## **Rethinking Methods In Psychology:**

**Rethinking Methods in Psychology** Jonathan A Smith, Rom Harre, Luk Van Langenhove, 1995-09-07 The recent widespread rejection of conventional theory and method has led to the evolution of different ways of gathering and analyzing data This accessible textbook introduces key research methods that challenge psychology's traditional preoccupation with scientific experiments The book provides a well structured guide to methods containing a range of qualitative approaches for example semi structured interviews grounded theory discourse analysis alongside a reworking of quantitative methods to suit contemporary psychological research A number of chapters are also explicitly concerned with research as a dynamic interactive process The internationally respected contributors steer the reader through the main stages

*Rethinking Psychology* Jonathan A Smith, Rom Harre, Luk Van Langenhove, 1995-11-13 This text provides a critique of the mainstream theoretical foundations ranging from phenomenology and symbolic interactionism to cultural and feminist approaches Contributors present key strands of theory showing how they feed into the debate about the creation of a new psychology

Handbook of Qualitative Research Methods in Entrepreneurship Helle Neergaard, John P. Ulhøi, 2007 the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon Craig S Galbraith Journal of Enterprising Communities There is no hiding behind the ramparts of dry scholarship here The credibility of the theory being spoken of is not the stuff of constructed proofs but alignments of critical insight and utility This is where qualitative work can make a difference to the field and where this book makes its mark Robin Holt International Journal of Entrepreneurial Behaviour and Research The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done are doing and will do in entrepreneurship research Every serious entrepreneurship scholar should read it It points at the future Bjørn Bjerke University of Kalmar Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies For those who try to get away from only quantitative studies in both business practice and academic research this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic discourse and narrative approaches It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions This domain is not physics In bringing together such a variety of experts from so many nationalities in this Handbook our Danish colleagues are making entrepreneurship research a realistic global venture Jan Ulijn Eindhoven University of Technology The Netherlands Helle Neergaard and John P. Ulhøi have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches This book is not simply a handbook of qualitative

research methods though it well achieves this aim it is also an important contribution towards the field of entrepreneurship research From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship It fills a crucial gap in the literature on entrepreneurship theory and just as importantly illustrates how these principles and techniques can be appropriately and fruitfully employed The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies They achieve this by providing concrete examples of research experiences and tangible how to advice By clarifying what these research methods entail how they are currently being used and how they can be evaluated this Handbook constitutes a comprehensive and highly accessible methodological toolbox Dealing with both well accepted qualitative approaches and lesser known rarer and more novel approaches to the study of entrepreneurship this Handbook will be invaluable to those studying researching and teaching entrepreneurship

**Material Discourses of Health and Illness** Lucy Yardley, 2013-01-11 Material Discourses of Health and Illness applies discursive approaches to the field of health psychology in stark contrast to the bio medical model of health and illness The discursive approach uses the person's experience and feelings as the central focus of interest whereas the more traditional models regarded these as coincidental and relatively unimportant The book provides an accessible and compelling introduction to social constructionist and discursive approaches to those with limited previous knowledge of socio linguistic theory and research It provides practical examples of how these approaches can be applied to the field of health psychology with a collection of sophisticated discursive analyses which demonstrate the distinctive contribution that can be made by psychologists to a field that has been largely dominated by sociologists and anthropologists

*Collecting Qualitative Data* Virginia Braun, Victoria Clarke, Debra Gray, 2017-10-19 Is there more to qualitative data collection than face to face interviews Answering with a resounding yes this book introduces the reader to a wide array of exciting and novel techniques for collecting qualitative data in the social and health sciences Collecting Qualitative Data offers a practical and accessible guide to textual media and virtual methods currently under utilised within qualitative research Contributors from a range of disciplines share their experiences of implementing a particular technique provide step by step guidance to using that approach and highlight both the potential and pitfalls From gathering blog data to the story completion method to conducting focus groups online the methods and data types featured in this book are ideally suited to student projects and other time and resource limited research In presenting several innovative ways that data can be collected new modes of scholarship and new research orientations are opened up to student researchers and established scholars alike

*The Oxford Handbook of Identities in Organizations* Andrew D. Brown, 2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable

debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

*Transpersonal Research Methods for the Social Sciences* William Braud, Rosemarie Anderson, 1998-04-29 The authors explain and discuss a series of transpersonal research methods designed to help researchers develop new ways of investigating extraordinary human experiences of a subjective nature

