Retinoids In Oncology:

Retinoids in Oncology Waun Ki Hong, Reuben Lotan, 1993-05-11 This reference provides a comprehensive overview of recent developments in basic research that are relevant to the application of retinoids for cancer prevention and treatment. Organized in a quick referral format by specific disease site, this book describes the effects of retinoids on squamous differentiation in normal, pre-malignant and malignant epithelial tissues; addresses the mechanisms by which cultured keratinocytes respond to retinoids; considers the antitumor activity of combination therapy with retinoids and cytokines; reviews the toxicity profiles of the vitamin A molecule and the synthetically derived retinoid compounds and their effects on humans; examines the use of retinoids in the prevention of basal cell carcinoma and squamous cell carcinoma (SCC) and in the therapy of advanced SCC; and summarizes data on the potential of retinoids to prevent epithelial cancer, to act as adjuvants to current therapies in early stages of the disease, and to aid in the management of both solid tumours and hematologic malignancies. A guide for the many disciplines involved in the preclinical studies and direct care of cancer patients, this book serves as useful reading for clinical, surgical and radiation oncologists, clinical immunologists, dermatologists, obstetricians, gynaecologists, haematologists, otolaryngologists, internists, nutritionists and pulmonary disease specialists. *Retinoids in Oncology* Laurent Degos, David R. Parkinson, 1995-01-01 Recent developments with respect to the biology and clinical use of retinoids in cancer therapy and prevention are comprehensively covered by experts in this new field. Newer aspects of molecular mechanisms of retinoid effects, the cellular biology and the developmental effects of these compounds are presented together with a comprehensive description of the latest findings of retinoid pharmacology, toxicology and clinical effects in a wide range of hematological and solid malignancies. **Retinoids in Oncology** Waun Ki Hong, Reuben Lotan, 2020-07-24 This reference provides a comprehensive overview of recent developments in basic research that are relevant to the application of retinoids for cancer prevention and treatment. Retinoids IARC Working Group on the Evaluation of Cancer-preventive Agents, World Health Organization, International Agency for Research on Cancer, 1999. The retinoids are a class of compounds structurally related to Vitamin A. In the last 30 years more than 2 500 retinoids have been synthesized and biologically tested with the objective of identifying those with an enhanced therapeutic ratio. The majority have been studied for their cancer preventive activity in experimental models and some in clinical trials in humans. On 24-30 March 1999 a working group of international experts met in Lyon to consider the existing evidence on the cancer preventive activity of nine retinoids judged to have sufficient human and/or animal data to permit evaluation. This handbook details the evidence considered and summarizes the evaluation made by the working group.

Retinoids as Anti-cancer Agents in Breast Cancer Manzoor Ahmad Mir, 2025-08-05. Retinoids as Anti-cancer Agents in Breast Cancer: A New Hope for Breast Cancer Treatment offers a comprehensive overview of the latest research and advancements in using retinoids to treat breast cancer. The book delves into novel approaches including drug combinations and the development of new pharmaceuticals. It provides an in-depth analysis of current treatment methods, highlighting both challenges and opportunities in the field. Topics covered include the principles and mechanisms of retinoids as anti-cancer agents, preclinical and clinical studies, and advancements in drug delivery systems and nano-formulations. Future research directions are also explored, emphasizing new drug combinations, biomarkers for patient selection, and personalized treatment strategies. This book will serve as a platform for students, researchers, oncologists, pharmacologists, and healthcare professionals who want to understand the potential of retinoids in clinical practice. Provides insights into the need for using cutting-edge technology to develop novel pharmaceutical agents based on bioactive natural compounds for the efficient cancer treatment of breast cancer. Captures new research and knowledge to fully understand and potentially optimize the use of retinoids in breast cancer treatment. Evaluates the potential of retinoids in breast cancer treatment as novel alternatives to mainstream breast cancer therapy.

