Cook, 1983 This work is a composite index of the complete runs of all mystery and detective fan magazines that have been published through 1981 Added to it are indexes of many magazines of related nature This includes magazines that are primarily oriented to boys book collecting the paperbacks and the pulp magazine hero characters since these all have a place in the mystery and detective genre

The Battle of the Sexes in Science Fiction Justine Larbalestier, 2023-09-05 Runner up for the Hugo Best Related Book Award 2003 The Battle of the Sexes in Science Fiction is a lively account of the role of women and feminism in the development of American science fiction during its formative years the mid 20th century Beginning in 1926 with the publication of the first issue of *Amazing Stories* Justine Larbalestier examines science fiction's engagement with questions of femininity masculinity sex and sexuality She traces the debates over the place of women and feminism in science fiction as it emerged in stories letters and articles in science fiction magazines and fanzines The book culminates in the story of James Tiptree Jr and the eponymous Award Tiptree was a successful science fiction writer of the 1970s who was later discovered to be a woman Tiptree's easy acceptance by the male dominated publishing arena of the time proved that there was no necessary difference in the way men and women wrote but that there was a real difference in the way they were read

Consciousness and Science Fiction Damien Broderick, 2018-11-30 Science fiction explores the wonderful baffling and wildly entertaining aspects of a universe unimaginably old and vast and with a future even more immense It reaches into that endless cosmos with the tools of rational investigation and storytelling At the core of both science and science fiction is the engaged human mind a consciousness that sees and feels and thinks and loves But what is this mind this aware and self aware consciousness that seems unlike anything else we experience What makes consciousness the Hard Problem of philosophy still unsolved after millennia of probing This book looks into the heart of this mystery at the science and philosophy of consciousness and at many inspiring fictional examples and finds strange challenging answers The book's content and entertaining style will appeal equally to science fiction enthusiasts and scholars including cognitive and neuroscientists as well as philosophers of mind It is a refreshing romp through the science and science fiction of consciousness

of Science Fiction with the emergence of magazines such as Galaxy Startling Stories and Fantastic as well as authors like Isaac Asimov Philip K Dick and Frank Herbert He then goes on to explore the bust years of 1954 1960 followed by the renaissance in the 1960s led by the new wave of British authors like Michael Moorcock and J G Ballard and the rise in interest of fantasy fiction encouraged by Lord of the Rings and the Conan books of Robert E Howard Transformations concludes with an examination of the new found interest in sf magazines during the late 1960s and the incredibly influential roles Star Trek the film 2001 A Space Odyssey and above all the first manned Moon landing played in transforming the sf magazine

Dangerous Visions and New Worlds Andrew Nette,Iain McIntyre,2021-10-26 Much has been written about the long Sixties the era of the late 1950s through the early 1970s It was a period of major social change most graphically illustrated by the emergence of liberatory and resistance movements focused on inequalities of class race gender sexuality and beyond whose challenge represented a major shock to the political and social status quo With its focus on speculation alternate worlds and the future science fiction became an ideal vessel for this upsurge of radical protest Dangerous Visions and New Worlds Radical Science Fiction 1950 to 1985 details celebrates and evaluates how science fiction novels and authors depicted interacted with and were inspired by these cultural and political movements in America and Great Britain It starts with progressive authors who rose to prominence in the conservative 1950s challenging the so called Golden Age of science fiction and its linear narratives of technological breakthroughs and space conquering male heroes The book then moves through the 1960s when writers including those in what has been termed the New Wave shattered existing writing conventions and incorporated contemporary themes such as modern mass media culture corporate control growing state surveillance the Vietnam War and rising currents of counterculture ecological awareness feminism sexual liberation and Black Power The 1970s when the genre reflected the end of various dreams of the long Sixties and the faltering of the postwar boom is also explored along with the first half of the 1980s which gave rise to new subgenres such as cyberpunk Dangerous Visions and New Worlds contains over twenty chapters written by contemporary authors and critics and hundreds of full color cover images including thirteen thematically organised cover selections New perspectives on key novels and authors such as Octavia Butler Ursula K Le Guin Philip K Dick John Wyndham Samuel Delany J G Ballard John Brunner Judith Merrill Barry Malzberg Joanna Russ and many others are presented alongside excavations of topics works and writers who have been largely forgotten or undeservedly ignored

The Science Fiction Century David G. Hartwell,1997-10-15 An anthology of forty six science fiction stories drawn from throughout one hundred years of the genre from its birth in the 1890s through the 1990s

Philip K Dick Christopher Palmer,2003-03-01 Once the sole possession of fans and buffs the SF author Philip K Dick is now finding a much wider audience as the success of the films Blade Runner and Minority Report shows The kind of world he predicted in his funny and frightening novels and stories is coming closer to most of us shifting realities unstable relations uncertain moralities Philip K Dick Exhilaration and Terror of the Postmodern examines a wide

range of Dick's work including his short stories and posthumously published realist novels Christopher Palmer analyses the puzzling and dazzling effects of Dick's fiction and argues that at its heart is a clash between exhilarating possibilities of transformation and a frightening lack of ethical certainties Dick's work is seen as the inscription of his own historical predicament the clash between humanism and postmodernism being played out in the complex forms of the fiction The problem is never resolved but Dick's ways of imagining it become steadily more ingenious and challenging *Judith Merrill* Dianne Newell, Victoria Lamont, 2014-01-10 Remembered as one of science fiction's best editors Judith Merrill 1923 1997 also wrote prolifically and stands as one of the genre's central figures in the United States and Canada This work offers a much needed literary biography and critical commentary on Merrill's groundbreaking science fiction anthologies reviews memoir and other endeavors A thorough account of Merrill's 50 year career it is a valuable source for students of science fiction women's life writing women's contributions to frontier mythology and women's activism [Library of Congress Catalog](#) United States, 1977 *Religion in Science Fiction* Steven Hrotic, 2014-07-31 Religion in Science Fiction investigates the history of the representations of religion in science fiction literature Space travel futuristic societies and non human cultures are traditional themes in science fiction Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature A more surprising theme may be a parallel exploration of religion its institutional nature social functions and the tensions between religious and scientific worldviews Steven Hrotic investigates the representations of religion in 19th century proto science fiction and genre science fiction from the 1920s through the end of the century Taken together he argues that these stories tell an overarching story a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion free future Science fiction's metanarrative represents more than simply a shift in popular perceptions of religion it also serves as a model for cognitive anthropology providing new insights into how groups and identities form in a globalized world and into how crucial a role narratives may play Ironically this same perspective suggests that science fiction as it was in the 20th century may no longer exist
