Security in Europe Robert Edwards Hunter,1969 **Problems of Security and Cooperation in Europe** L.

Acimovic,1981-02-18 **Security in 21st Century Europe** Andrew Cottey,2025-05-01 The nature of security in Europe has been transformed in recent years Security in 21st Century Europe argues that the defining feature of contemporary European security is the existence of a security community underpinned by the twin institutions of the EU and NATO but that today the European security community NATO and the EU face a growing array of external challenges and their ability to respond to those challenges is increasingly being called into question Offering a systematic assessment of security in contemporary Europe this third edition examines the changing character of European security and assesses the extent of the threats posed by recent challenges as well as the policy dilemmas involved in responding to these challenges It explores Europe s engagement with core thematic issues in European security including military intervention nuclear weapons terrorism and non military security Providing both a substantive contribution to academic thinking on European security and a overview of debates on contemporary European security this new edition offers 3 new chapters on migration climate change and cybersecurity Coverage of all recent major developments related to European security including the Syrian civil war and the regional destabilization arising from it Russia Ukraine crisis the rise of populism the migration crisis the acceleration of China s rise Security in 21st Century Europe combines theory and detailed empirical analysis exploring both how different theoretical perspectives can help us think about European security and concrete empirical developments in European security policies and institutions This text is the perfect companion for advanced undergraduate and Master s level courses on European security whether within courses in Security studies European studies or International Relations

European Security in a Global Context Thierry Tardy,2010-06-09 This new edited volume examines contemporary European security from three different standpoints It explores security dynamics first within Europe second the interaction patterns between Europe and other parts of the world the United States Africa the Middle East China and India and finally the external perceptions of European security The first part of the book analyses the European security landscape The roles of EU NATO and the OSCE are given particular attention as is the impact of their evolution or enlargement on the European security architecture and European security dynamics In this context Russia s repositioning as a major power appears as a shaping factor of contemporary European geopolitics The second part presents European security from an external perspective and considers interactions between Europe and other states or regions Security trends and actors in Europe are examined from an American Chinese and Indian perspective while Europe Africa and Europe Middle East relations are also addressed This book will be of great interest to students of European Security European politics and IR in general

Strategic Cultures in Europe Heiko Biehl,Bastian Giegerich,Alexandra Jonas,2013-04-09 European countries work together in crisis management conflict prevention and many other aspects of security and defence policy Closer cooperation

in this policy arena seems to be the only viable way forward to address contemporary security challenges Yet despite the repeated interaction fundamental assumptions about security and defence remain remarkably distinct across European nations This book offers a comparative analysis of the security and defence policies of all 27 EU member states and Turkey drawing on the concept of strategic culture in order to examine the chances and obstacles for closer security and defence cooperation across the continent Along the lines of a consistent analytical framework international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots

Sens, 2007-01-30 The Changing Politics of European Security explores the key security challenges confronting Europe from relations with the US and Russia to the use of military force and the struggle against terrorism In the future the authors conclude European states will act alone independent of America on security matters

Security in 21st Century Europe Andrew Cottey, 2012-11-19 Fully revised and updated the second edition of this leading textbook provides a systematic assessment of security in contemporary Europe The book examines the changing character of security and assesses the extent of the threats posed by different challenges as well as the policy dilemmas involved in responding to these concerns The nature of security in Europe has been transformed in recent years Andrew Cottey argues that this is a result of two key developments the emergence of a security community a zone of peace where war is inconceivable across much of Europe and the presence of new security threats such as terrorism and energy dependence Set in the context of the rising power of non Western states and the continuing fall out from the global economic crisis this text provides a comprehensive analysis of Europe's new security challenges Europe's traditional problem of war between states is being displaced by a new and equally daunting set of security challenges While major war within Europe remains unlikely the 2008 Georgia war and the 2011 Libya war were reminders that violent conflicts are still prevalent on Europe's periphery and can pose major challenges for European governments NATO and the EU At the same time terrorism nuclear proliferation as well as non military problems like mass migration and climate change threaten Europe's security This text is the perfect companion for advanced undergraduate and Master's level courses on European security whether within courses in Security studies European studies or International Relations New to this Edition New framework for analysing European security Highly topical issues covered including Arab Spring rise of BRIC countries terrorism and European energy dependence

A Human Security Doctrine for Europe Marlies Glasius, Mary Kaldor, 2006-01-16 A Human Security Doctrine for Europe explores the actual needs of individual people in conflict areas rather than using a conventional institutional or geo political perspectives This new volume proposes that Europe should develop a new kind of human security capability that involves the military the police and civilians all working together to enforce law rather than to fight wars It argues that threats such as weapons of mass destruction or terrorism can only be countered if we address the insecurity of people in all parts of the world Many people in the world lead intolerably insecure lives In large parts of Africa the Balkans Central Asia and the Middle East men and women live in daily fear of violent attacks kidnapping rape extortion robbery or trafficking The existence of large military apparatuses does not create security indeed as in Iraq the use of regular military forces may only make things worse This stimulating study includes two chapters setting out the changed global context and proposing new approaches to security five regional studies on the Balkans the Great Lakes Region the Middle East the South Caucasus and West Africa four studies on different aspects of EU security policy including the legal setting the role of women operational principles and the role of the new member states four operational studies on capabilities resources and institutional embedding Written by a diverse team of international experts this book will be of strong interest to students and researchers of security studies peace studies human rights and international relations

Martín Ramírez, Jerzy Biziewski, 2020-08-15 This book argues that security and defense have never been true priorities in the European Union and have constantly been marginalized by the elites since the Soviet Union collapsed and the Warsaw Pact disintegrated Despite the official rhetoric only a few tangible results can be presented concerning the operational readiness of European forces and the EU's inability to act was proven during the crises in the Balkans NATO has experienced similar problems as the majority of its members are EU countries Both organizations have declared their resolve concerning the security and defense of their nations and territories but unfortunately little has been done to lend these statements credence In this context the book analyzes several aspects of EU security and defense including the EU NATO relationship common defense policy and strategy common capability building common understanding of strategic changes common operational

planning and centrally synchronized exercises based on operational planning etc The member states have helped to make EU NATO effective organizations but unfortunately their individual interests and priorities constitute real challenges This aspect should be discussed and addressed by political and military elites scholars analysts students and the general public alike
