Luftwaffenhelfer Und Drittes Reich:

Adenauer's Germany and the Nazi Past Norbert Frei, 2002-08-27 Of all the aspects of recovery in postwar Germany perhaps none was as critical or as complicated as the matter of dealing with Nazi criminals and more broadly with the Nazi past While on the international stage German officials spoke with contrition of their nation's burden of guilt at home questions of responsibility and retribution were not so clear In this masterful examination of Germany under Adenauer Norbert Frei shows that beginning in 1949 the West German government dramatically reversed the denazification policies of the immediate postwar period and initiated a new *Vergangenheitspolitik* or policy for the past which has had enormous consequences reaching into the present Adenauer's Germany and the Nazi Past chronicles how amnesty laws for Nazi officials were passed unanimously and civil servants who had been dismissed in 1945 were reinstated liberally and how a massive popular outcry led to the release of war criminals who had been condemned by the Allies These measures and movements represented more than just the rehabilitation of particular individuals Frei argues that the amnesty process delegitimized the previous political expurgation administered by the Allies and on a deeper level served to satisfy the collective psychic needs of a society longing for a clean break with the unparalleled political and moral catastrophe it had undergone in the 1940s Thus the era of Adenauer devolved into a scandal-ridden period of reintegration at any cost Frei's work brilliantly and chillingly explores how the collective will of the German people expressed through mass allegiance to new consensus-oriented democratic parties cast off responsibility for the horrors of the war and Holocaust effectively silencing engagement with the enormities of the Nazi past *The Arts in Nazi Germany* Jonathan Huener, Francis R. Nicosia, 2007-09 Culture and the arts played a central role in the ideology and propaganda of National Socialism from the early years of the movement until the last months of the Third Reich in 1945 This volume's essays explore these and other aspects of the arts and cultural life under National Socialism Cover **War and German Memory** K. Michael Prince, 2009-01-01 Germans often claim that we have learned the lessons of our history But what precisely are the lessons they have drawn from their Nazi era past What experiences from that time continue to hold significant meaning for Germans today and how have those experiences shaped postwar German cultural identity Though Germans have come to recognize the evils of Nazism for them its primary evil derived from the war it unleashed and the hardships death and destruction that the war wrought on the Germans themselves and less from the losses and suffering it caused others Recent public discussion about the Allied bombing campaign against Germany the expulsion of Germans from Eastern Europe and other German experiences during and following the Second World War have revealed what some see as an emerging tendency among Germans to perceive themselves as much the victims of wartime acts as other peoples Through a survey of postwar literature film and other popular media as well as public commemorations and other means of memorializing and discussing the past K. Michael Prince demonstrates that the theme of German suffering has been an abiding and even overriding element of

postwar German historical memory and a chief component of German cultural identity While academics have focused their attention on Nazism atrocity and genocide and while Germany's official ceremonies and other acts of public memory have been similarly directed it was the wartime sufferings of average Germans that have remained at the core of German historical consciousness influencing their attitudes toward war in general and shaping Germany's role in world affairs

Germany and the Second World War Volume IX/II Jörg Echternkamp, 2014-03 Volume IX II of this series draws on a range of historical sources to explore the effect that the Second World War had on the people of Germany whether they were practically involved in the war effort or struggling to maintain a normal existence Germany and the Second World War, 1990 This is the second in the comprehensive ten volume Germany and the Second World War The five volumes so far published in German take the story to the end of 1941 and have achieved international acclaim as a major contribution to historical study Under the auspices of the Militärgeschichtliches Forschungsamt Research Institute for Military History a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War This volume surveys the first year of the war deliberately begun by Nazi Germany The authors examine the train of interconnected political and military events and set military operations against the background of Hitler's war policy and general aims both immediate and long term The authors show that the conflict took a course quite different from that which Hitler had intended but nevertheless resulted in a series of conquests for the Third Reich Dissonant Lives Mary Fulbrook, 2011-06-09 Examines ways in which Germans of different generations lived through the violent eruptions and rapid regime changes of the 20th century revealing striking generational patterns The Racial State Michael Burleigh, Wolfgang Ippermann, 1991-11-07 This book deals with the ideas and institutions which underpinned the Nazi regime's attempt to restructure a class society along racial lines Education and Fascism Heinz Sunkel, Hans Uwe Otto, 2013-10-18 This text sets out to challenge the reader by posing the question can we learn from history More particularly can we learn from social history and the effects on people living today after National Socialism the German form of fascism Of crucial significance the authors show how social education in all areas of national socialist society operated and how it functioned in terms of an interest in political formation and social discipline What is clear is an attempt at complete social control an unceasing incorporation of the whole lives of all people At the centre of all these practices stood a process that was meant to lead to a particular formation of identity and ideology The success of National Socialism in achieving its objectives must today cause us to investigate the relationship between identity and formation political culture and pedagogic activity Germany and the Second World War Ralf Blank, Jörg Echternkamp, Karola Fings, Jürgen Förster, Winfried Heinemann, Tobias Jersak, Armin Nolzen, Christoph Rass, 2008-07-03 The Second World War affected the lives and shaped the experience of millions of individuals in Germany soldiers at the front women children and the elderly sheltering in cellars slave labourers toiling in factories and concentration camp prisoners and POWs clearing rubble in the

Reich's devastated cities Taking a history from below approach the volume examines how the minds and behaviour of individuals were moulded by the Party as the Reich took the road to Total War The ever increasing numbers of German workers conscripted into the Wehrmacht were replaced with forced foreign workers and slave labourers and concentration camp prisoners The interaction in everyday life between German civilian society and these coerced groups is explored as is that society's relationship to the Holocaust From early 1943 the war on the home front was increasingly dominated by attack from the air The role of the Party administration police and courts in providing for the vast numbers of those rendered homeless in bolstering civilian morale with miracle weapons propaganda and in maintaining order in a society in disintegration is reviewed in detail For society in uniform the war in the east was one of ideology and annihilation with intensified indoctrination of the troops after Stalingrad The social profile of this army is analysed through study of a typical infantry division The volume concludes with an account of the various forms of resistance to Hitler's regime in society and the military culminating in the failed attempt on his life in July 1944

Growing Up in Hitler's Shadow Kimberly A. Redding, 2004-07-30 Drawing on oral narratives and archival sources gathered in Berlin this study explores how some 35 Berliners have woven personal memories their city's divided past and their nation's complex historical legacy into cohesive life narratives and collective identities Redding argues that daily experience during the final years of World War II inadvertently prepared German youth for defeat and occupation While postwar officials lamented youth's apparent apathy young Berliners were in fact applying lessons in pragmatism and self reliance learned as National Socialist society crumbled in 1944 and 1945 Although competing political forces strove to rapidly remobilize German youth young Berliners took advantage of destabilized sociopolitical structures in their war torn city to assert autonomy and pursue personal initiatives Their retrospective narratives reveal creative efforts to claim for themselves the normal pleasures of modern youth in the midst of rubble These accounts also demonstrate how Cold War ideologies and loyalties have informed memories of daily life in Allied occupied Berlin In a broader sense the study sheds new light on the collective experiences memories and self perceptions of a generation of Germans who grew up in a world defined by World War II and Allied occupation rebuilt their devastated society under Cold War parameters and eventually negotiated the unification of the two successor states
