studies fields Women, Armed Conflict and International Law Judith G. Gardam, Michelle J. Jarvis, 2021-08-04 The role that gender plays in determining the experience of those caught up in armed conflict has long been overlooked Moreover the extent to which gender influences the international legal regime designed to address the humanitarian problems arising from armed conflict has similarly been ignored In the early 1990s prompted by extensive media coverage of the rape of women during the conflict in Bosnia Herzegovina the international community was forced to critically examine the capacity of international law to respond to such crimes The prevalence of sexual violence is however merely one aspect of the distinctive impact of conflict on women Although a range of factors influence the way individual women experience armed conflict the endemic gender discrimination that exists in all societies is a common theme from Cambodia where women land mine victims are less likely to receive treatment for their injuries than are men to South Africa where women widowed during the Apartheid years have become outcasts in their own society To date the extent to which international law addresses the myriad of ways in which women are affected by armed conflict has received little attention This work takes the experience of women of armed conflict matches it with existing provisions of international law and investigates reasons for the silence of the latter in relation to these events for women It is the first broad based critique of international humanitarian law from a gender perspective The contribution of the United Nations through its focus on human rights to improving the protection of women in armed conflict is also considered The authors underscore the need for new approaches to the issue of women and armed conflict and canvass a range of options for moving forward

Sexual Offenses in Armed Conflict and International Law Noëlle Quénivet, 2021-10-01 Noëlle N R Quénivet has constructed a valuable tool for navigating the morass of sexual offences and international law Using Bosnia Herzegovina a jumping off point she proceeds to show how over the last two decades the Western world has been swept up by a wave of feminist scholars writing about international law and more particularly humanitarian and human rights law Although these articles books and statements have covered a broad range of issues the focus has been on sexual offences and more specifically on rape in times of conflict These authors as well as NGOs supporting their ideas have made a series of assumptions concerning sexual offences in times of armed conflict On the basis of these presumptions they have claimed inter alia that international law does not adequately prohibit sexual offences and

that prosecution is scarce This timely work examines whether the assumptions made by feminist scholars are solidly grounded in international law and whether their claims are still valid regarding the latest legal developments A thorough examination of the laws and the jurisprudence relating to sexual offences demonstrates that whereas before the creation of the ad hoc international criminal tribunals some of their claims were founded these claims are now partially ill founded Published under the Transnational Publishers imprint **Issues in Peace and Conflict Studies** CQ Researcher,2010-10-12
