Shadows Unlocking Their Secrets From Plato To Our Time:

Shadows Roberto Casati, 2004-08-10 In this original wide ranging and endlessly thought provoking work of popular nonfiction a leading science writer uncovers the pervasive presence of shadows in our world For Plato shadows were the symbol of our limitations For Galileo they knocked the Earth from the center of the cosmos They are a source of fear and a symbol of ignorance and they loom large in art and design mythology and folklore physics and metaphysics and architecture and urban planning From shadows puppets and the psychology of shadows to the role of shadows in astronomy and the influence of shadows on the architectural profiles of our cities Roberto Casati awakens our fascination in this tour de force of investigation and imagination *Shadows* Roberto Casati, 2007-12-18 In this original wide ranging and endlessly thought

What s in a shadow Menace seduction or salvation Immaterial but profound shadows lurk everywhere in literature and the visual arts signifying everything from the treachery of appearances to the unfathomable power of God From Plato to Picasso from Rembrandt to Welles and Warhol from Lord of the Rings to the latest video game shadows act as central players in the drama of Western culture Yet because they work silently artistic shadows often slip unnoticed past audiences and critics Conceived as an accessible introduction to this elusive phenomenon *Grasping Shadows* is the first book that offers a general theory of how all shadows function in texts and visual media Arguing that shadow images take shape within a common cultural field where visual and verbal meanings overlap William Sharpe ranges widely among classic and modern works revealing the key motifs that link apparently disparate works such as those by Fra Angelico and James Joyce Clementina Hawarden and Kara Walker Charles Dickens and Kumi Yamashita Showing how real world shadows have shaped the meanings of shadow imagery *Grasping Shadows* guides the reader through the techniques used by writers and artists to represent shadows from the Renaissance onward The last chapter traces how shadows impact the art of the modern city from Renoir and Zola to film noir and projection systems that capture the shadows of passers by on streets around the globe Extending his analysis to contemporary street art popular songs billboards and shadow theatre Sharpe demonstrates a practical way to grasp the dark side that looms all around us *Talent Development and Excellence* Heidrun

Stoeger, Abdullah Aljughaiman, Bettina Harder, 2012 Research on talent development and gifted education has made enormous strides over the past decades Yet much of the actual talent development and gifted education work being done

fails to live up to the field's promise. This book highlights recent theoretical approaches and discusses empirical research conclusions which have yet to receive the attention they deserve. It also considers possibilities for harnessing these insights for current talent development and gifted education efforts. Shadow-Makers Stephen Kite, 2017-10-19 The making of shadows is an act as old as architecture itself. From the gloom of the medieval hearth through to the masterworks of modernism shadows have been an essential yet neglected presence in architectural history. *Shadow Makers* tells for the first time the history of shadows in architecture. It weaves together a rich narrative combining close readings of significant buildings both ancient and modern with architectural theory and art history to reveal the key places and moments where shadows shaped architecture in distinctive and dynamic ways. It shows how shadows are used as an architectural instrument of form composition and visual effect while also exploring the deeper cultural context tracing differing conceptions of their meaning and symbolism whether as places of refuge devotion terror occult practice sublime experience or as metaphors of the unconscious. Within a chronological framework encompassing medieval baroque enlightenment sublime picturesque and modernist movements a wide range of topics are explored from Hawksmoor's London churches Japanese temple complexes and the shade patterns of Islamic cities to Ruskin in Venice and Aldo Rossi and Louis Kahn in the 20th century. This beautifully illustrated study seeks to understand the work of these shadow makers through their drawings their writings and through the masterpieces they built.

Shadows of Being Marko Uršič, 2019-01-15 This book is a study of the phenomena of shadows meant in a broader sense as symbolic forms. The shadow is a less real surface replica of some more real form. From the Platonic point of view empirical objects are shadows of ideas while from the modern natural point of view shadows are seen and conceived primarily as weaker replicas of bodies which give evidence of their material reality. In the first three essays here several topics from the Ancient Egypt and Greece to modern arts and sciences are considered while in the fourth essay the contemporary virtual reality cyber technology and the internet as our parallel shadow world are discussed from the philosophical point of view. The main and innovative point of this book is the connection between the meaning of shadows in philosophy and art on the one hand and their role in modern science and technology on the other. The book will appeal to a wide span of readers from academic circles students and artists to the general reader interested in the humanities especially in philosophy and art.

Lighting Dance Flaviana Xavier Antunes Sampaio, 2020-10-15 *Lighting Dance* pioneers the discussion of the ability of lighting design to foreground shadow in dance performances. Through a series of experiments integrating light shadow and improvised dance movement it highlights and analyses what it advances as an innovative expression of shadow in dance as an alternative to more conventional approaches to lighting design. Different art forms such as painting film and dance pieces from Loie Fuller the Russell Maliphant Dance Company Elevenplay Pilobolus and the Tao Dance Theater served to inspire and contextualise the study. From lighting to psychology from reviews to academic books

shadows are examined as a symbolic and manipulative entity The book also presents the dance solo Sombreiro which was created to echo the experiments with light shadow and movement aligned to an interpretation of cultural shadow Jung 1954 in Samuels Shorter and Plaut 1986 Casement 2006 Ramos 2004 Stein 2004 and others The historical development of lighting within dance practices is also outlined providing a valuable resource for lighting designers dance practitioners and theatre goers interested in the visuality of dance performances

