and Michael Benjamin grapple with what is the most difficult event that confronts almost half of all modern families divorce Historically the developmental issues and problems surrounding divorce have been solved in the courts But modern day courts are overwhelmed by an avalanche of divorce cases more than a million a year and are unable to meet the needs of separating parties Family Mediation offers a fundamentally different approach from the conventional legal system The empirical research and clinical experience Irving and Benjamin bring to bear on this subject have resulted in the seminal work in this area This delightful and thoughtful book is a must for the modern mediation practitioner who works with families and children Duncan Lindsey Professor UCLA and Editor in Chief Children and Youth Services Review This book is unique in providing a complete overview of relevant subject areas for family mediation under one cover Its writing is timely because it dispels some of the myths in the rapidly expanding field of family mediation Family Mediation is a comprehensive text that follows the development of family mediation through the present and concludes with the predictors of future directions It is perhaps the most thorough critical review of the literature pertaining to family mediation and develops an inclusive practical model of practice for practitioners The book is readable responsible and of interest to family mediators and the family law lawyers who work closely with them It may become a must as a background for the novice family mediator about to embark on a course of training Laurel Pearson McWhinney Metcalfe and Associates Toronto Canada New International Frontiers in Child Sexual Abuse Ben Mathews, 2018-10-03 This book offers a timely and detailed exploration and analysis of key contemporary issues and challenges in child sexual abuse which holds great relevance for scholarly legal policy professional and clinical audiences worldwide The book draws together the best current evidence about the nature aetiology contexts and sequelae of child sexual abuse It explores the optimal definition of child sexual abuse considers sexual abuse in history and explores new theoretical understandings of children s rights and other key theories including public health and the Capabilities Approach and their relevance to child sexual abuse prevention and responses It examines a selection of the most pressing legal theoretical policy and practical challenges in child sexual abuse in the modern world in developed and developing economies including institutional child sexual abuse female genital cutting child marriage the use of technology for sexual abuse and the ethical responsibility and legal liability of major state and religious organisations and individuals It examines recent landmark legal and policy developments in all of these areas drawing in particular on extensive developments from Australia in the wake of its Royal Commission Into Institutional Responses to Child Sexual Abuse It also considers the best evidence about promising strategies and future promising directions in enhancing effective prevention intervention and responses to child sexual abuse Media, Children, and the Family Dolf Zillmann, Jennings Bryant, Aletha C. Huston, 2013-11-05 This book brings together a group of scholars to share findings and insights on the effects of media on children and family Their contributions reflect not only widely divergent political orientations and value systems but also three distinct domains of inquiry into human motivation and behavior social scientific psychodynamic or psychoanalytical and

clinical practice Each of these three domains is privy to important evidence and insights that need to transcend epistemological and methodological boundaries if understanding of the subject is to improve dramatically In keeping with this notion the editors asked the authors to go beyond a summary of findings and lend additional distinction to the book by applying the binoculars of their particular perspective and offering suggestions as to the implications of their findings One of the goals of the conference that resulted in this book was consensus building in the area of media and family From examining the findings and insights of a diverse group of scholars it seems that consensus building in several areas is a distinct possibility Addressing the concerns of educators about the influence of the mass media of communication entertainment programs in particular on children and the welfare of the nuclear family this volume projects directions for superior programming especially for educational television The influence of sex and violence on children and adults is given much attention and the development of moral judgment and sexual expectations among other things is explored The critical analysis of media effects includes examination of positive contributions of the media such as the search for missing children and exemplary educational programs
