Shadows in the Sea Harold Weber McCormick, Thomas B. Allen, William Edward Young, 2012-09-01 Shadows in the Sea Thomas B. Allen, 1996 Shadows in the Sea Harold W. McCormick, 2017-08-08 Captain Young and I for some years have been gathering material from all over the world about the Selachians the Sharks Skates Rays and their allies of which there are more than 600 known species We originally intended merely to up date Captain Young s book *Shark Shark* published by Gotham House in 1934 and now a collector s item but as the material ever expanded it was decided that an entirely new book covering a much broader field was needed Adaterial was collected from all over the world for many years When Captain Young and I felt that the research was nearly completed we called upon Tom Allen an experienced newspaperman to aid us in transforming the research material into a book Tom and I continued the research up to and beyond the completion of the manuscript Tom also did further research and added new material in the course of writing the book In all scientific classifications the Selachians are separated clearly from the Teleosteans or Bony Fishes and there are even leading ichthyologists ho do not regard the former as fishes at all but rather as representing a separate and distinct Class of animal life Shadows in the Sea. The Sharks, Skates and Rays. Illustrated. [By] Harold W. McCormick and Tom Allen with Captain William E. Young Harold Weber MACCORMICK, Thomas Benton ALLEN, William Edward YOUNG, 1964

Shadows in the Sea Harold Weber McCormick, Thomas Benton Allen, 1963 *Sharks, Skates, Rays, and Chimaeras* John Richard Thompson, Stewart Springer, 1965 **Biomechanics of Feeding in Vertebrates** V.L. Bels, M. Chardon, P. Vandewalle, 2012-12-06 Although feeding is not yet been thoroughly studied in many vertebrates taxa and different conceptual and methodological approaches of the concerned scientists make a synthesis difficult the aim of the editors is to provide a comprehensive overview of the feeding design in aquatic and terrestrial vertebrates with a detailed description of its functional properties The book emphasizes the constant interaction between function and form behaviour and morphology in the course of evolution of the feeding apparatus and way of feeding both complementary and basically related to survival interspecific competition adaptation to environmental changes and adaptive radiations Special stress is drawn on quantification of the observational and experimental data on the morphology and biomechanics of the feeding design and its element jaws teeth hyoid apparatus tongue in order to allow present and further comparisons in an evolutionary perspective *Reef Sharks and Rays of the World* Scott W. Michael, 2006 *The Devil's Teeth* Susan Casey, 2006-05-30 Presents the author s first hand account of her stay on the Farallon Islands in the shark infested waters thirty miles west of San Francisco and includes information on the sharks behavior and scientists who study them **Sharks, Sawfish, Skates, and Rays of the Carolinas** Frank Joseph Schwartz, 1984 **Functional Properties Of Bio-inspired Surfaces: Characterization And Technological Applications** Eduardo A Favret, Nestor O Fuentes, 2009-12-28 Many good books have been written recently on this new field called biomimetics or bionics but few exploring simultaneously the

characterization and technological processes to produce man made surfaces with similar properties as the biological ones Bio inspired surface structures offer significant commercial potential for the creation of antireflective self cleaning and drag reducing surfaces as well as new types of adhesive systems This review volume explores how the current knowledge of the biological structures occurring on the surface of moth eyes leaves sharkskin and the feet of reptiles can be transferred to functional technological materials It analyses how such surfaces can be described and characterized using microscopic techniques and thus reproduced It also encompasses the important areas of current surface replication techniques and the associated acquisition of good master structures The book is divided in three sections an introduction of the skin functions and four functional properties of biological surfaces physical chemical and microscopy techniques for describing and characterizing the surfaces and replication techniques for modifying non natural surfaces **Gateway to the Sea** ,1981

