Rethinking Multiculturalism Bhikhu Parekh, 2005-10-31 This important and much acclaimed book rapidly became a classic on first publication. In it Bhikhu Parekh shows that the Western tradition of political philosophy has very limited theoretical resources to cope with cultural diversity. He then discusses how it can be revised and what new conceptual tools are needed. The core of the book addresses the important theoretical questions raised by contemporary multicultural society especially the nature and limits of intercultural equality and fairness, national identity, citizenship and cross cultural political discourse. The new second edition includes a substantial additional chapter addressing key issues. **Rethinking**

Derek Rubin, J. Verheul, 2009 This provocative and rich volume charts the post 9/11 debates and practice of multiculturalism pinpointing their political and cultural implications in the United States and Europe. **Political Practices and**

International Order Stefan Heuser, Hans Günter Ulrich, 2007 International order is one of the most challenging issues in political ethics today and its place within the multifaceted field of politics is frequently debated. The diverse phenomena resulting from globalisation particularly in the wake of the end of the so called Cold War urge us to think about our world in terms of a single political entity. Besides the existing international institutions however it is still open to question what this entity should be and what concrete political practices should correspond to it. In the essays collected in this book political scientists, sociologists, philosophers, theologians and policy advisors explore how political practices can be institutionally localised without necessarily becoming incorporated into structures of governance. Political ethics as presented in this book seeks to address the particular practices of power, justice and peace of citizens themselves and to assess their relevance for the shaping of international institutions. **Rethinking Multiculturalism**

Bhikhu C. Parekh, 2002 Bhikhu Parekh argues for a pluralist perspective on cultural diversity. Writing from both within the liberal tradition and outside of it as a critic he challenges what he calls the moral monism of much of traditional moral philosophy including contemporary liberalism its tendency to assert that only one way of life or set of values is worthwhile and to dismiss the rest as misguided or false. He defends his pluralist perspective both at the level of theory and in subtle nuanced analyses of recent controversies. Thus he offers careful and clear accounts of why cultural differences should be respected and publicly affirmed, why the separation of church and state cannot be used to justify the separation of religion and politics and why the initial critique of Salman

Rushdie before a Fatwa threatened his life deserved more serious attention than it received Rejecting naturalism which posits that humans have a relatively fixed nature and that culture is an incidental and culturalism which posits that they are socially and culturally constructed with only a minimal set of features in common he argues for a dialogic interplay between human commonalities and cultural differences This will allow Parekh argues genuinely balanced and thoughtful compromises on even the most controversial cultural issues in the new multicultural world in which we live **Cultural Legitimacy in**

economic and environmental effects of globalization require critical responses Global bioethics is not a finished product that can simply be applied to solve global problems but it is the ongoing result of interaction and exchange between local practices and global discourse It combines recognition of differences and respect for cultural diversity with convergence towards common perspectives and shared values The book examines the nature of global problems as well as the type of responses that are needed in order to exemplify the substance of global bioethics It discusses the ethical frameworks that are available for global discourse and shows how these are transformed into global governance mechanisms and practices