Retinoids: Their Physiological Function and Therapeutic Potential G.V. Sherbet, 1997-10-30. Retinoids have received considerable attention in recent years and due cognizance has been given to their versatility as biological response modifiers as evidenced by the virtually explosive growth of literature in this field in the past few years. This volume has been designed to give a current state-of-the-art picture of retinoids. The perceived potential of retinoids in the treatment of certain diseases stated has initiated attempts at identifying and synthesizing new retinoid derivatives with definable and selective effects on aberrant biological phenomena. Appropriately therefore we begin with the chemistry of retinoids and their derivatives together with discussions of their

biological activity Major advances have been made in understanding the mechanisms by which retinoids modulate physiological and phenotypic traits of cells The transduction of retinoid signaling by the mediation of nuclear receptors of the steroid thyroid receptor superfamily has now been studied extensively and the cloning and defining the characteristics of these receptors has been a focus of discussion in this volume Retinoids also markedly modulate the transduction of extracellular signals such as those imparted by growth factors and hormones and thus actively influence and control cellular proliferative patterns Retinoids can alter epidermal growth factor receptor expression Kawaguchi et al 1994 responsiveness to thyroid hormone Esfandiari et al 1994 Pallet et al 1994 inhibit the proliferative responses of hematopoietic progenitor cells to granulocyte colony stimulating factor Smeland et al 1994 and modulate secretion on interleukins by leukaemic cells Balitrand et al 1994 among other things This has obvious implications for pharmacological manipulation of deregulated growth Dickens and Colletta 1993 Mulshine et al 1993 Apoptosis is another component in the regulation of growth control Apoptotic cell death is influenced by several agents and retinoids may function by interfering with apoptotic pathways of regulation of growth control and quite legitimately therefore the importance of this aspect of retinoid function has been duly recognized here

Chemistry and Biology of Synthetic Retinoids Marcia I. Dawson, 2018-01-18 The purpose of this book is to present an overview of advances in both retinal and retinoic acid synthetic chemistry and biology Chapters are written by research workers who are active in these fields Emphasis is placed on structure activity relationships It includes topics of cell differentiation maintenance of cell morphology and vision This reference contains a special section on assays which were developed to measure retinoid activity This book is ideal for those interested in the fields of photobiology organic chemistry biological chemistry and nutrition

Retinoids: From Basic Science to Clinical Applications M.A. Livrea, G. Vidali, 1994-05-26 Basic investigators as well as clinicians will find this volume valuable both as a summary of recent research and as a stimulus for future experimental work in this continuously expanding field

Cancer and Nutrition Kedar N. Prasad, William C. Cole, 1998 This book discusses the role of nutrients and vitamins in cancer prevention and treatment Basic and clinical scientists from different regions of the world have contributed to this volume The incidence of cancer is on the rise internationally and many of these cancers appear to be attributable to diet lifestyle and environmentally related factors In recent years many cancer causing substances and cancer protective agents which are associated with these factors have been identified and extensively tested in experimental models This work also focuses on newer conceptual ideas that have emerged regarding the functions of nutrients on cellular and molecular levels

Biology of Carcinogenesis M.J. Waring,B.A. Ponder,2012-12-06 There is no shortage of books on cancer Why publish another Simply because the subject is important possibly the most important challenge facing medicine today and consequently the focus of one of the fastest growing areas of fundamental biological research The quest to understand and control cancer is so absorbing that from time to time we really need to pause for a moment and try to take stock of the situation Given the sheer breadth of cancer related research that is not an easy task This book together with its planned successors in the series Cancer Biology and Medicine represents our attempt to draw back from the bench or the bedside for a moment and take a slightly longer look at what we are doing what we are trying to do and where we stand It is impossible to be comprehensive or even representative of more than a fraction of relevant knowledge but that is no excuse for not trying to see things in perspective Accordingly we set out to persuade a number of our colleagues to join us in writing a book which might admit a little fresh air into the confined atmosphere within which we mostly work a glimpse perhaps of fresh vistas

Chemoprevention in Cancer Control Matti Hakama,1996 This book is a collection of discussions and presentations made by leading experts during a workshop to review the results of recent empirical studies on the effectiveness of chemopreventive agents on the reduction of cancer risk The topics selected were intended to cover the main areas of research in this field over the last 5-10 years as well as important issues concerning the design of research studies cost effectiveness of chemoprevention and ethical concerns A set of conclusions and recommendations are included to provide a guide to formulating future public health policy and research strategy
