Shadow Of The Hunter Stories Of Eskimo Life:

Shadow of the Hunter Richard K. Nelson,1980-01-01 A collection of stories based upon the author s experiences in an Eskimo village of the Tareogmiut or people of the sea **The Shadow of the Hunter** Richard K. Nelson,1983 **Shadow**

of the Hunter Richard K. Nelson,1983-04-15 Follows a group of Eskimo hunters and their families through the cycle of an arctic year and looks at the different realms of the Eskimo world Historical Dictionary of the Inuit Pamela R.

Stern,2004-07-27 The approximately 150 000 Inuit are indigenous to four nations Denmark Greenland Canada the United States Alaska and Russia and thus have had very different colonial experiences and participate as citizens of those nations in different ways Far from being victims of colonialism Inuit are actively involved in shaping their social environments Nonetheless modern social and political realities present Inuit with many of the same issues faced by distinct peoples around the world This volume describes how Inuit as a single people citizens of separate nations and residents of individual communities deal with education language rights self government and self determination the militarization of their lands and their lives climate change and pollution and globalization This work presents an overview of the Inuit peoples of the Circumpolar North Unlike other works that focus on traditional Inuit cultures this work documents the social political and economic history of Inuit as part of a globalized world The work contains information on traditional Inuit cultures but special emphasis is placed on the recent history of Inuit communities More than 450 dictionary entries cover issues of society economy and politics influential educators and writers environmentalists and politicians and the many voluntary associations and governmental agencies that have played a role in Inuit history The introductory essay chronology and well developed bibliography make this an ideal reference source for the researcher or student *Subsistence Whaling* James M.

Savelle,Nobuhiro Kishigami,Gregory G. Monks,2025-06-28 This book examines the past history and contemporary status of subsistence whaling The papers derive from a symposium Aboriginal Whaling and Identity in the 21st Century held at the Eleventh Conference on Hunting and Gathering Societies in Vienna Austria in September 2015 Whales especially large baleen whales are the largest animals targeted by many societies prehistoric or modern and major facets of subsistence social structure and ideology are still deeply embedded in past and current whaling lifeways Yet there is probably no other environmental political issue that has attracted as much attention in the late 20th and early 21st century as whaling practices and policies Accordingly the papers address two major themes 1 the extent and characteristics of major prehistoric and early historic whaling activities and 2 case studies amongst modern whaling societies and how these societies are impacted by current political and economic realities and by the anti whaling movement **For Love of the World** Sherman Paul,1992 Along with poets philosophers and deep ecologists nature writers who may be something of all three address the world alienation of Western civilization By example as well as with words they teach us to turn from the self to the world from ego to ecos In these deeply felt meditative essays Sherman Paul contemplates the cosmological homecoming of nature writers

who show us how to reenter the world participate in it and recover respect for it In *For Love of the World* Sherman Paul considers Thoreau John Muir and Aldo Leopold major writers in the American tradition of nature writing Henry Beston and Loren Eiseley writers not yet so canonical and Richard Nelson and Barry Lopez our estimable contemporaries Paul's meditative mode follows the practice of naturalists who enter the field come into the open and relate their immediate experiences In the most primary and direct way his essays belong to our moment in history when nothing is more essential than our reattachment to earthly existence They will reawaken our love of the world the necessary eros of ecos and our wonder at and gratitude for being

Critical Norths Sarah Jaquette Ray, Kevin Maier, 2017-05-15 For millennia the North has held a powerful sway in Western culture Long seen through contradictions empty of life yet full of promise populated by indigenous communities yet ripe for conquest pristine yet marked by a long human history it has moved to the foreground of contemporary life as the most dramatic stage for the reality of climate change This book brings together scholars from a range of disciplines to ask key questions about the North and how we've conceived it and how conceiving of it in those terms has caused us to fail the region's human and nonhuman life Engaging questions of space place indigeneity identity nature the environment justice narrative history and more it offers a crucial starting point for an essential rethinking of both the idea and the reality of the North

The Meat Paradox Rob Percival, 2022-03-01 From a vital new voice in food ethics comes a smart nuanced investigation into the current meat debate Our future diet will be shaped by diverse forces It will be shaped by novel technologies by geopolitical tensions and the evolution of cultural preferences by shocks to the status quo pandemics and economic strife the escalation of the climate and ecological crises and by how we choose to respond It will also be shaped by our emotions It will be shaped by the meat paradox Should we eat animals was until recently a question reserved for moral philosophers and an ethically minded minority but it is now posed on restaurant menus and supermarket shelves on social media and morning television The recent surge in popularity for veganism in the UK Europe and North America has created a rupture in the rites and rituals of meat challenging the cultural narratives that sustain our omnivory In *The Meat Paradox* Rob Percival an expert in the politics of meat searches for the evolutionary origins of the meat paradox asking when our relationship with meat first became emotionally and ethically complicated Every society must eat and meat provides an important source of nutrients But every society is moved by its empathy We must all find a way of balancing competing and contradictory imperatives This new book is essential reading for anyone interested in the origins of our empathy the psychology of our dietary choices and anyone who has wondered whether they should or shouldn't eat meat

