**The Myth of Abstraction** Andrea Meyertholen, 2021 An alternative genealogy of abstract art featuring the crucial role of 19th century German literature in shaping it aesthetically culturally and socially Once upon a time or more specifically in 1911 there was an artist named Wassily Kandinsky who created the world s first abstract artwork and forever altered the course of art history or so the traditional story goes A good story but not the full story The Myth of Abstraction reveals that abstract art was envisioned long before Kandinsky in the pages of nineteenth century German literature It originated from the written word described by German writers who portrayed in

language what did not yet exist as art Yet if writers were already writing about abstract art why were painters not painting it To solve the riddle this book features the work of three canonical nineteenth century authors Heinrich von Kleist Johann Wolfgang von Goethe and Gottfried Keller who imagine theorize and describe abstract art in their literary writing sometimes warning about the revolution it will cause not just in art but in all aspects of social life Through close readings of their textual images and visual analyses of actual paintings Andrea Meyertholen shows how these writers anticipated the twentieth century birth of abstract art by establishing the necessary conditions for its production reception and consumption The first study to bring these early descriptions of abstraction together and investigate their significance The Myth of Abstraction writes an alternative genealogy featuring the crucial role of literature in shaping abstract art in aesthetic cultural and social terms mes warning about the revolution it will cause not just in art but in all aspects of social life Through close readings of their textual images and visual analyses of actual paintings Andrea Meyertholen shows how these writers anticipated the twentieth century birth of abstract art by establishing the necessary conditions for its production reception and consumption The first study to bring these early descriptions of abstraction together and investigate their significance The Myth of Abstraction writes an alternative genealogy featuring the crucial role of literature in shaping abstract art in aesthetic cultural and social terms mes warning about the revolution it will cause not just in art but in all aspects of social life Through close readings of their textual images and visual analyses of actual paintings Andrea Meyertholen shows how these writers anticipated the twentieth century birth of abstract art by establishing the necessary conditions for its production reception and consumption The first study to bring these early descriptions of abstraction together and investigate their significance The Myth of Abstraction writes an alternative genealogy featuring the crucial role of literature in shaping abstract art in aesthetic cultural and social terms e first study to bring these early descriptions of abstraction together and investigate their significance The Myth of Abstraction writes an alternative genealogy featuring the crucial role of literature in shaping abstract art in aesthetic cultural and social terms

*Clyfford Still* Clyfford Still, 1979 Clyfford Still is America s most important most significant and most daring artist This painter pursuing a course independent of the conventional apparatus of art dealers and galleries almost never exhibits except under museum auspices For these reasons a Clyfford Still exhibition is a major event in the art world and a book on Clyfford Still is a major event in the world of publishing The present volume which records the 1979 80 exhibition of seventy nine Still paintings dating from 1942 to 1978 at The

Metropolitan Museum of Art the largest exhibition of his work ever held is the most comprehensive book on Still's work and thus an important document of twentieth century art. Although Still has always kept aloof from the stereotyping nomenclature of schools and movements, he has had a powerful impact on contemporary art. His monumental canvases, bold forms saturated with intense color, are of surpassing scale and power. It is easy to understand why Still prefers the extended coverage that is generally possible in a museum environment: his works are charged with a sustaining energy that relates them to one another over the almost forty years that their creation spans, and when viewed seriatim they convey a transcendent narrative quality. Each of the seventy-nine paintings in the Metropolitan Museum's exhibition is reproduced here as a full page or fold-out color plate and is fully documented. Many other major works by Still are illustrated in black and white. Notes by the artist, selected letters from his files, and a biographical outline are accompanied by documentary photographs. The book contains a preface by Philippe de Montebello, director of The Metropolitan Museum of Art, and an enlightening introduction by the eminent art critic Katharine Kuh.

*The Art of Anatheism* Richard Kearney, Matthew Clemente, 2017-12-12. Theopoetics names the notion that the divine theos manifests itself as creative making poiesis. Anatheism expresses the attendant claim that this making takes the form of a second creation, re-creation, or creation again, and where humanity and divinity collaborate in the coming of the Kingdom. The Art of Anatheism brings together philosophers, theologians, and artists to open up the question of the relationship between artistic creation and the divine. The book asks the question: how can God happen again after the death of God? It answers it by proposing an art of anatheism which attends to the recreation and return of the divine through certain forms of literature, painting, liturgy, music, and performance. Engaging students, scholars, and interested readers across a wide range of disciplines: philosophy, theology, aesthetics, literary criticism, poetics, the volume includes contributions from both practising artists and professional academics. As such, it brings together examples from ancient religious wisdom traditions and cutting-edge contemporary cultural practices to suggest that the sacred is often most potent and persuasive when recreating the everyday world of our secular experience.

*Global Film Color* Sarah Street, Joshua Yumibe, 2024-05-17. *Global Film Color: The Monopack Revolution* at Midcentury explores color filmmaking in a variety of countries and regions including India, China, Japan, and Russia, and across Europe and Africa. Most previous accounts of color film have concentrated on early 20th-century color processes and Technicolor. Far less is known about the introduction and application of color technologies in the period from the mid-1940s to the 1980s when photochemical monopack color stocks came to dominate global film markets. As Eastmancolor, Agfacolor, Fujicolor, and other film stocks became broadly available and affordable, national film industries increasingly converted to color, transforming the look and feel of global cinema. Covering a broad range of perspectives, the chapters explore themes such as transnational flows, knowledge exchange, and transfer, the cyclical and asymmetrical circulation of technology in a global context, as well as the accompanying transformation of color film aesthetics in the postwar decades.