Demon Fish Juliet Eilperin,2011-06-14 A group of traders huddles around a pile of dried shark fins on a gleaming white floor in Hong Kong A Papua New Guinean elder shoves off in his hand carved canoe ready to summon a shark with ancient magic A scientist finds a rare shark in Indonesia and forges a deal with villagers so it and other species can survive In this eye opening adventure that spans the globe Juliet Eilperin investigates the fascinating ways different individuals and cultures relate to the ocean s top predator Along the way she reminds us why after millions of years sharks remain among nature s most awe inspiring creatures From Belize to South Africa from Shanghai to Bimini we see that sharks are still the object of an obsession that may eventually lead to their extinction This is why movie stars and professional athletes go shark hunting in Miami and why shark s fin soup remains a coveted status symbol in China Yet we also see glimpses of how people and sharks can exist alongside one another surfers tolerating their presence off Cape Town and ecotourists swimming with sharks that locals in the Yucatán no longer have to hunt With a reporter s instinct for a good story and a scientist s curiosity Eilperin offers us an up close understanding of these extraordinary mysterious creatures in the most entertaining and illuminating shark encounter you re likely to find outside a steel cage **Sharks and People** Thomas P.

Peschak,2014-02-27 At once feared and revered sharks have captivated people since our earliest human encounters Children and adults alike stand awed before aquarium shark tanks fascinated by the giant teeth and unnerving eyes And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real and very cinematic dangers of shark bites But our interactions with sharks are not entirely one sided the threats we pose to sharks through fisheries organized hunts and gill nets on coastlines are more deadly and far reaching than any bite In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe A contributing photographer to National Geographic Peschak is best known for his unusual photographs of sharks his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world The other images gathered here are no less riveting bringing us as close as possible to sharks in

the wild Alongside the photographs *Sharks and People* tells the compelling story of the natural history of sharks Sharks have roamed the oceans for more than four hundred million years and in this time they have never stopped adapting to the ever changing world their unique cartilage skeletons and array of super senses mark them as one of the most evolved groups of animals Scientists have recently discovered that sharks play an important role in balancing the ocean including maintaining the health of coral reefs Yet tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone Today more than sixty species of sharks including hammerhead mako and oceanic white tip sharks are listed as vulnerable or in danger of extinction The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks They are certain to enthrall and inspire

The Real Jaws Rachel Lee Perez, 2025-08-30 Explores the 1916 New Jersey shark attacks their impact on shark fear and how media shaped harmful misconceptions In the Summer of 1916 a series of shark attacks along the New Jersey shore would send shockwaves across its otherwise peaceful beach towns Spanning a terrifying two weeks including the deaths of nearly five people these attacks would officially cement an innate fear of sharks that humans have felt since the beginning of time Although initially kept under wraps by the tourism industry these attacks would ultimately plaster the front pages of newspapers across the United States and even overseas As the news spread the line between fact and fiction blurred reshaping our cultural and scientific understanding of the beasts of the ocean It was the 1916 shark attacks that would establish our modern day misconstrued perception of sharks as evil man eating monsters and would later inspire the film *Jaws* which would perpetuate the same harmful narrative *The Real Jaws* takes an in depth look at each one of the attacks and how they instilled a centuries long fear of the ocean's apex predator It explores the various theories explaining why these attacks may have occurred and the probability of something like this happening again And finally it analyses the way the harmful misconceptions derived from films like *Jaws* have redefined humanity's relationship with sharks leading humans to become the predators and sharks to become the prey

Shark Dean Crawford, 2008-08-01 A sleek hunter of the seas the shark has struck fear into the hearts of men since the days of the first fishermen Dean Crawford now explores here the long relationship between shark and man revealing that behind the fearsome caricature is a complex animal that deserves a thoughtful reconsideration With a lineage stretching back over 100 million years the shark has evolved into 350 different species from the great white to the pike bearing goblin to the tiny cookie cutter Crawford compiles here a fascinating narrative that analyzes how and why the animal looms large in our cultural psyche While sharks have played a prominent part in religion and mythology they are more commonly perceived as deadly predators in such films as *Jaws* and *Dr No* or as symbols of natural violence as in Hemingway's *Islands in the Stream* *Shark* ultimately argues however that our ill informed emotional responses spurred by such representations have encouraged the wholesale slaughter of sharks and our ignorance endangers the very existence of the shark today Both a celebration of their lethal beauty and plea for their conservation
