## **Sexual Preference:**

Sexual Preference, Its Development in Men and Women Alan Paul Bell, Martin S. Weinberg, Sue Kiefer Hammersmith, 1981 An official publication of the Alfred C Kinsey Institute for Sex Research **Humanity and Human Sexuality: The Origin and Nature of Sexual Preference** Kevin Franklin, 2024-03-28 In *Humanity and Human Sexuality* The Origin and Nature of Sexual Preference Dr Kevin Franklin embarks on an extraordinary exploration of the human being of mind and their potential Delving deep into themes of confusion and disorder he unveils how a trickster mind can hinder an individual's true potential for life and freedom Drawing from his own profound experiences of childhood psychosis which once seemed to destine him for a life overshadowed by schizophrenia and the threat of early suicide Dr Franklin defies expectations This book ventures beyond traditional boundaries to examine the metaphysical aspects of psychological order offering a unique perspective on the often misunderstood concepts of societal and psychological disorders Dr Franklin's insights extend into a scientific demonstration of the innate origins and nature of both heterosexual and homosexual preferences *Humanity and Human Sexuality* The Origin and Nature of Sexual Preference illuminates various fields Philosophy Religion History Science Society and Psychology offering a revolutionary viewpoint on these disciplines It challenges long held beliefs and misconceptions particularly in the realms of sexual identity the gender and transgender discussion and the complex relationship between religion and science Structured in two parts the book first deconstructs the mythology of sexual identity before reconstructing a comprehensive understanding of human sexuality It seeks to resolve some of humanity's most pressing issues the lack of human compassion the intricacies of gender identity and the historical tensions between religious beliefs and scientific understanding This book is an essential read for anyone seeking a deeper understanding of the origins and nature of sexual preference and identity and the broader implications for society *Brain Development and Sexual Orientation* Jacques Balthazart, 2012-08-01 Sexual orientation homo vs heterosexuality is one of many sex differences observed in humans Sex differences can result from differential postnatal experiences interaction with parents environment or from biological factors hormones and genes acting pre or postnatally The first option is often favored to explain sexual orientation although it is supported by little experimental evidence In contrast many sexually differentiated behaviors are organized during early life by an irreversible action of sex steroids In particular the preference for a male or female sex partner is largely determined in rodents by embryonic exposure to sex steroids The early action of these steroids also seems to affect sexual orientation in humans Indeed clinical conditions associated with major endocrine changes during embryonic life often result in an increased incidence of homosexuality Furthermore multiple sexually differentiated behavioral physiological or even morphological traits that are known to be organized by prenatal steroids at least in animals are significantly different in homo and heterosexual populations Thus prenatal endocrine or genetic factors seem to influence significantly human sexual orientation even if a large fraction of the variance remains unexplained to date The possible

interaction between biological factors acting prenatally and postnatal social influences remains to be investigated

Explore the multifaceted dimensions of sociocultural influences and stigma surrounding non-normative sexual behaviors, shedding light on the complexities individuals face in navigating societal perceptions and acceptance. Delve into the neurobiological underpinnings, hormonal influences, and genetic predispositions shaping sexual orientation, offering a comprehensive view grounded in scientific understanding. Amidst the psychosocial determinants and co-occurring mental health conditions, discover the coping mechanisms and psychodynamic theories elucidating these intricate preferences, fostering a holistic comprehension of individual experiences.

*Sexuality and Identity* Leslie J. Moran, 2017-11-30 Born in the late nineteenth century, sexuality is a relatively new category within the human sciences. In general, and in law and society scholarship in particular, despite its novelty it is now a central category through which we understand ourselves both as individuals and as members of communities. This volume offers a collection of essays selected to reflect the ever-widening horizons and diverse methodologies of law and society scholarship on sexual and identity in law. The essays offer an insight into some of the key themes and recent developments in this body of work. Each, in different ways, offers an evaluation of the nature, meaning, and effects of sexuality, thereby providing a critical evaluation of the politics of sexual identity as it appears in and through the law.

*Paedophiles, Child Abuse and the Internet* Adrian Powell, 2007 Adrian Powell presents this practical handbook on the prevention of child sexual abuse for everyone who protects children professionally or in a family.

**Sexual Violence** Elizabeth L. Jeglic, Cynthia Calkins, 2016-10-24 The purpose of this edited volume is to examine the disconnect in the sexual violence prevention field between legislation, research, and practice. The work is focused primarily on United States policies and initiatives, with key case studies internationally. Contributions show that current policies are mainly based on repeat offenders, residence restrictions, registration, and notification statutes, and post-sentence initiatives. While these initiatives address public fears, they are not evidence-based and do not necessarily reduce offending. Research shows that post-sentence policies may destabilize offenders and limit their ability to reintegrate with society at a critical period, therefore increasing the chances of recidivism. Furthermore, the majority of sex crimes (95%) are committed by first-time offenders. This innovative book is divided into two parts, juxtaposing what is currently being done legislatively with what the research evidence suggests would be best.

