Written Under the Skin Carli Coetzee, 2019 In this book the author argues that a younger generation of South Africans is developing important and innovative ways of understanding South African pasts and that challenge the narratives that have over the last decades been informed by notions of forgiveness and reconciliation The author uses the image of history rich blood to explore these approaches to intergenerational memory Blood under the skin is a carrier of embodied and gendered histories and using this image the chapters revisit older archives as well as analyse contemporary South African cultural and literary forms The emphasis on blood challenges the privileged status skin has had as explanatory category in thinking about identity and instead emphasises intergenerational transfer and continuity The argument is that a younger generation is disputing and debating the terms through which to understand contemporary South Africa as well as for interpreting the legacies of the past that remain under the visible layer of skin The chapters each concern blood Mandela s prison cell as laboratory for producing bloodless freedom the kinship relations created and resisted in accounts of Eugene de Kock in prison Ruth First s concern with information leaks in her accounts of her time in prison the first human to human heart transplant and its relation to racialised attempts to salvage white identity the Fallist moment Abantu book festival and activist scholarship and creative art works that use blood as trope for thinking about change and continuity Carli Coetzee is Editor of the Journal of African Cultural Studies Her publications include *Accented Futures* Language Activism and the Ending of Apartheid Wits University Press 2013 and the edited collection

Folkers, Belinda A. C. van Buiten, 2019-07-22 This book offers unique insights into modern African architecture influenced by modern European architecture and at the same time a natural successor to existing site specific and traditional architecture It brings together the worlds of traditional site specific architecture with the Modernist Project in Africa which to date have only been considered in isolation The book covers the four architectural disciplines urban planning building technology building physics and conservation It includes an introduction with a historical outline and an analysis and comparison of a number of projects in various countries in Africa On the basis of examples drawn from practice the author documents and describes the hybrid architectural forms that have emerged from the confrontation and fusion with pre modern Western architecture and urban planning and in so doing he also narrates the history of African architecture
