Shakespeare Science A Study Of Shake:

Shakespeare and Shakespeariana Meisei Daigaku. Toshokan,1980 *Shakespeare, Rhetoric and Cognition* Raphael Lyne,2011-09-01 Raphael Lyne addresses a crucial Shakespearean question why do characters in the grip of emotional crises deliver such extraordinarily beautiful and ambitious speeches How do they manage to be so inventive when they are perplexed Their dense complex articulate speeches at intensely dramatic moments are often seen as psychological they uncover and investigate inwardness character and motivation and as rhetorical they involve heightened language deploying recognisable techniques Focusing on *A Midsummer Night's Dream* *Othello* *Cymbeline* and the Sonnets Lyne explores both the psychological and rhetorical elements of Shakespeare's language In the light of cognitive linguistics and cognitive literary theory he shows how Renaissance rhetoric could be considered a kind of cognitive science an attempt to map out the patterns of thinking His study reveals how Shakespeare's metaphors and similes work to think interpret and resolve and how their struggle to do so results in extraordinary poetry *Harold Bloom's Shakespeare* C. Desmet,Robert Sawyer,2016-09-23 Harold Bloom's *Shakespeare* examines the sources and impact of Bloom's Shakespearean criticism Through focused and sustained study of this writer and his best selling book this collection of essays addresses a wide range of issues pertinent to both general readers and university classes the cultural role of Shakespeare and of a new secular humanism addressed to general readers and audiences the author as literary origin the persistence of character as a category of literary appreciation and the influence of Shakespeare within the Anglo American educational system Together the essays reflect on the ethics of literary theory and criticism [Shakespeare Studies](#) Leeds Barroll,Susan Zimmerman,2002-11 *Shakespeare Studies* is an international volume published every year in hardcover containing more than three hundred pages of essays and studies by critics from both hemispheres **Catalogue of the Public Lending Library** Victoria. Shakespeare and Science Tom Rutter,2024-08-24 As a figurehead for the literary humanities and a dramatist whose plays feature fairies ghosts and spirits Shakespeare may not be the first author that comes to mind when thinking about science Tom Rutter shows however that in his plays and poetry Shakespeare made detailed use of the knowledge and theories of the cosmos the natural world and human biology that were available to him These range from astronomical and anatomical ideas derived from medieval scholars Islamic philosophers and ancient Greek and Roman authorities through to the challenges issued to those earlier models by more recent figures such as Copernicus and Vesalius Shakespeare's treatment of these materials was informed by the poetic and dramatic media in which he worked the dialogic nature of drama enabled an approach that could be provisional exploratory and tolerant of uncertainty and contradiction Shakespeare made the early modern playhouse a venue for the production of scientific understanding through performance illusion and the creative use of space As well as surveying current scholarship that contextualizes Shakespeare's work in relation to histories of meteorology matter theory humoral physiology racialization mathematics and more *Shakespeare and Science* offers

detailed original readings of a variety of texts including the Histories Hamlet Antony and Cleopatra Othello King Lear The Tempest the Sonnets and Lucrece It also makes extensive reference to works by Shakespeare s near contemporaries such as Robert Recorde William Fulke Juan Huarte and Thomas Elyot Its four chapters focus on astronomy and meteorology matter the body and mathematics Rutter s overall approach is informed by recent studies that interrogate science as a concept and that question both the boundary between literature and science and the idea of a seventeenth century scientific revolution

argues that the academy has devoted more effort to analyzing theory and method than to analyzing its own texts Professional texts need further attention because they not only create but are also shaped by the knowledge that is special to each discipline Her assumption is that knowledge making is the distinctive activity of the academy at the professional level for that reason it is important to examine differences in the ways the professional texts of subdisciplinary communities focus on and consolidate knowledge within their fields Throughout the book MacDonald stresses her conviction that academics need to do a better job of explaining their text making axioms clarifying their expectations of students at all levels and monitoring their own professional practices MacDonald s proposals for both textual and sentence level analysis will help academic professionals better understand how they might improve communication within their professional communities and with their students

The Variant Issues of Shakespeare's Second Folio and Milton's First Published English Poem Robert Metcalf Smith,1928 **The New Cambridge Bibliography of English Literature: Volume 1, 600-1660** George Watson,Ian Roy Willison,1974-08-29 More than fifty specialists have contributed to this new edition of volume 1 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries
