Who is the Scientist-Subject? Esha Shah, 2018-05-20 This book explores two disparate sets of debates in the history and philosophy of the life sciences the history of subjectivity in shaping objective science and the history of dominance of reductionism in molecular biology It questions the dominant conception of the scientist subject as a neo Kantian ideal self that is the scientist as a unified and wilful self determined self regulated active and autonomous rational subject wilfully driven by social and scientific ethos in favour of a narrative that shows how the microcosm of reductionism is sustained adopted questioned or challenged in the creative struggles of the scientist subject The author covers a century long history of the concept of the gene as a series of pioneering moments through an engagement with life writings of eminent scientists to show how their ways of being and belonging relate with the making of the science The scientist self is theorized as fundamentally a feeling experiencing and suffering subject split between the conscious and unconscious and constitutive of personality aspects that are emotional psychological situated cultural and ideological metaphysical intersubjective and existential at the same time An engaging interdisciplinary interpretation of the dominance of reductionism in genetic science this book will be of major interest to scholars and researchers of science history and philosophy alike

Science but Not Scientists Vernon L. Grose, 2006-10-18 The historic Science Textbook Struggle a worldwide battle about the origin of the universe life and man erupted without warning It caught the scientific illuminati completely by surprise Why Because science textbooks had become filled with wild unbelievable stories about the beginning of everything And those tales were simply not scientific The universe starting with a Big Bang life arising out of a soup of lifeless amino acids humans produced by apes those myths had only replaced ancient Greek mythology and were being

passed off as scientific truths Caught in the crossfire between educators news media textbook publishers religious notables and world renowned scientists including nineteen Nobel laureates was a private citizen Father of six schoolchildren he had only one goal to prove that science never will have answers for origins He was up against the arrogance of scientists who were determined to disguise their private beliefs as being the only explanations for the origin of the universe life and man This story concludes with a great victory for objectivity with more than 200 changes being made in textbooks over the objections of the National Academy of Sciences All discussion about origins was transformed by admission that stories about them are based solely on personal views of individual scientists Remarkably 3 000 scientists around the world later signed an affirmation to assure that this issue of belief over fact in science never be repeated Wernher von Braun father of Americas space program writes in the Foreword Vernon Grose in tracing out in Science But Not Scientists his personal involvement in the vortex of these two forces illustrates one more time the humanity of scientists their likelihood of being just as prejudiced and bigoted as anyone untrained in science He properly calls for objectivity rather than scientific consensus He rightly urges that message rather than messenger should be scrutinized and tested for validity Science will be the richer and humanity the ultimate beneficiary by heeding this clarion call [Bulletin of the Atomic Scientists](#) ,1963-11 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Bulletin of the Atomic Scientists* ,1959-02 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world [The Art of Being a Scientist](#) Roel Snieder,Ken Lerner,2009-07-23 This is a hands on guide for graduate students and young researchers wishing to perfect the practical skills needed for a successful research career By teaching junior scientists to develop effective research habits the book helps to make the experience of graduate study a more efficient and rewarding one The authors have taught a graduate course on the topics covered for many years and provide a sample curriculum for instructors in graduate schools wanting to teach a similar course Topics covered include choosing a research topic department and advisor making workplans the ethics of research using scientific literature perfecting oral and written communication publishing papers writing proposals managing time effectively and planning a scientific career and applying for jobs in research and industry The wealth of advice is invaluable to students junior researchers and mentors in all fields of science engineering and the humanities The authors have taught a graduate course on the topics covered for many years and provide a sample curriculum for instructors in graduate schools wanting to teach a similar course The sample curriculum is available in the book as Appendix B and as an online resource Bill R. The Scientist's Conversations with the Teacher Alexander Zelitchenko, 2001-08-23 The world is bigger than it seems Besides the world of things which is the coarsest there are more subtle worlds Just like the world of things the subtle worlds are material each one is formed by material of a particular subtlety Each part of the World is a triad Idea incarnated by a thing Thing Being that realizes the idea and makes the thing Triads form the World Hierarchy of ideas things beings Any triad develops What is subtle develops into what is coarse while what is coarse develops into what is subtle Each being works together with other beings Being has instruments bodies for working with materials of varying subtlety Man has three bodies a spiritual one a mental one and a physical one Man's task is to realize special human ideas This process culminates when one comes to spiritual awareness The development of man is a development of spiritual awareness Man needs to purify himself from time to time from the by products of the realization of ideas This purification is death Death turns man into another being but it does not stop development Man's fate provides him with the best conditions for working and developing

Bulletin of the Atomic Scientists, 1981-01 Paradigm Shift Roy

Peacock, 2013-10-01 Science and faith hang in the balance for one atheistically Inclined scientist until his life is turned around by events he can only categorize as miraculous which launches him into a powerful Christian ministry alongside his professional work A personal memoir of events that have shaped the life of a practical scientist The book tells a story and along the way explores the synthesis Roy Peacock found after he came to faith in Christ Testing the claims of the Bible in the same way he would any other truth claims he finds that God acts as dramatically and speaks as clearly today as he did in Bible times People are healed spiritually and physically as Roy learns to trust God increasingly in every area of his life