Raven's Witness Hank Lentfer, 2020-07-07 Banff Mountain Book Award Winner Grand Prize Banff Mountain Book Award Winner Mountain Literature A lovely tribute that illuminates what makes a life extraordinary High Country News Richard K Nelson was the host of the national public radio series *Encounters* Nelson was an anthropologist who lived with Alaska Native tribes and spoke both Inupiat and Koyukon Based on Nelson's journals and interviews with Gary Snyder Barry Lopez

Rick Bass and others He listened to his Native Alaskan teachers immersed himself in their landscapes as a naturalist and became without intending to a great teacher himself Barry Lopez from the foreword Before his death in 2019 cultural anthropologist author and radio producer Richard K Nelson s work focused primarily on the indigenous cultures of Alaska and more generally on the relationships between people and nature Nelson lived for extended periods in Athabaskan and Alaskan Eskimo villages experiences which inspired his earliest written works including *Hunters of the Northern Ice* In *Raven s Witness* Lentfer tells Nelson s story from his midwestern childhood to his first experiences with Native culture in Alaska through his own lifelong passion for the land where he so belonged Nelson was the author of the bestselling *The Island Within* and *Heart and Blood* The recipient of multiple honorary degrees and numerous literary awards he regularly packed auditoriums when he spoke His depth of experience allowed him to become an intermediary between worlds This is his story Find out more at www.ravenswitness.com and learn how you can help bring this story to life here *Cold Comfort*

Graham W. Rowley, 1996-06-11 Rowley documents an era of arctic exploration of which little has been written and which is fast passing from living memory He captures the traditional way of life in the North before the dramatic changes of the last half century A member of the last expedition in the Canadian North to depend on traditional techniques Rowley recounts how they lived as the Inuit did and travelled by dogsled over unexplored land He describes the isolation the extraordinary vicissitudes of travel in a sometimes savage environment and the generosity and kindness of the Inuit Apart from completing the map of Baffin Island s coastline and finding new islands Rowley excavated the first pure Dorset site near Igloolik establishing the Dorset culture beyond doubt The carvings and artifacts found there illustrations of which are included in this book remain among the best and most beautiful that have been recovered Based on his own diary and the diaries of other members of the expedition Rowley s captivating story presents the perceptions of a young man faced with a completely alien yet fascinating environment and culture A true and often exciting tale of discovery *Cold Comfort* will appeal to a wide audience as well as to those concerned with the Arctic in general It is an invaluable source for those who specialize in the archaeology anthropology geography and history of northern Canada **Northern Experience and the Myths of Canadian Culture**

Renée Hulan, 2002 In *Northern Experience and the Myths of Canadian Culture* Ren e Hulan disputes the notion that the north is a source of distinct collective identity for Canadians Through a synthesis of critical historical and theoretical approaches to northern subjects in literary studies she challenges the epistemology used to support this idea By investigating mutually dependent categories of identity in literature that depicts northern peoples and places Hulan provides a descriptive account of representative genres in which the north figures as a central theme including autobiography adventure narrative ethnography fiction poetry and travel writing She considers each of these diverse genres in terms of the way it explains the cultural identity of a nation formed from the settlement of immigrant peoples on the lands of dispossessed indigenous peoples Reading against the background of contemporary ethnographic literary and cultural theory Hulan

maintains that the collective Canadian identity idealized in many works representing the north does not occur naturally but is artificially constructed in terms of characteristics inflected by historically contingent ideas of gender and race such as self sufficiency independence and endurance and that these characteristics are evoked to justify the nationhood of the Canadian state

Geography of Climate Change Richard Aspinall, 2013-09-13 Climate change is one of the inescapable themes of current times Climate change confronts society in issues as diverse as domestic and international political debate and negotiation discussion in the media and public opinion land management choices and decisions and concerns about environmental social and economic priorities now and for the future Climate change also spans spatial temporal and organisational scales and has strong links with nature society relationships environmental dynamics and vulnerability Understanding the full range of possible consequences of climate change is essential for informed decision making and debate This book provides a collection of chapters that span environmental social and economic aspects of climate change Together the chapters provide a diverse and contrasting series that highlights the need to analyze review and debate climate change and its possible impacts and consequences from multiple perspectives The book also is intended to promote discussion and debate of a more integrated inclusive and open approach to climate change and demonstrates the value of geography in addressing climate change issues This book was originally published as a special issue of Annals of the Association of American Geographers

Nature and Culture Sarah Pilgrim, Jules N. Pretty, 2010-09-23 There is a growing recognition that the diversity of life comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity
