Thomas K. Rudel

M L Wilson And The Campaign For The Domestic Allotment:

M. L. Wilson and the Campaign for the Domestic Allotment William D. Rowley, 1970 **M. L. Wilson and the Campaign for the Domestic Allotment** William D. Rowley, 1970 **Power and Progress on the Prairie** Thomas Biolsi, 2018-05-22 A critical exploration of how modernity and progress were imposed on the people and land of rural South Dakota The Rosebud Country comprising four counties in rural South Dakota was first established as the Rosebud Indian Reservation in 1889 to settle the Sicangu Lakota During the first two decades of the twentieth century white homesteaders arrived in the area and became the majority population Today the population of Rosebud Country is nearly evenly divided between Indians and whites In *Power and Progress on the Prairie* Thomas Biolsi traces how a variety of governmental actors including public officials bureaucrats and experts in civil society invented and applied ideas about modernity and progress to the people and the land Through a series of case studies programs to settle surplus Indian lands to civilize the Indians to modernize white farmers to find strategic sites for nuclear missile silos and to extend voting rights to Lakota people Biolsi examines how these various problems came into focus for government experts and how remedies were devised and implemented Drawing on theories of governmentality derived from Michel Foucault Biolsi challenges the idea that the problems identified by state agents and the solutions they implemented were inevitable or rational Rather through fine grained analysis of the impact of these programs on both the Lakota and white residents he reveals that their underlying logic was too often arbitrary and devastating

Urban Farming in the West Robert M. Carriker, 2010-04-15 From 1933 to 1935 the federal government's Division of Subsistence Homesteads created thirty four New Deal communities that sought to provide a healthier and more economically secure life for disadvantaged Americans These settlements were designed to combine the benefits of rural and urban living by offering part time farming uplifting social functions and inexpensive homes Four were located in the West in Phoenix Arizona El Monte and San Fernando California and Longview Washington Robert Carriker examines for the first time the intricate histories of these subsistence homestead projects which have long been buried in bureaucratic records and clouded by misunderstanding showing that in many ways they were among the agency's most successful efforts He provides case studies of the projects rescuing their obscure histories using archival documents and rare photographs He also reveals the machinations of civic groups and private citizens across the West who jockeyed for access to the funds being allotted for New Deal community building By describing what took place on these western homesteads Carriker shows that the DSH's agenda was not as far fetched as some have reported The tendency to condemn the Division and its projects he argues has failed to appreciate the good that came from some of the individual homestead communities particularly those in the Far West Although overshadowed by the larger undertakings of the New Deal some of these western communities remain thriving neighborhoods living legacies to FDR's efforts that show how the country once chose to deal with economic hardship Too often the DSH is noted for its failures Carriker's study shows that its western

homesteads were instead qualified accomplishments

The Republican Party in the Age of Roosevelt Elliot A. Rosen, 2014-02-21 Elliot Rosen's Hoover Roosevelt and the Brains Trust focused on the transition from the Hoover administration to that of Roosevelt and the formulation of the early New Deal program Roosevelt the Great Depression and the Economics of Recovery emphasized long term and structural recovery programs as well as the 1937-38 recession Rosen's final book in the trilogy *The Republican Party in the Age of Roosevelt* situates distrust of the federal government and the consequent transformation of the party Domestic and foreign policies introduced by the Roosevelt administration created division between the parties The Hoover doctrine which sought to restrict the reach of independent agencies at the federal level in order to restore business confidence and investment intended to reverse the New Deal and to curb the growth of federal functions In his new book Elliot Rosen holds that economic thought regarding appropriate functions of the federal government has not changed since the Great Depression The political debate is still being waged between advocates for direct intervention at the federal level and those for the Hoover ethic with its stress on individual responsibility The question remains whether preservation of an unfettered marketplace and our liberties remain inseparable or whether enlarged governmental functions are required in an increasingly complex national and global environment By offering a well researched account of the antistatist and nationalist origins not only of the debate over legitimate federal functions but also of the modern Republican Party this book affords insight into such contemporary political movements as the Tea Party

