**Women Traders in Cross-Cultural Perspective** Linda J. Seligmann, 2002-03-01 This innovative volume studies women as economic political and cultural mediators of space gender value and language in informal markets Drawing on diverse methodologies multisited fieldwork linguistic analysis and archival research the contributors demonstrate how women move between and knit together household and marketplace activities This knitting together pivots on how household practices and economies are translated and transferred to the market as well as how market practices and economic principles become integral to the nature and construction of the

household Exploring the cultural identities and economic practices of women traders in ten diverse locales Bolivia Ghana Hungary India Indonesia Mexico Morocco Nicaragua Peru and the Philippines the authors pay special attention to the effects of global forces national economic policies and nongovernmental organizations on women s participation in the market and the domestic sector The authors also consider the impact that women s economic and political activities in social movements public protests and more hidden kinds of subversive behavior have on state policy on the attitudes of different sectors of society toward female traders and on the dynamics of the market itself A final theme focuses on the cultural dimension of mediation Many women traders straddle cultural spheres and move back and forth between them Does this affect their participation in the market and their identities How do ties of ethnicity or acts of reciprocity affect the nature of commodity exchanges Do they create exchanges that are neither purely commodified nor wholly without calculation Or is it more often the case that ethnic commonalities and reciprocity merely mask the commodification of social and economic exchanges Does this straddling lead to the emergence of new kinds of hybrid identities and practices In considering these questions the authors specify the ways in which consumers contribute to identity formation among market women

**The Woman That Never Evolved** Sarah Blaffer Hrdy, 2009-07-01 What does it mean to be female Sarah Blaffer Hrdy a sociobiologist and a feminist believes that evolutionary biology can provide some surprising answers Surprising to those feminists who mistakenly think that biology can only work against women And surprising to those biologists who incorrectly believe that natural selection operates only on males In The Woman That Never Evolved we are introduced to our nearest female relatives competitive independent sexually assertive primates who have every bit as much at stake in the evolutionary game as their male counterparts do These females compete among themselves for rank and resources but will bond together for mutual defense They risk their lives to protect their young yet consort with the very male who murdered their offspring when successful reproduction depends upon it They tolerate other breeding females if food is plentiful but chase them away

when monogamy is the optimal strategy When promiscuity is an advantage female primates like their human cousins exhibit a sexual appetite that ensures a range of breeding partners From case after case we are led to the conclusion that the sexually passive noncompetitive all nurturing woman of prevailing myth never could have evolved within the primate order Yet males are almost universally dominant over females in primate species and Homo sapiens is no exception As we see from this book women are in some ways the most oppressed of all female primates Sarah Blaffer Hrdy is convinced that to redress sexual inequality in human societies we must first understand its evolutionary origins We cannot travel back in time to meet our own remote ancestors but we can study those surrogates we have the other living primates If women and not biology are to control their own destiny they must understand the past and as this book shows us the biological legacy they have inherited
