Segregation Poverty And Mortality In Urban African Americans:

Segregation, Poverty, and Mortality in Urban African Americans Anthony P. Polednak, 1997 The potential impact of segregation on the health of African Americans is an intriguing and controversial issue that relates to the fields of epidemiology and the social sciences Epidemiologists have recently turned to the study of racism and health but epidemiologic studies have not dealt specifically with white black segregation and health This book brings together the results of several studies examining mortality rates for African Americans in selected U S urban areas in relation to both social class and the degree of black white residential segregation Despite allowances for economic disparity amongst the residents of the metropolitan areas studied mortality rates for African American infants and young adults traditional indicators of the level of social progress are shown to be especially high in certain highly segregated areas Beside the book's primary audience epidemiologists and public health practitioners this volume should appeal to sociologists especially medical sociologists who are likely to be familiar with segregation but not with its potential relevance to the health of African Americans as well as psychologists interested in racial discrimination Social workers urban studies experts and social and health policy makers will find much relevant material in this book as well

Regional Cultures and Mortality in America Stephen J. Kunitz, 2015 Examines how state government policies and their historic beginnings have present day effects on their residents political lives and on population health especially for marginalized groups Brookings-Wharton Papers on Urban Affairs: 2000 William G. Gale, Janet Rothenberg Pack, 2010-12-01 Designed to reach a wide audience of scholars and policymakers the Brookings Wharton Papers on Urban Affairs 2000 is an annual series that serves as a forum for cutting edge accessible research on urban policy The editors seek to integrate broader research into the urban policy discussion by bringing urban studies scholars together with economists and researchers studying subjects with important urban implications The six papers in this inaugural volume are divided into two sections The first three assess the state of urban research and policy The others address important aspects of the urban economy education racial segregation and federal housing policies

Social Epidemiology Lisa F. Berkman PhD,Ichiro Kawachi MD, PhD,Maria Glymour ScD,2014-07-09 Social epidemiology is the study of how the social world influences and in many cases defines the fundamental determinants of health This link was substantiated in the first edition of Social Epidemiology and the generation of research that followed has fundamentally changed the way we understand epidemiology and public health This much awaited second edition elevates the field again first by codifying the last decade of research then by extending it to examine how public policies impact health The new edition includes 11 fully updated chapters including entries on the links between health and discrimination income inequality social networks and emotion Four all new chapters on the role of policies in shaping health including how to translate evidence into action with multi level interventions Updated references detailing the best research over the last two decades The result is a bold brilliant text that will serve the new world of epidemiology in which scientists both observe health and design interventions to improve it Social Epidemiology again sets an intellectual agenda and provides an essential foundation for those interested in social determinants of health around the world **Biosocial Theories of Crime** KevinM. Beaver,2017-07-05 Biosocial criminology is an emerging perspective that highlights the interdependence between genetic

and environmental factors in the etiology of antisocial behaviors However given that biosocial criminology has only recently gained traction among criminologists there has not been any attempt to compile some of the classic articles on this topic Beaver and Walsh s edited volume addresses this gap in the literature by identifying some of the most influential biosocial criminological articles and including them in a single resource The articles covered in this volume examine the connection between genetics and crime evolutionary psychology and crime and neuroscience and crime This volume will be a valuable resource for anyone interested in understanding the causes of crime from a biosocial criminological perspective

Neighborhoods and Health Ichiro Kawachi,Lisa F. Berkman,2003-03-20 Do places make a difference to people s health and well being The authors of this groundbreaking textbook demonstrate convincingly how the physical and social characteristics of a neighborhood can shape the health of its residents Drawing on the expertise of a renowned cast of researchers this book presents a state of the art account of the theories methods and empirical evidence linking neighborhood conditions to population health Represented in the volume are contributions from the world s leading investigators in the field including social epidemiologists demographers medical geographers sociologists and medical practitioners This comprehensive textbook lays out for the first time the methodological approaches to conducting neighborhood research including multi level and contextual analysis geocoding and the use of small area based measures of deprivation as well as the evolving science of ecometrics Substantive chapters present the case for the relevance of neighborhood effects on health outcomes throughout the life cycle from infant mortality and low birthweight to childhood asthma adult infectious diseases and disability in old age The approaches covered in the book range from testing the linkages between community level variables such as social capital and residential segregation and population health to designing and implementing community interventions and policies to improve the health of the public The book is a timely companion volume to *Social Epidemiology* Oxford University Press 2000 edited by the same authors and an indispensable manual on neighborhood research for students researchers and practitioners

Black on the Block Mary Pattillo,2010-04-02 In *Black on the Block* Mary Pattillo a Newsweek Woman of the 21st Century uses the historic rise alarming fall and equally dramatic renewal of Chicago s North Kenwood Oakland neighborhood to explore the politics of race and class in contemporary urban America There was a time when North Kenwood Oakland was plagued by gangs drugs violence and the font of poverty from which they sprang But in the late 1980s activists rose up to tackle the social problems that had plagued the area for decades *Black on the Block* tells the remarkable story of how these residents laid the groundwork for a revitalized and self consciously black neighborhood that continues to flourish today But theirs is not a tale of easy consensus and political unity and here Pattillo teases out the divergent class interests that have come to define black communities like North Kenwood Oakland She explores the often heated battles between haves and have nots home owners and apartment dwellers and newcomers and old timers as they clash over the social implications of gentrification Along the way Pattillo highlights the

conflicted but crucial role that middle class blacks play in transforming such districts as they negotiate between established centers of white economic and political power and the needs of their less fortunate black neighbors A century from now when today's sociologists and journalists are dust and their books are too those who want to understand what the hell happened to Chicago will be finding the answer in this one Chicago Reader To see how diversity creates strange and sometimes awkward bedfellows turn to Mary Pattillo's Black on the Block Boston Globe

Nonprofits in Urban America Cynthia

Jackson-Elmoore, Richard C. Hula, 2000-09-30 From their experience in nonprofit operations and their understanding of the realities of urban politics the editors of this wide ranging volume and their contributors dig into issues seldom explored in the literature They study the role of nonprofits in local governing coalitions the potential of nonprofits to replace social welfare programs their efforts to restructure key elements of the local political process and the unanticipated internal impacts of the

changing roles of nonprofit organizations in the urban community The result is a compelling argument that to understand life in contemporary American cities we must take into account the expanding role of nonprofit organizations their response to increased service demands and their participation in common efforts to direct policy choices Hula Jackson Elmoore and their panel of scholars researchers and close observers of urban policymaking focus on the delivery of social services to illustrate the complex and important set of roles that nonprofits have assumed As social programs are cut at all levels of government it is often believed that nonprofits can and should take up the slack and restore at least some portion of the cutbacks in such services They examine how some nonprofit organizations have taken a proactive stance in this regard by implementing efforts that do not simply react to political and social change but attempt to initiate and guide it instead They attempt to change the political environment in which they operate and the result has been to change the face of local politics in many jurisdictions Each chapter of their book explores these expanding and emerging roles Themes and focuses vary which in turn reflects the variation and complexity within the nonprofit sector itself At the same time each chapter presents an emerging political or policy role now being played by today s nonprofits and voluntary associations and a theoretical context in which such activities and behavior can best be understood Scholars and advanced students in public administration economics and nonprofit management as well as executive level nonprofit managers will find here an important update on what is happening in their special worlds and the knowledge they need to make sense of it Race, Ethnicity, and Health Thomas A.
