Rethinking Resource Management Justice Sustainability And Indigenous Peoples:

Rethinking Resource Management Richard Howitt, 2001 This book offers students and practitioners a sophisticated and convincing framework for rethinking the usual approaches to resource management It uses case studies to argue that professional resource managers do not take responsibility for the social and environmental consequences of their decisions on the often vulnerable indigenous communities they affect It also discusses the invisibility of indigenous people values and knowledge within traditional resource management It offers a new approach to social impact assessment methods which are more participatory and empowering The book employs a range of case studies from Australia North America and Norway

Rethinking Resource Management Richard Howitt, 2002-01-31 Rethinking Resource Management offers students and practitioners in resource management a sophisticated and convincing framework for rethinking the dominant approaches to resource management in a complex world

Community Futures, Legal Architecture Marcia Langton, Judy Longbottom, 2012-05-31 How are indigenous and local people faring in their dealings with mining and related industries in the first part of the 21st century The unifying experience in all the resource rich states covered in the book is the social and economic disadvantage experienced by indigenous peoples and local communities paradoxically surrounded by wealth producing projects Another critical commonality is the role of law

Where the imposition of statutory regulation is likely to result in conflict with local people some large modern corporations have shown a preference for alternatives to repressive measures and expensive litigation Ensuring that local people benefit economically is now a core goal for those companies that seek a social licence to operate to secure these resources There is almost universal agreement that the best use of the financial and other benefits that flow to indigenous and local people from these projects is investment in the economic participation education and health of present generations and accumulation of wealth for future generations There is much hanging on the success of these strategies it is often asserted that they will result in dramatic improvements in the status of indigenous and local communities What happens in practice is fascinating as the contributors to this book explain in case studies and analysis of legal and economic problems and solutions

Extractive Industry and the Sustainability of Canada's Arctic Communities Chris Southcott, Frances Abele, Dave Natcher, Brenda Parlee, 2022-09-15 Modern treaties increased self government new environmental assessment rules co management bodies and increased recognition and respect of Indigenous rights make it possible for northern communities to exert some control over extractive industries Whether these industries can increase the well being and sustainability of Canada's Arctic communities however is still open to question *Extractive Industry and the Sustainability of Canada's Arctic Communities* delves into the final research findings of the Resources and Sustainable Development in the Arctic project which attempted to determine what was required for extractive industry to benefit northern communities Drawing on case studies this book explores how northern communities can capture and distribute a fairer share of financial benefits how they can use extractive activities for business development the problems and possibilities of employment and training opportunities and the impacts on gender relations It also considers fly in fly out work patterns subsistence activities housing post mine clean up activities waste management and ways of monitoring positive and negative impacts While extractive industries could potentially help improve the sustainability of Canada's Arctic many issues stand in the way most notably power imbalances that limit the ability of Indigenous Peoples to equitably participate in their governance *Extractive Industry and the Sustainability of Canada's Arctic Communities* emphasizes the general need to determine how new institutions and processes which are largely imported from the south can be adapted to allow for a more authentic participation from the Indigenous Peoples of Canada's Arctic

Earth Matters Ciaran O'Faircheallaigh, Saleem Ali, 2017-09-08 Indigenous peoples have historically gained little from large scale resource development on their traditional lands and have suffered from its negative impacts on their cultures economies and societies During recent decades indigenous groups and their allies have fought hard to change this situation in some cases by opposing development entirely in many others by seeking a fundamental change in the distribution of benefits and costs from resource exploitation In doing so they have utilised a range of approaches including efforts to win greater recognition of indigenous rights in international fora pressure for passage of national and state or provincial legislation recognising indigenous land rights and protecting indigenous culture litigation in

