from his practical experience With the Treaty of Lisbon which entered into force on 1 December 2009 the EU de facto became a state territory stretching from Portugal to Finland and from Ireland to Cyprus The European Parliament became an equal status decision maker alongside the Council of the European Union Council The previous co decision procedure was elevated to become the standard procedure ordinary legislative procedure The so called qualified majority 55 percent of the EU member states which simultaneously represent at least 65 percent of the EU population was introduced for all important areas in the Council As a result the outcome of decision making processes has become largely incalculable for the actors on the European Union stage the EU member states EU regions companies associations and organisations The second edition includes a new chapter in which Prof Klemens Joos makes the variables of successful interest representation even more tangible on the basis of his scientific formula at the latest since the Treaty of Lisbon the basic prerequisite for successful interest representation in the EU involves the continuous and close intermeshing of the affected party's content competence of the four classic instruments of interest representation corporate representative offices associations public affairs agencies law firms with process structure competence i.e. the EU wide maintenance of the required spatial personnel and organisational capacities as well as strong networks across institutions political groups and member states on the part of an independent intermediary The likelihood of success can be increased exponentially if success is achieved firstly in committing to the concern of an affected party through a change of perspective such that the positive effects on the common good are shifted into the foreground for the decision makers in the EU perspective change competence and secondly in successfully integrating the concern into the crucial decision making processes at the political level and continuously supporting it process support competence Guest authors This work includes guest contributions from Prof Christian Blumelhuber Berlin University of the Arts Prof Anton Meyer formerly LMU Munich Prof Armin Nassehi LMU Munich and Prof Franz Waldenberger Director of the German Institute of Japanese Studies Tokyo as well as a foreword by Prof Gunther Friedl Dean of the TUM School of Management and a preface by Prof Thomas F Hofmann President of TU Munich

Corporate Europe David Cronin, 2013-08-12 During the chaos of the eurozone crisis few mainstream commentators have stopped to question the purpose of the European Union itself and whose interests it serves Corporate

Europe goes beyond the divisions between nation states focusing instead on the division between the corporate elite and the peoples of Europe David Cronin spent a year investigating the privileged access that big business enjoys in Brussels In this book he reveals how the EU s policies on health climate change armaments and food safety have been tailored to please an unaccountable elite Making extensive use of previously unpublished documents he explores how ideologically blinkered lobbyists have seized on the financial crisis of recent years to entrench the casino capitalism that caused the crisis in the first place What emerges is a powerful expos of how vested interests in the EU have manipulated opportunities to introduce ideologically driven reforms *Diplomacy and lobbying during Turkey's Europeanisation* Bilge Firat,2019-09-26 This book presents intricate backstage negotiations of interests and compromises between diplomats and lobbyists through the corridors of power which drove Turkey both closer to and farther apart from the EU **From Legislators to the End-User** Manfred Fuchs,2011-04-02 The Construction Products Directive 89 106 EEC CPD should have facilitated putting construction products on any national market within the European Economic Area Two decades later its practical impact is still relatively weak By going beyond the scope of most studies on the implementation of EU legislation at the level of the practical end users architects civil engineers construction companies this study highlights the fact that the acceptance of this professional group not only plays a major role in the practical implementation of this directive but could also change strengthen or neutralise the intentions of policy makers and administrators at the EU and national level The book is valuable reading for practical users of the CPD researchers in political administrative sciences and professionals working in international institutions and organizations