State Autonomy Or Class Dominance? G. William Domhoff, In his new book G William Domhoff provides the most thorough critique to date of state autonomy theory as it has been applied to the American federal government The view under attack holds that the federal government rather than the banks and corporations wields greater power in the United States Utilizing new arguments and new archival findings this book challenges every case study that state autonomy theorists have done on the Progressive Era the New Deal and World War II Domhoff then concludes with an analysis of why the theory received so much attention In addition to demonstrating the weaknesses of state autonomy theory in the case of the U S the book presents a step by step statement of the author's non Marxian class dominance theory defining each concept clearly and suggesting the kind of evidence necessary to support it The chapters on the origins of the Social Security Act 1935 and on the role of corporations in the industrial mobilization for World War II lead to general statements on the factors that limit the effectiveness of liberal and labor political forces in America the chapter on the Progressive Era contains an analysis of why the corporate community has been more powerful in the United States than in Europe Although it is part of a continuing debate with other experts the author has marshaled his argument in a style that is always accessible As a result the book is ideal for use in courses in which the instructor wants to compare and contrast original presentations of rival viewpoints by major proponents of the debated theories

Shocks, States, and Sustainability Thomas K. Rudel, 2019 For the past two decades scientists have urged us to abandon fossil fuels as rapidly as possible and pursue a

range of other environmental reforms to avert the many crises climate change will bring The reforms have not occurred at the expected rate and their absence raises questions about when they might occur In *Shocks States and Sustainability* Thomas K Rudel addresses this question He outlines a theory of environmental revolutions and when they will likely occur through a comparison of radical environmental reforms throughout the 20th century By looking at farmers in the American Dust Bowl land use planners in post war England small farmers in post Soviet Cuba and lobster fishers along the coast of Maine Rudel emphasizes how sudden focusing events can spur radical reforms by providing a fresh realization about the scarcity of natural resources *Shocks States and Sustainability* explains how earth shaking events like droughts depressions and wars can provide the foundations necessary for the pursuit of global sustainability

Agrarianism and the Good Society Eric T. Freyfogle, 2007-03-02 Every society expresses its fundamental values and hopes in the ways it inhabits its landscapes In this literate and wide ranging exploration Eric T Freyfogle raises difficult questions about America's core values while illuminating the social origins of urban sprawl dwindling wildlife habitats and over engineered rivers These and other land use crises he contends arise mostly because of cultural attitudes that made sense on the American frontier but now threaten the land's ecological fabric To support and sustain healthy communities profound adjustments will be required Freyfogle's search leads him down unusual paths He probes Charles Frazier's novel *Cold Mountain* for insights on the healing power of nature and tests the wisdom in Wendell Berry's fiction He challenges journalists writing about environmental issues to get beyond well worn rhetoric and explain the true choices that Americans face In an imaginary job advertisement he issues a call for a national environmental leader identifying the skills and knowledge required taking note of cultural obstacles and looking critically at supposed allies Examining recent federal elections he largely blames the conservation cause and its inattention to cultural issues for the diminished status of the environment as a decisive issue *Agrarianism and the Good Society* identifies the social historical political and cultural obstacles to humans harmony with nature and advocates a new orientation one that begins with healthy land and that better reflects our utter dependence on it In all *Agrarianism and the Good Society* offers a critical yet hopeful guide for cultural change essential for anyone interested in the benefits and creative possibilities of responsible land use

Hoptopia Peter A. Kopp, 2016-09-06 *Hoptopia* argues that the current revolution in craft beer is the product of a complex global history that converged in the hop fields of Oregon's Willamette Valley What spawned from an ideal environment and the ability of regional farmers to grow the crop rapidly transformed into something far greater because Oregon farmers depended on the importation of rootstock knowledge technology and goods not only from Europe and the Eastern United States but also from Asia Latin America and Australasia They also relied upon a seasonal labor supply of people from all of these areas as a supplement to local Euroamerican and indigenous communities to harvest their crops In turn Oregon hop farmers reciprocated in exchanges of plants and ideas with growers and scientists around the world and of course sent their cured hops into the global marketplace These global

exchanges occurred not only during Oregon's golden era of hop growing in the late nineteenth and early twentieth centuries but through to the present in the midst of the craft beer revival. The title of this book, Hoptopia, is a nod to Portland's title of Beervana and the Willamette Valley's claim as an agricultural Eden from the mid nineteenth century onward. But the story is fundamentally about how seemingly niche agricultural regions do not exist and have never existed independently of the flow of people, ideas, goods, and biology from other parts of the world. To define Hoptopia is to define the Willamette Valley's hop and beer industries as the culmination of all of this local and global history. With the hop itself as a central character, this book aims to connect twenty-first century consumers to agricultural lands and histories that have been forgotten in an era of industrial food production. Provided by publisher

FDR: The First Hundred Days Anthony J. Badger, 2009-06-09. The Hundred Days, FDR's first 15 weeks in office, was a time of unprecedented governmental activity in America. In this account, Anthony J. Badger reinterprets the period as an exercise in exceptional political craftsmanship.