**Contemporary Perspectives on Lesbian, Gay, and Bisexual Identities** Debra A. Hope, 2008-12-11 Debra A Hope The Nebraska Symposium on Motivation is steeped in history and tradition Over the years the series editors have striven to maintain the highest standards of academic excellence and to highlight some of the most important trends in psychology Perusing the chapter titles in the first 53 volumes shows the shifting emphasis as the science of psychology developed in the latter half of the twentieth century All of the most important topics are there drive theory social learning the cognitive revolution developing perspectives on understanding individual differences and the role of culture and the increasing role of neuroscience The key figures are there as well Harry Harlow Kenneth Spence Raymond Cattell George Kelly Albert Bandura Carl Rogers Carroll Izard Walter Mischel Sandra Bem Sandra Spence Herbert Simon David Barlow and many others In late 2004 I met with a group of interested graduate students and together we developed a proposal to join this long and proud tradition with a volume on sexual orientation Our motivation stemmed in part from the events around us The same sex marriage debate was covered extensively in the media reflecting a rapid and important discussion about sexual orientation that

we were having and are still having as a society Psychology and related fields have much to offer on many of the issues raised in this debate

**Sexual Medicine in Clinical Practice** Klaus M. Beier, Kurt K. Loewit, 2012-11-05 Call it a remnant of our Victorian past but sexual concerns lag behind other aspects of health both in the training of physicians and therapists and in the way they impart this knowledge to clients But as sexuality gains recognition as crucial to one's quality of life evidence based methods of understanding and discussing sex are imperative and not only in treating pathology Sexual Medicine in Clinical Practice provides framework rationale and strategies for both approaching sexual problems and addressing patients questions about sexual health behavior and relationships Analyzing sexuality along three dimensions attachment reproduction and desire this concise manual offers a biopsychosocial lifespan model readily translatable into clinical work This syndyastic framework integrates attachment and relational theory to reinforce the bond between intimacy and connectedness and models nonjudgmental approaches to disorders of sexual function maturity preference and behavior The authors salutogenic rather than pathogenic focus lets clients become major players in their own healing and the therapist or doctor serve as expert and guide Among the topics covered The communicative function of sexuality The spectrum of sexual disorders Principles of diagnostics in sexual medicine Disease centered versus client centered aspects of sexual therapy Therapeutic approaches for sexual traumatization New challenges including preventing child sexual abuse and online sex crime Plus case studies interdisciplinary references and ethical issues A timely perspective and practice altering volume Sexual Medicine in Clinical Practice is essential reading for family and primary care physicians family and sex therapists health psychologists and psychiatrists

**Psychology and Sexual Orientation** Janis S. Bohan,1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company **A New Perspective on Sexual Orientation** Brad Bowins,2023-06-28 We are all aware of sexual orientation and its influence on sexual behavior but the true nature of this complex occurrence is elusive Despite extensive investigations there is no clear answer as to what sexual orientation is Conjectures far outweigh proven fact Based on extensive experience counselling clients regarding sexual orientation issues such as discrimination and persecution it became apparent that common perspectives are inaccurate A major problem pertains to how theories of sexual orientation are generated without first establishing criteria for a robust theory Correcting this error twelve comprehensive criteria for a robust theory of sexual orientation are presented Major biological evolutionary and psychosocial perspectives are evaluated based on the theory criteria revealing weak performance With the goal of aligning clinical and research realities and guided by the twelve theory criteria a four component approach homoerotic and heteroerotic dimensions activation deactivation of these dimensions erotic fantasy and social construction that comprehensively define sexual orientation is proposed This proposition represents the first novel theory of sexual orientation in decades explaining many fascinating sexual orientation occurrences It is a must read for researchers scholars graduate undergraduate students and sexual orientation counsellors

**Conceiving Sexuality** Richard G. Parker,John H. Gagnon,2013-11-15 First Published in 1995 After widespread neglect over many years the study of human sexuality has recently come to the forefront of many of the most important debates in contemporary society and culture The continued development of feminist theory the emergence of gay and lesbian studies

and the impact of the international AIDS pandemic have combined to focus new attention on the ways in which gender and sexuality are shaped in different social and cultural settings and on the complex interactions between sexuality and health in the late twentieth century Edited by two of the leading figures in contemporary sex research *Conceiving Sexuality* brings together the contributions of writers from a wide range of social science disciplines and cultural traditions who are working at the cutting edge of contemporary sex research Focusing on key areas of concern such as gender power relations the formation of sexual identities the dynamics of sexual desire and the social construction of sexual risk the essays in *Conceiving Sexuality* provide an important overview of the most pressing topical and theoretical issues currently shaping debate in international and cross cultural research on sexuality

*Gay and Lesbian Identity* Richard R. Troidon, 1988 In the past twelve years research into homosexuality has undergone a major shift in emphasis A concern with documenting the etiology treatment and psychological adjustment of homosexuals has been replaced by an interest in understanding how people develop homosexual identities that is organized perceptions of themselves as homosexuals in relation to sexual and romantic settings People are not born with perceptions of themselves as homosexual bisexual or heterosexual Sexual identities evolve slowly over a long period of time This book develops an ideal typical model of homosexual identity formation that represents a synthesis of and elaboration on previous theorizing and research on the subject The model draws heavily upon accounts provided by homosexuals themselves The model developed is unique in four major ways it is grounded in current research and theory it describes identity formation in both lesbians and gay males it notes similarities as well as differences between the sexes in homosexual identity development and it explains differences between gay males and lesbians in terms of their experiences with gender role socialization This is the first book to differentiate analytically the constructs of self concept identity and homosexual identity within a unified theoretical framework With one major exception these conceptual distinctions have not been drawn in previous discussions of homosexual identity and this lack has contributed to conceptual disarray The theoretical approach adopted here is symbolic interactionism a social psychological perspective within the discipline of sociology There is a sharp disagreement among theorists about the nature and meaning of homosexual identities Do homosexuals identities represent a confusion of being with doing the mistaken belief that one is what one does the equation of the entire self with one type of behavior Do homosexual identities represent one of several major interests that are constructed socially and d
