Ice Klaus Dodds,2018-06-15 In *Ice* Klaus Dodds provides a wide ranging exploration of the cultural natural and geopolitical history of this most slippery of subjects Beyond Earth ice has been found on other planets moons and meteors and scientists even think that ice rich asteroids played a pivotal role in bringing water to our blue home But our outlook need

not be cosmic to see ice's importance. Here today and gone tomorrow in many parts of the temperate world ice is a perennial feature of polar and mountainous regions where it has long shaped human culture. But as climates change ice caps and glaciers melt and waters rise more than ever this frozen force touches at the core of who we are. As Dodds reveals ice has played a prominent role in shaping both the earth's living communities and its geology. Throughout history humans have had fun with it, battled over it, struggled with it, and made money from it, and every time we open our refrigerator doors we are reminded how ice has transformed our relationship with food. Our connection to ice has been captured in art, literature, movies, and television as well as made manifest in sport and leisure. In our landscapes and seascapes too we find myriad reminders of ice's chilly power, clues as to how our lakes, mountains, and coastlines have been indelibly shaped by the advance and retreat of ice and snow. Beautifully illustrated throughout, *Ice* is an informative, thought-provoking guide to a substance both cold and compelling. **Proceedings - Alaska Science Conference**, 1962 **Sea Ice** David N. Thomas, 2025-08-25

New edition of the leading resource on the Arctic and Southern Oceans with contributions from the world's experts on sea ice. *Sea Ice* delivers insights into the very latest understanding of sea ice dynamics, how we measure and model its extent, the ecosystems that depend on sea ice, and the effect of climate change on its distribution. The book also discusses how sea ice influences the oceanography of underlying waters and the influence that sea ice has on the world's climate. This newly revised and updated Fourth Edition looks at ice-based food webs and the impact on global geopolitics as well as changes in human activity in the Arctic. Written by a team of more than 80 of the world's leading experts from 13 countries, *Sea Ice* includes information on sea ice thickness distribution and snow and surface processes on sea ice. The short-term and long-term dynamics of Arctic versus Antarctic sea ice. Current methods of satellite remote sensing of sea ice. The ecology of sea ice from microbes to mammals to marine birds. The cycling of contaminants across the ocean-sea ice-atmosphere interface. In its new edition, *Sea Ice* remains the leading multidisciplinary resource on the subject for all policy makers, researchers, and students with an interest in the polar regions and their role in the world's oceanic systems. *The Mining Congress Journal*, 1916 [The Arctic Großraum](#) Christopher R. Rossi, 2025-09-04

How should the Arctic be viewed in the 21st century? In this book a leading commentator assesses the competing players for the Arctic, looking at broad questions of governance and security. The author challenges the view that the Arctic is a passive space which is the focus of competitive advances from superpowers, arguing that it is more correctly understood as a dynamic pluriverse. Drawing on international law, international relations, and diplomacy, this is an important re-assessment of the Arctic and its position in geopolitics. **Journal of the American Pharmaceutical Association** American Pharmaceutical Association, 1926 **Nature and Identity in Cross-Cultural Perspective** Anne Buttner, L. Wallin, 1999-07-31

Nature and Identity in Cross-Cultural Perspective presents 20 essays which explore diverse cultural interpretations of the earth's surface. Contrasted with each other and with the potentially cosmopolitan culture of science, these detailed studies of ways in which different cultures conceptualise nature

appear in the context of global environmental change Understanding across cultural lines has never been more important This book shows how individual cultures see their own histories as offering protection for nature while often viewing others as lacking such ethical restraints Through such writing a discourse of understanding and common action becomes possible The authors come from the places they discuss and offer passionate as well as scholarly visions of nature within their cultural homes Audience This volume is of interest to academics and professionals working in the fields of cultural geography environmental history environmental studies history of environmental ideas environmental education landscape and literature nature and culture It can be used for courses in the above mentioned areas and seminars in comparative literature It can also be used as a complimentary text to provide cultural context to literary readings and for seminars on cultural aspects of the environment

China in the Indian Ocean Region—India's Security Challenges (Reprint, 2024) Sidda Goud, 2023-03-21 Indian Ocean third largest Ocean in the world surpasses the Atlantic and Pacific Oceans Being world's most populated Region one third of the world's bulk cargo and two thirds of world's oil ship tankers passes through the Indian Ocean China's interests in the Indian Ocean Region can be traced and backed by early 60's Ever since Beijing has been increasingly deepening its presence in the Indian Ocean Region for a variety of reasons such as oil trade and security etc Over 30 per cent of China's seaborne trade worth about 300 billion transits across Indian Ocean Region Sharing a quarter of the world's population China facing ever increasing demand for energy China has little choice but to look beyond its borders for its energy requirements Around 77 percent of its oil imports are sourced from West Asia and Africa and these are transporting through the Indian Ocean via Malacca Strait Thus China's dependency on Indian Ocean Region continues to grow for energy imports from gulf and to import resources from Africa and trade with Europe With China steadily spreading its footprints in the IOR with increasing military presence and with rapidly growing its navy being equipped with warships destroyers and nuclear submarines through a strategy called String of Pearls which can encircle India in its convenient time in the near future So China has been emerging as biggest threat for India by analyzing its actions in the Indian Ocean Region and along with India China border from Easter Ladakh to Arunachal Pradesh as stand off continues since June 2020
