Abusharaf, 2013-03-01 Bolokoli khifad tahara tahoor qudiin irua bondo kuruna negekorsigin and kene kene are a few of the terms used in local African languages to denote a set of cultural practices collectively known as female circumcision Practiced in many countries across Africa and Asia this ritual is hotly debated Supporters regard it as a central coming of age ritual that ensures chastity and promotes fertility Human rights groups denounce the procedure as barbaric It is estimated

that between 100 million and 130 million girls and women today have undergone forms of this genital surgery Female Circumcision gathers together African activists to examine the issue within its various cultural and historical contexts the debates on circumcision regarding African refugee and immigrant populations in the United States and the human rights efforts to eradicate the practice This work brings African women s voices into the discussion foregrounds indigenous processes of social and cultural change and demonstrates the manifold linkages between respect for women s bodily integrity the empowerment of women and democratic modes of economic development This volume does not focus narrowly on female circumcision as a set of ritualized surgeries sanctioned by society Instead the contributors explore a chain of connecting issues and processes through which the practice is being transformed in local and transnational contexts The authors document shifts in local views to highlight processes of change and chronicle the efforts of diverse communities as agents in the process of cultural and social transformation **Multicentered Feminism** MariaCaterina La Barbera,2009

**Philosophising Experiences and Vision of the Female Body, Mind, and Soul: Historical Context and Contemporary Theory** Musingafi, Maxwell Constantine Chando,Mafumbate, Racheal,Khumalo, Thandi Fredah,2021-04-23 Much of our understanding of the world our societies and ourselves rests on theories and knowledge generated predominantly by men of certain nationalities and economic classes This male dominated and culturally specific theorizing and knowledge have generally resulted in the exclusion of women and other groups from the process of formal theorizing and knowledge building Feminism argues that the male dominated knowledge represents a skewed perception of reality and is only partial knowledge Feminism is a generalized wide ranging system of ideas about social life and human experience developed from a woman centered perspective It treats women as the central subjects in the investigative process and seeks to see the world from the distinctive vantage points of women in the social world The best way to empower women and better the situation for women is to take women s daily experiences and their informal theorizing into account and on this basis adopt feminist approaches to building theory and knowledge Philosophising Experiences and Vision of the Female Body Mind and Soul Historical Context and Contemporary Theory provides an overview and introduction to the study of feminist theory and practice in the social sciences This book provides a starting point for further and more advanced study of the nexus of feminism gender and development and translates feminist theory and concepts into practice The chapters investigate in a historical context mainstream and contemporary theories of feminism and gender studies This book is ideal for post graduate students of social science researchers of development management business management public governance and gender and development activists feminists and practitioners stakeholders researchers academicians and students interested in feminist theory and knowledge building **Cuts and Criminality** Theodore Bennett,2016-03-09 This book investigates how and why the criminal law differentiates between different types of body alterations with particular reference to how they are conceptualised within legal discourse By drawing connections between types of body alteration that have traditionally been

considered separately and discretely the book allows analytical conclusions to be made about the law's treatment of the general category of body alteration rather than merely about specific types of body alteration Taking legal discourse as its analytical focus the author critically examines a number of case studies to determine the techniques and processes by which some body alterations are discursively constructed as legitimate and legally approved and by which other body alterations are discursively constructed as illegitimate and legally sanctioned Specifically the body alterations that are addressed include sadomasochistic injuries female genital modification and male circumcision cosmetic surgery body modification and healthy limb amputation and sex reassignment surgery and genital normalisation surgery International in scope the discursive analysis in the book will be of interest to academics and researchers working in the areas of socio legal and cultural studies

**Circumcision, Public Health, Genital Autonomy and Cultural Rights** Matthew Johnson, 2017-07-05 Circumcision is one of the oldest and most common surgical processes being practised for a range of medical social and religious reasons on up to 30% of males worldwide It is currently being promoted by a range of health bodies as a means of tackling HIV in developing countries Yet there is significant concern about sexual physiological and psychological effects and complications and its prophylactic effectiveness In examining a case in which a failed circumcision was performed for religious reasons the Regional Court in Cologne decided that the practice contravened the bodily autonomy of minors and was subject to the same legislation used to classify female genital cutting as assault This understandably aroused serious concerns among various religious communities who practise circumcision At the same time as religious groups seek to protect circumcision from comparisons with female genital cutting there is a trend particularly in post colonial thought in the US to revise negative understandings of female genital cutting by making cautious positive comparisons with circumcision This collection considers the apparent contradictions and complications of the contemporary status and deployment of the many forms of genital cutting raising a serious wide reaching question what scope should society have to impose physically invasive rites on people This book was originally published as a special issue of *Global Discourse*

**...And the Diamonds Were Taken...** O. Mark Eda, 2019-10-30 To cut is to humiliate for no particular reason but for the satisfaction of the few that seemed not to show human feelings for those being humiliated Allowing genital mutilation to be practiced in any part of the universe is to say that civilization that was fought for by our ancestors has no relevance in today s realism The human body should always be respected and kept whole especially for the fact that it is known biblically that we are created in the image of the Almighty God and should not be tampered with

under any condition or circumstance just to please the interests of certain class of people hiding behind the rhetoric of cultures and customs only in self realization of their personal satisfaction Nothing can compare to the way our children and women are being relegated to the punishment emanating from this inhuman gesture To continue allowing this treacherous ancient act being meted on humans in the 21st Century is to make irrelevant and a thing of mockery the entire purpose behind civilization
