Transition Metals in Supramolecular Chemistry L. Fabbrizzi, Antonio Poggi, 2013-03-09 Since the pioneering publications on coordination chemistry by Lehn and Pedersen in the late 1960s coupled with the more orthodox interest from the transition metal chemists on template reactions Busch 1964 the field of supramolecular chemistry has grown at an astonishing rate The use of transition metals as essential constituents of multi component assemblies has been especially sharp in recent years since the metals are prone to quick and reversible redox changes and there is a wide variety of metal ligand interactions Such properties make supramolecular complexes of transition metal ions suitable candidates for exploration as light energy converters and signal processors Transition Metals in Supramolecular Chemistry focuses on the following main topics 1 metal controlled organization of novel molecular assemblies and shapes 2 design of molecular switches and devices operating through metal centres 3 supramolecular catalysts that mimic metalloenzymes 4 metal containing sensory reagents and supramolecular recognition and 5 molecular materials that display powerful electronic optoelectronic and magnetic properties

Sulfur Chemistry Xuefeng Jiang, 2019-08-28 The series Topics in Current Chemistry Collections presents critical reviews from the journal Topics in Current Chemistry organized in topical volumes The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology medicine and materials science The goal of each thematic volume is to give the non specialist reader whether in academia or industry a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole The most significant developments of the last 5 to 10

years are presented using selected examples to illustrate the principles discussed The coverage is not intended to be an exhaustive summary of the field or include large quantities of data but should rather be conceptual concentrating on the methodological thinking that will allow the non specialist reader to understand the information presented Contributions also offer an outlook on potential future developments in the field
