all these diverse societal transformations and achievements can be concretely and systematically comprehended in conjunction with citizens reshaping identities rights and duties in civil society and national polity South Koreans eye catching traits and trends of educational zeal economic development civil activism nationalism and neoliberal globalization are analyzed here as diverse yet often interconnected manifestations of citizenship politics As shown comprehensively in this volume the necessity of such citizenship focused analyses is particularly evident in recent years as South Korea has been undergoing a condensed transition from class politics to citizenship politics This book is a highly inclusive yet incisive account of modern and late modern Korea utilizing citizenship as a powerful theoretical and analytical tool Such judicious theoretical and analytical use of citizenship in respect to modern Korean history and society will in turn enable a meaningful expansion of theoretical and methodological utility of citizenship in contemporary global social sciences This book was based on a special issue of *Citizenship Studies* *Routledge Handbook of Southeast Asian Development* Andrew McGregor, Lisa Law, Fiona Miller, 2017-11-06 Southeast Asia is one of the most diverse regions in the world hosting a wide range of languages ethnicities religions economies ecosystems and political systems Amidst this diversity however has been a common desire to develop This provides a uniting theme across landscapes of difference This Handbook traces the uneven experiences that have accompanied development in Southeast Asia The region is often considered to be a development success story however it is increasingly recognized that growth underpinning this development has been accompanied by patterns of inequality violence environmental degradation and cultural loss In 30 chapters written by established and emerging experts of the region the Handbook examines development encounters through four thematic sections Approaching Southeast Asian development Institutions and economies of development People and development and Environment and development The authors draw from national or sub national case studies to consider regional scale processes of development tracing the uneven distribution of costs risks and benefits Core themes include the ongoing neoliberalization of development issues of social and environmental justice and questions of agency and empowerment This important reference work provides rich insights into the diverse impacts of current patterns of development and in doing so raises questions and challenges for realizing more equitable alternatives It will be of value to students and scholars of Asian Studies Development Studies Human Geography Political Ecology and Asian Politics *More than the Soil* Jonathan Rigg, 2014-09-25 *More than the Soil* focuses on the social cultural economic and technological processes that have transformed rural areas of Southeast Asia The underlying premise is that rural lives and livelihoods in this region have undergone fundamental change No longer can we

assume that rural livelihoods are founded on agriculture nor can we assume that people envisage their futures in terms of farming. The inter penetration of the rural and urban and the degree to which rural people migrate between rural and urban areas and shift from agriculture to non agriculture raises fundamental questions about how we conceptualise the rural Southeast Asia and the households to be found there. *Developmental States* Linda Low, 2004. As the Asian crisis triggered or precipitated the meltdown a second objective is to explore the reasons and factors for the breakdown or redundancy of developmental states distinguishing between domestic transformative capacity and external global factors as identified. A third objective is to cull experiences and lessons beyond East Asia. With many transition economies in Central and Eastern Europe beside China and Indochinese states the theory and practice of developmental states may be a useful bridge. These are by no means exhaustive and comprehensive aims, questions and issues. For individual developmental states covered in this volume country specific lessons may also be drawn for them to be reconfigured to stay relevant. The most important consideration for this volume is to value add to the literature both the theory and principles of the Asian developmental state as well as empirical observations observed elsewhere. This volume comprises 13 chapters in two parts.