Surfaces and Essences Douglas R Hofstadter, Emmanuel Sander, 2013-04-23 Analogy is the core of all thinking This is the simple but unorthodox premise that Pulitzer Prize winning author Douglas Hofstadter and French psychologist Emmanuel Sander defend in their new work Hofstadter has been grappling with the mysteries of human thought for over thirty years Now with his trademark wit and special talent for making complex ideas vivid he has partnered with Sander to put forth a highly novel perspective on cognition We are constantly faced with a swirling and intermingling multitude of ill defined situations Our brain's job is to try to make sense of this unpredictable swarming chaos of stimuli How does it do so The ceaseless hail of input triggers analogies galore helping us to pinpoint the essence of what is going on Often this means the spontaneous evocation of words sometimes idioms sometimes the triggering of nameless long buried memories Why did two year old Camille proudly exclaim I undressed the banana Why do people who hear a story often blurt out Exactly the same thing happened to me when it was a completely different event How do we recognize an aggressive driver from a split second glance in our rearview mirror What in a friend's remark triggers the offhand reply That's just sour grapes What did Albert Einstein see that made him suspect that light consists of particles when a century of research had driven the final nail in the coffin of that long dead idea The answer to all these questions of course is analogy making the meat and potatoes the heart and soul the fuel and fire the gist and the crux the lifeblood and the wellsprings of thought Analogy making far from happening at rare intervals occurs at all moments defining thinking from top to toe from the tiniest and most fleeting thoughts to the most creative scientific insights Like G Escher Bach before it *Surfaces and Essences* will profoundly enrich our understanding of our own minds By plunging the reader into an extraordinary variety of colorful situations involving language thought and memory by revealing bit by bit the constantly churning cognitive mechanisms normally completely hidden from view and by discovering in them one central invariant core the incessant unconscious quest for strong analogical links to past experiences this book puts forth a radical and deeply surprising new vision of the act of thinking

Darkness, Depression, and Descent in Anglo-Saxon England Ruth Wehlau, 2019-05-20 This collection of essays examines the motifs of darkness depression and descent in both literal and figurative manifestations within a variety of Anglo Saxon texts including the Old English Consolation of Philosophy Beowulf Guthlac The Junius Manuscript The Wonders of the East and The Battle of Maldon Essays deal with such topics as cosmic emptiness descent into the grave and recurrent grief In their analyses the essays reveal the breadth of this imagery in Anglo Saxon literature as it is used to describe thought and emotion as well as the limits to knowledge and perception The volume

investigates the intersection between the burgeoning interest in trauma studies and darkness and the representation of the mind or of emotional experience within Anglo Saxon literature

Puppet and Spirit: Ritual, Religion, and Performing Objects Claudia Orenstein, Tim Cusack, 2024-10-17 This anthology of essays a companion to Puppet and Spirit Ritual Religion and Performing Objects Volume I aims to explore the many types of relationships that exist between puppets broadly speaking and the immaterial world The allure of the puppet goes beyond its material presence as historically and throughout the globe many uses of puppets and related objects have expressed and capitalized on their posited connections to other realms or ability to serve as vessels or conduits for immaterial presence The flip side of the puppet's troubling uncanniness is precisely the possibilities it represents for connecting to discarnate realities Where do we see such connections in contemporary artistic work in various mediums How do puppets open avenues for discussion in a world that seems to be increasingly polarized around religious values How do we describe analyze and theorize the present moment What new questions do puppets address for our times and how does the puppet's continued entanglement with these concerns trouble or comfort us The essays in this book from scholars and practitioners provide a range of useful models and critical vocabularies for addressing this aspect of puppet performance further expanding the growing understanding and appreciation of puppetry generally This book along with its companion volume offers for the first time robust coverage of this subject from a diversity of voices examples and perspectives

If You Have Never Thought Gray Peter Sloterdijk, 2025-08-20 You're not a painter if you haven't painted gray declared Paul Cézanne The same could be said of philosophers you're not a philosopher if you have never thought gray This simple four letter word signifies much more than a quasi neutral color lying between black and white we use the same word to describe moods November skies the hair of the elderly the withered features of faces dusty shelves faceless bureaucracies dreary politicians and hundreds of other things This plain unassuming word conceals a multitude of thoughts that we seldom pause to consider In this exceptionally original book Peter Sloterdijk follows the grey thread through the history of philosophy art literature and politics enabling us to see familiar things in new ways and highlighting features of our lives that would otherwise remain unseen Beginning with Plato's allegory of the cave which introduced the concept of gray into thought Sloterdijk unfolds a chiaroscuro narrative which recognizes the power of grey as a metaphor for the indefinite the indifferent the ordinary the intermediate and the neutralizing We see the invention of photography and monochrome's journey through modern art from Malevich's Black Square to Richter's grey panel paintings in a new light and we see modern states and modern politics as full of grey zones from the hidden spheres of the security services to the extraterritorial spaces that harbor illegal activities like money laundering and the drug trade A work of brilliance by one of the most creative philosophers writing today If You Have Never Thought Gray will appeal to a wide readership interested in philosophy art and politics and to students and academics in philosophy visual arts and the humanities generally