Handbook of Data Analysis Melissa A Hardy, Alan Bryman, 2009-06-17 This book provides an excellent reference guide to basic theoretical arguments practical quantitative techniques and the methodologies that the majority of social science researchers are likely to require for postgraduate study and beyond Environment and Planning The book provides researchers with guidance in and examples of both quantitative and qualitative modes of analysis written by leading practitioners in the field The editors give a persuasive account of the commonalities of purpose that exist across both modes as well as demonstrating a keen awareness of the different things that each offers the practising researcher Clive Seale Brunel University With the appearance of this handbook data analysts no longer have to consult dozens of disparate publications to carry out their work The essential tools for an intelligent telling of the data story are offered here in thirty chapters written by recognized experts Michael Lewis Beck F Wendell Miller Distinguished Professor of Political Science University of Iowa This is an excellent guide to current issues in the analysis of social science data I recommend it to anyone who is looking for authoritative introductions to the state of the art Each chapter offers a comprehensive review and an extensive bibliography and will be invaluable to researchers wanting to update themselves about modern developments Professor Nigel Gilbert Pro Vice Chancellor and Professor of Sociology University of Surrey This is a book that will rapidly be recognized as the bible for social researchers It provides a first class reliable guide to the basic issues in data analysis such as the construction of variables the characterization of distributions and the notions of inference Scholars and students can turn to it for teaching and applied needs with confidence The book also seeks to enhance debate in the field by tackling more advanced topics such as models of change causality panel models and network analysis Specialists will find much food for thought in these chapters A distinctive feature of the book is the breadth of coverage No other book provides a better one stop survey of the field of data analysis In 30 specially commissioned chapters the editors aim to encourage readers to develop an appreciation of the range of analytic options available so they can choose a research problem and then develop a suitable approach to data analysis

**The Places Where Community Is Practiced** Anna Steigemann, 2019-02-25 In this open access publication the social cohesion of urban neighborhoods and their residents is examined which is often viewed as

vulnerable since increased mobility individualization wider socio economic and demographic changes have fundamentally altered the basis for everyday social interaction in urban neighborhoods Anna Steigemann gives scholarly attention to the concrete places where neighborly interactions still take place and to how these interactions affect local community building She illuminates and explores the ordinary everyday interactions and social practices in and around shops and gastronomic facilities on a shopping street in Berlin Neukölln revealing how these businesses are important places where community is practiced but also why they are increasingly threatened by commercial and residential gentrification **Stress, Cognition**

**and Health** Tony Cassidy, 2017-12-22 Stress Cognition and Health examines the key issues in the psychology of stress and health bringing together a wide range of material generally not found in a single text It looks at how the external world makes demands upon individuals potentially causes of stress while at the same time providing them with resources to cope with stress It covers topics such as work and employment families commuting large scale disasters and daily hassles and considers how these impact on biological processes through effects on the immune system *The Trainee Handbook* Robert Bor, Mary Watts, 2011-01-19 The Trainee Handbook is a supportive guide to the practical technical and administrative issues faced by trainees in counselling psychology and psychotherapy **Qualitative Research for Allied Health Professionals**

Linda Finlay, Claire Ballinger, 2006-06-14 This practical text addresses a gap in the literature by mapping the links between philosophy research method and practice in an accessible readable way It offers guidance to allied health professionals increasingly involved in research as the emphasis grows on evidence based practice on how to engage in meaningful good quality qualitative research To help researchers take on this challenge the book highlights some of the choices involved in carrying out qualitative research offers a wide range of practical examples to show how different ways of doing qualitative research can be managed critically examines a variety of qualitative research methodologies of particular interest to allied health professionals clarifies the links between epistemology methodology and method The book is structured in three parts Part I sensitises readers to the complex issues which challenge qualitative researchers at the planning stage of their projects In Part II the challenge of using different methodologies is critically explored by fifteen authors who describe their individual research experiences Part III examines the choices researchers make when they evaluate and present research Racial Sensitivity and Multicultural Training Martin Strous, 2004-01-30 Offering implications for democratizing psychology on a global scale this work illustrates how professional training for mental health practitioners is often inadequate on issues pertaining to race and racism The author shows prime examples in his homeland South Africa and focuses on how those practices reflect assumptions concerning racial superiority Also addressed is how therapists may be influenced by prevailing ideologies unaware of how prejudices translate into discriminatory work practices and ignorant of the power of their own discriminatory discourses The author also investigates how positive attitudes by counselors and therapists reflect positions related to racial sensitivity He proposes a new model for multicultural and multiracial sensitivity training *Festschrift in*
