

One heart?

Two hearts?

Three hearts?

I'm tiny!

That tickles!

How odd
is an octopus?

They are **VERY** odd!

They have large heads, eight arms, and...

The biggest octopus is as long as
a large crocodile, the smallest is
as small as a fingertip!

Octopus are boneless and can squeeze
their bodies into and out of tight spaces.

Making Mountains David Stradling, 2009-11-23

For over two hundred years the Catskill Mountains have been repeatedly and dramatically transformed by New York City In *Making Mountains* David Stradling shows the transformation of the Catskills landscape as a collaborative process one in which local and urban hands capital and ideas have come together to reshape the mountains and the communities therein This collaboration has had environmental economic and cultural consequences Early on the Catskills were an important source of natural resources Later when New York City needed to expand its water supply engineers helped direct the city toward the Catskills claiming that the mountains offered the purest and most cost effective waters By the 1960s New York had created the great reservoir and aqueduct system in the mountains that now supplies the city with 90 percent of its water The Catskills also served as a critical space in which the nation's ideas about nature evolved Stradling describes the great influence writers and artists had upon urban residents especially the painters of the Hudson River School whose ideal landscapes created expectations about how rural America should appear By the mid 1800s urban residents had turned the Catskills into an important vacation ground and by the late 1800s the Catskills had become one of the premiere resort regions in the nation In the mid twentieth century the older Catskill resort region was in steep decline but the Jewish Borscht Belt in the southern Catskills was thriving The automobile revitalized mountain tourism and residence and increased the threat of suburbanization of the historic landscape Throughout each of these significant incarnations urban and rural residents worked in a rough collaboration though not without conflict to reshape the mountains and American ideas about rural landscapes and nature

The Answer Is Still No Paul Bowles, Henry Veltmeyer, 2022-04-26T00:00:00Z

The Answer Is Still No is an important urgent book that compiles interviews with people who live along the route of the proposed Enbridge pipeline in Northern British Columbia The oil pipeline and supertankers linking the tar sands of Alberta to the demand of the growing Asian market are a key component of Canada's strategy of natural resource extraction But for the people living along the proposed pipeline route Enbridge poses a massive environmental risk which threatens their way of life This edited collection takes the passionate words and voices of twelve citizens and activists and results in one powerful position when it comes to blind economic development at the expense of our environment and communities The answer is still no
