Alexander the Great John Sadler, Rosie Serdiville, 2020-01-10 An overview of Alexander's life from his early military exploits to the creation of his empire and the legacy left after his premature death Alexander was perhaps the greatest conquering general in history In a dozen years Alexander took the whole of Asia Minor and Egypt destroyed the once mighty Persian Empire and pushed his army eastwards as far as the Indus No one in history has equaled his achievement Much of Alexander's success can be traced to the Macedonian phalanx a close ordered battle formation of sarissa wielding infantry that proved itself a war winning weapon The army Alexander inherited from his father was the most powerful in Greece highly disciplined trained and loyal only to the king United in a single purpose they fought as one Cavalry was also of crucial importance in the Macedonian army as the driving force to attack the flanks of the enemy in battle A talented commander able to anticipate how his opponent would think Alexander understood how to commit his forces to devastating effect and was never defeated in battle He also developed a corps of engineers that utilized catapults and siege towers against enemy fortifications Alexander led from the front fighting with his men eating with them refusing water when there was not enough and his men would quite literally follow him to the ends of the known world None of his successors were able to hold together the empire he had forged Although he died an early death his fame and glory persist to this day

Xydopoulos, Kostas Vlassopoulos, Eleni Tounta, 2017-04-21 Violence and community were intimately linked in the ancient world While various aspects of violence have been long studied on their own warfare revolution murder theft piracy there has been little effort so far to study violence as a unified field and explore its role in community formation This volume aims to construct such an agenda by exploring the historiography of the study of violence in antiquity and highlighting a number of important paradoxes of ancient violence It explores the forceful nexus between wealth power and the passions by focusing on three major aspects that link violence and community the attempts of communities to regulate and canalise violence through law the constitutive role of violence in communal identities and the ways in which communities dealt with violence in regards to private and public space landscapes and territories The contributions to this volume range widely in both time and space temporally they cover the full span from the archaic to the Roman imperial period while spatially they extend from Athens and Sparta through Crete Arcadia and Macedonia to Egypt and Israel