national and international courts and direct political action aimed at governments and developers often in alliance with non governmental organisations NGOs At the same time and partly in response to these initiatives many of the corporations that undertake large scale resource exploitation have sought to address concerns regarding the impact of their activities on indigenous peoples by adopting what are generally referred to as corporate social responsibility CSR policies This book focuses on such corporate initiatives It does not treat them in isolation recognising that their adoption and impact is contextual and is related both to the wider social and political framework in which they occur and to the activities and initiatives of indigenous peoples It does not treat them uncritically recognising that they may in some cases consist of little more than exercises in public relations However neither does it approach them cynically recognising the possibility that even if CSR policies and activities reflect hard headed business decisions and indeed perhaps particularly if they do so they can generate significant benefits for indigenous peoples if appropriate accountability mechanisms are in place In undertaking an in depth analysis of CSR and indigenous peoples in the extractive industries the book seeks to answer the following questions What is the nature and extent of CSR initiatives in the extractive industries and how should they be understood What motivates companies to pursue CSR policies and activities How do specific political social and legal contexts shape corporate behaviour What is the relationship between indigenous political action and CSR How and to what extent can corporations be held accountable for their policies and actions Can CSR help bring about a fundamental change in the distribution of benefits and costs from large scale resource exploitation and if so under what conditions can this occur Earth Matters gathers key experts from around the world who discuss corporate initiatives in Alaska Ecuador Australia Canada Peru Papua New Guinea Indonesia and Russia The book explores the great diversity that characterises initiatives and policies under the name of corporate social responsibility the highly contingent and contextual nature of corporate responses to indigenous demands and the complex and evolving nature of indigenous corporate relations It also reveals much about the conditions under which CSR can contribute to a redistribution of benefits and costs from large scale resource development Earth Matters will be essential reading for those working in and studying the extractive industry worldwide as well as those readers looking for a state of the art description of how CSR is functioning in perhaps its most difficult setting

The Cultural Context of Biodiversity Conservation Petra Maass, 2008 How are biological diversity protected areas indigenous knowledge and religious worldviews related From an anthropological perspective this book provides an introduction into the complex subject of conservation policies that cannot be addressed without recognising the encompassing relationship between discursive political economic social and ecological facets By facing these interdependencies across global national and local dynamics it draws on an ethnographic case study among Maya Q'eqchi communities living in the margins of protected areas in Guatemala In documenting the cultural aspects of landscape the study explores the coherence of diverse expressions of indigenous knowledge It intends to remind of cultural values and beliefs closely tied to subsistence activities and ritual

practices that define local perceptions of the natural environment The basic idea is to illustrate that there are different ways of knowing and reasoning seeing and endowing the world with meaning which include visible material and invisible interpretative understandings These tend to be underestimated issues in international debates and may provide an alternative approach upon which conservation initiatives responsive to the needs of the humans involved should be based on

Strategies for Tourism Industry Murat Kasimoglu,2012-04-20 Today it is considered good business practice for tourism industries to support their micro and macro environment by means of strategic perspectives This is necessary because we cannot contemplate companies existing without their environment If companies do not involve themselves in such undertakings they are in danger of isolating themselves from the shareholder That in turn creates a problem for mobilizing new ideas and receiving feedback from their environment In this respect the contributions of academics from international level together with the private sector and business managers are eagerly awaited on topics and sub topics within Strategies for Tourism Industry Micro and Macro Perspectives

Sacred Ecology Fikret Berkes,2017-09-01 Sacred Ecology examines bodies of knowledge held by indigenous and other rural peoples around the world and asks how we can learn from this knowledge and ways of knowing Berkes explores the importance of local and indigenous knowledge as a complement to scientific ecology and its cultural and political significance for indigenous groups themselves With updates of relevant links for further learning and over 180 new references the fourth edition gives increased voice to indigenous authors and reflects the remarkable increase in published local observations of climate change

Human Rights and the Environment Linda Hajjar Leib,2011 The book examines the

genesis and development of environmental rights or the Right to Environment in international law and discusses their philosophical theoretical and legal underpinnings in the context of sustainable development and the notion of solidarity rights

When the Caribou Do Not Come Brenda L. Parlee, Ken J. Caine, 2018-05-23 In the 1990s news stories began to circulate about declining caribou populations in the North West caribou the canary in the coal mine for climate change or did declining numbers reflect overharvesting by Indigenous hunters or failed attempts at scientific wildlife management Grounded in community based research in northern Canada a region in the forefront of co management efforts these collected stories and essays bring to the fore the insights of the Inuvialuit Gwich'in and Saht'ot'ine people for whom caribou stewardship has been a way of life for centuries Anthropologists historians political scientists ecologists and sociologists join forces with elders and community leaders to discuss four themes the cultural significance of caribou caribou ecology food security and caribou management Together they bring to light past challenges and explore new opportunities for respecting northern communities cultures and economies and for refocusing caribou management on the knowledge practices and beliefs of northern Indigenous peoples Ultimately When the Caribou Do Not Come drives home the important role that Indigenous knowledge must play in understanding and coping with our changing Arctic ecosystems and in building resilient adaptive communities

Minority Rights in the Pacific Region Joshua Castellino, David Keane, 2009 Countries in the Pacific face unique challenges of survival and progress in establishing themselves and participating fully in international society Their geographic isolation from the rest of global society is compounded by complex layers of often competing national and indigenous identities among their populations built through wave upon wave of migration This has created rich diversity competing regimes and real challenges in terms of state building ethnic identity social policy cohesion and development in post colonial settings The issues studied here would be of interest to scholars from a range of different disciplines such as Law Politics Sociology and Anthropology By examining the theory and practice of minority rights law in states such as Fiji and Papua New Guinea alongside their more familiar neighbours Australia and New Zealand this book makes a unique contribution in a region often ignored in the literature

