extraordinary world of killer kings      **The Shark Whisperer** Ellen Prager, 2014-04-21 After his most klutzy move ever falling into a pool of sharks things for Tristan Hunt begin to look up Tristan is invited to an ocean themed summer camp in the Florida Keys where he discovers that he and the other young teens there have very special and rare talents when it comes to the ocean After the camp receives a distress call from ocean animals Tristan and his new friends get pulled into a daring rescue in the Bahamas With the help of sharks dolphins a quick escape artist octopus and some seabird bombers the campers must use their young talents in an attempt to outwit an evil shark finning reef blasting billionaire      *The Secret Life of Sharks* A. Peter Klimley, 2008-06-17 Marine biologist Pete Klimley swims with the sharks He was one of the first scientists to free dive among sharks and he has spent nearly thirty years studying shark behavior sometimes swimming in schools of several hundred sharks From his firsthand observations he has learned that sharks are not the vicious man eaters that we imagine but fascinating animals with complex behaviors Most people who think of sharks at all think immediately of great white sharks But there are more than four hundred species of shark Dr Klimley has studied several species most notably the great white and the hammerhead He describes the great white as the athlete among sharks and the hammerhead as the Ph D of the shark world In *The Secret Life of Sharks* Dr Klimley reveals the significant discoveries he made about hammerhead navigation and great white eating habits By studying hammerheads gathered around underwater seamounts Dr Klimley learned that hammerheads rely on sophisticated tracking of ocean floor magnetism to navigate His long term study of great white sharks off the California coast demonstrated that these huge sharks prefer to eat seals and sea lions because of the energy contained in their fatty bodies They are selective eaters not the man eaters we expect and they sometimes go weeks between meals But Dr Klimley did observe a ritualized behavior that great whites practice in order to avoid deadly disputes over prey that one shark has captured and another wants Although we have learned a great deal about shark behavior says Dr Klimley there is much that we do not know Unfortunately we are destroying these magnificent creatures of the deep through overfishing and degradation of the oceans Already some populations of sharks have declined steeply Vividly written by one of the foremost authorities on sharks *The Secret Life of Sharks* is a fascinating account of some of the world's most magnificent animals      *Teaching with Intention* Debbie Miller, 2023-10-10 Effective intentional teaching begins with a strong set of beliefs but even the best teachers including author Debbie Miller struggle to make sure that their classroom practice consistently reflects their core convictions In *Teaching with Intention* Defining Beliefs Aligning Practice Taking Action K 5 Miller defines her actions to ensure that children are the true beneficiaries of her teaching As Peter Johnston writes Through this book we have Debbie's teaching mind on loan She engages us in the details of a teaching life from inside her mind showing the thinking behind her teaching and the consequences of her actions *Teaching with Intention* brings us into classrooms of teachers and children Miller has met over the last five years in her work as a literacy consultant From setting up the classroom environment to the intentional use of language from comprehension instruction to lesson design

Miller is explicit about what she does and why At the same time she encourages teachers to develop their own belief statements concerning teaching and learning and includes key questions to guide them in this important process In an environment where the handing down of scripted programs and foolproof curricula is increasingly the norm Teaching with Intention offers a compelling reminder that truly transformative teaching is built from the ground up and is rebuilt every year by every teacher in every classroom with every new group of students

*A Sea Monster's Tale* Colin Speedie, 2021-06-08 There are few marine creatures as spectacular as the Basking Shark At up to 11 metres in length and seven tonnes in weight this colossal plankton feeding fish is one of the largest in the world second only to the whale shark Historically Basking Sharks were a familiar sight in the northern hemisphere off the coasts of Norway Scotland Ireland Canada and the USA for example In an 18th Century world without electricity they became the focus of active hunting for their huge livers containing large amounts of valuable oil primarily used in lamps Catch numbers were small enough to leave populations largely intact but during the 20th Century a new breed of hunter joined the fray some driven as much by a need for adventure as for financial gain With improved equipment and experience they exploited the shark on an industrial scale that drastically reduced numbers leading to localised near extinction in some areas From the 1970's onward a new generation took to the seas this time with conservation in mind to identify where the shark might still be found in the waters around the British Isles employing new technologies to solve long standing mysteries about the behaviour of this elusive creature Using the best of both old and new research techniques the case was built to justify the species becoming one of the most protected sharks in the oceans Today

the Basking Shark is a much loved cornerstone of our natural heritage There are positive signs that the population has stabilised and may even be slowly recovering from the damage of the past proving that timely conservation measures can be effective Join us on a journey amidst wild seas places people and conservation history in the battle to protect this iconic creature a true sea monster s tale
