explores efforts at recollection in post dictatorship Argentina and the hoped for futures they set in motion The material visual
narrative and pedagogical interventions it analyzes address the dark years of state repression 1976 1983 while engaging
ongoing debates about how this traumatic past should be transmitted to future generations Two theoretical principles
structure the book's approach to cultural recall the first follows from an understanding of memory as a social construct that
is always as much about the past as it is of the present the second from the observation that what distinguishes memory from
history is affect These principles guide the study of iconic sites of memory in the city of Buenos Aires photographic essays
about the missing and the dictatorship's legacies of violence documentary films by children of the disappeared that challenge
hegemonic representations of seventies militancy a novel of exile that moves recollection across national boundaries and a
human rights education program focused on memory Understanding recollection as a practice that lends coherence to
disparate forces energies and affects the book approaches these spatial visual and scripted registers as impassioned
narratives that catalyze a new attentiveness within those they hail It suggests moreover that by inciting deep reflection and
an active engagement with the legacies of state violence interventions like these can help advance the cause of transitional
justice and contribute to the development of new political subjectivities invested in the construction of less violent futures