Valuation and Conservation of Biodiversity Michael Markussen, Ralph Buse, Heiko Garrelts, María Mané Costa, Susanne Menzel, Rainer Marggraf, 2005-11-10 The goal of this transdisciplinary book is to identify the problems and challenges facing implementation of the Convention on Biological Diversity CBD from the global regional and local points of view The valuation and conservation of biodiversity are critical first steps necessary for the adequate protection of the environment The authors give insights into the influences the CBD exerts and current trends in the field

Socially Responsible Investment Law Benjamin J Richardson, 2008-06-30

Environmental harm is commonly associated with companies that extract, consume and pollute our shared natural resources. Rarely are the unseen polluters the financiers that sponsor and profit from eco-damaging corporations placed at the forefront of the environmental debate. By focusing on these unseen polluters, Benjamin Richardson provides a comprehensive examination of socially responsible investment (SRI) and offers a guide to possible reform. Richardson proposes that greater regulatory supervision of SRI will help ensure that the financial sector prioritizes ethically based investments. In *Socially Responsible Investment Law*, he suggests that new governmental reforms should encourage companies to participate in socially responsible investments by providing a better mix of standards and incentives for SRI through measures that include redefining the fiduciary responsibilities of institutional investors to incorporate environmental concerns. By doing so, Richardson posits that corporate financiers including banks, hedge funds and pension plans will become more accountable to the goals of ensuring sustainable development.

International Law and Indigenous Peoples Joshua Castellino, Niamh Walsh, 2005-03-01 This volume, a collection of essays by a variety of scholars in the field of indigenous rights, originates from the Irish Centre for Human Rights at the National University of Ireland in Galway. It highlights those instances in the work of international organizations where advances have been made concerning indigenous rights. It also devotes attention to the Permanent Forum on Indigenous Issues to the Committee on the Elimination of Racial Discrimination and to a number of thematic issues in the field. The human rights situations facing indigenous peoples in Australia, Bangladesh, Canada, India, Kenya, Mexico, Nicaragua, Nigeria and South Africa are dealt with in separate chapters. These surveys show a range of reactions to the multiple problems of discrimination or lack of proper responses as far as domestic legislation, national implementation of the laws and national compliance with the applicable international standards are concerned.

A Companion to Social Geography Vincent J. Del Casino, Jr., Mary Thomas, Paul Cloke, Ruth Panelli, 2011-05-06 This volume traces the complexity of social geography in both its historical and present contexts whilst challenging readers to reflect critically on the tensions that run through social geographic thought. Organized to provide a new set of conceptual lenses through which social geographies can be discussed, it presents an original intervention into the debates about social geography. Highlights the importance of social geography within the broader field of geography.

New Directions in Social Impact Assessment Frank Vanclay, Ana Maria Esteves, 2011-01-01 This book should be read by anyone commissioning impact assessments who wants to build their understanding of the more progressive and innovative end of the topic. A job well done in the eyes of stakeholders and regulators requires proper social analysis. Jon Samuel Head of Social Performance, Anglo American. The list of authors reads like a who's who in SIA. Academics and practitioners are equally represented among the authors. The book provides a good mix of broad theoretical concepts and specific practical topics. Martin Haefele, Manager Environmental Impact Assessment at Mackenzie Valley Environmental Impact Review Board, Yellowknife, Northwest Territories, Canada. This book gives a very broad overview of where Social Impact Assessment is coming from, where it is now.

and where it could go from an impact assessment tool to an impact management tool It provides a realistic insight in both the achievements and the struggles of Social Impact Assessment A recommended read for both those interested in Social Impact Assessment and those in related domains where social issues are gaining increasing importance such as Environmental Assessment and Sustainability Appraisal Rob Verheem Deputy Director Netherlands Commission for Environmental Assessment This important new book outlines current developments in thinking in the field of Social Impact Assessment SIA It advances the theory and practice of SIA and argues that a dramatic shift is required in the way socioeconomic studies and community participation is undertaken The book emphasizes that much more than the act of predicting impacts in a regulatory context SIA needs to be the process of managing the social aspects of development and that there needs to be a holistic and integrated approach to impact assessment It stresses that greater attention needs to be given to ensuring that the goals of development are attained and enhanced This significant addition to the literature will be an invaluable reference for academics consultants and practitioners
