*European Yearbook of International Economic Law 2015* Christoph Herrmann,Markus Krajewski,Jörg Philipp Terhechte,2015-07-04 This sixth volume 2015 of the European Yearbook of International Economic Law puts a particular emphasis on non tariff barriers NTBs to trade and the world trade order With the steady reduction of tariff rates since the GATT 47 came into force focus in recent years has been on the vast and complex landscape of non tariff barriers to trade States as well as scholars seemingly struggle with the multitude of measures pooled under this expression as there is no single acknowledged definition of the term and its relation to the term non tariff measures remains equally blurred Particularly in practice and on a multilateral level there appears to be some awkwardness when it comes to coping with NTBs since multilateral trade rules seem to be in conflict with national regulatory autonomy in the pursuit of policy objectives In part one this volume sheds light on the problems of non tariff barriers to trade that arise in various fields Part two focuses on regional integration with an emphasis on relations between East Asia and the European Union In this regard the authors outline the trade and investment relations between the European Union and East Asia including Japan Korea and Singapore Part three offers an overview of recent institutional developments in WIPO ICSID WTO and WTO jurisprudence Part four includes book reviews of recent works in the field of international economic law and part five introduces a new section on publications in the field of international economic law that were released in 2013 and 2014

Singapore's rapid evolution from a modest trading post under colonial rule into a prosperous self confident nation is one of the notable success stories of the second half of the 20th century. International trade and investment linkages have been the cornerstones of the city state's economic success more than 7 per cent per annum during the period 1970-2005. This book offers an overview of the Singapore economy with emphasis on its global trade and investment linkages and policies. It analyzes patterns and policies of Singapore's trade and foreign direct investment (FDI) and discusses issues related to its services sector focusing on its multilateral and bilateral commitments. **The Singapore Economy** Tilak Abeysinghe, Keen Meng Choy, 2007-03-12

Singapore's phenomenal transformation from Third World to First World status has been of great interest to economists around the world yet there has been little quantitative research done on its economy and institutions. This innovative new research monograph fills the lacunae by presenting the Singapore economy through a macroeconometric model and laying the foundations for further research. Using formal econometric analysis and novel modelling techniques, Abeysinghe and Choy offer rare insights into how the Singapore economy works. Each of the major chapters discusses the implications of the empirical findings for current policy and an entire chapter has been devoted to macroeconomic policy simulations. This book is a unique introduction to the Singapore economy and would be of interest to econometric modellers and policy makers in Singapore as well as advanced undergraduates and graduate researchers interested in modelling small open economies.

**Leadership: Political-economic, Regional Business And Socio-community Contexts** Tai Wei Lim, 2020-03-20 Political leadership styles in East Asian states are shaped and influenced by a number of domestic factors. These factors include the type of political system that an East Asian state adopted from their days of independence and decolonization. There is a diverse array of political systems in the region ranging from Western style liberal democracies like Japan and South Korea to autocratic one party states like North Korea. Most other East Asian countries adopt systems somewhere in between these two polar ends. This volume begins with a macro political perspective of leadership. It then looks at case studies of political leadership and the factors that influence the shape and outcome of leadership styles in the region. The book also examines the concept of community leadership and its impact on community well being. Several specific case studies are examined in depth. While examining political leadership from a macro theoretical and empirical perspective, the book also adopts historical anthropological perspectives to analyse case studies. The case studies also examine policy formulation and implementation to look at the role of government in handling community level issues. Finally, the book focuses on economic leadership in international political economy and global business.
