More Than Fine Writing The Life And Calligraphy Of Irene Wellington:

More Than Fine Writing Heather Child, 1987 *More Than Fine Writing* is one of the most important books on calligraphy to be published in recent times Focusing on the life and art of Irene Wellington considered one of the truly original figures in the development of calligraphy in our century it also provides a history of calligraphy s development into the vibrant and dynamic art form it is today The four contributors to this volume themselves noted calligraphers help to tell the story of Wellington s life and work illustrate her methods and techniques assess her legacy and place it in the context of twentieth century calligraphy Their work makes this an essential resource for any present or future calligraphers **More Than Fine**

Writing ,1998 *More Than Fine Writing* Heather Child,1998-09-01 *More Than Fine Writing* University of Bath. Crafts Study Centre,1986 **The Juggler of Notre Dame and the Medievalizing of Modernity** Jan M. Ziolkowski,2018-12-12

This ambitious and vivid study in six volumes explores the journey of a single electrifying story from its first incarnation in a medieval French poem through its prolific rebirth in the nineteenth and twentieth centuries *The Juggler of Notre Dame* tells how an entertainer abandons the world to join a monastery but is suspected of blasphemy after dancing his devotion before a statue of the Madonna in the crypt he is saved when the statue delighted by his skill miraculously comes to life Jan Ziolkowski tracks the poem from its medieval roots to its rediscovery in late nineteenth century Paris before its translation into English in Britain and the United States The visual influence of the tale on Gothic revivalism and vice versa in America is carefully documented with lavish and inventive illustrations and Ziolkowski concludes with an examination of the explosion of interest in *The Juggler of Notre Dame* in the twentieth century and its place in mass culture today In this concluding volume Ziolkowski explores the popularity of *The Juggler of Notre Dame* from the 1930s through the Second World War especially in the Allied Resistance Its popularity in the United States was subsequently maintained by figures as diverse as Tony Curtis and W H Auden and although recently the story and medievalism have lost ground the future of both holds promise Presented with great clarity and simplicity Ziolkowski s work is accessible to the general reader while its many new discoveries will be valuable to academics in such fields and disciplines as medieval studies medievalism philology literary history art history folklore performance studies and reception studies *The Economics of Attention* Richard A.

Lanham,2006-04-21 If economics is about the allocation of resources then what is the most precious resource in our new information economy Certainly not information for we are drowning in it No what we are short of is the attention to make sense of that information With all the verve and erudition that have established his earlier books as classics Richard A Lanham here traces our epochal move from an economy of things and objects to an economy of attention According to Lanham the central commodity in our new age of information is not stuff but style for style is what competes for our attention amidst the din and deluge of new media In such a world intellectual property will become more central to the economy than real property while the arts and letters will grow to be more crucial than engineering the physical sciences and indeed

economics as conventionally practiced For Lanham the arts and letters are the disciplines that study how human attention is allocated and how cultural capital is created and traded In an economy of attention style and substance change places The new attention economy therefore will anoint a new set of moguls in the business world not the CEOs or fund managers of yesteryear but new masters of attention with a grounding in the humanities and liberal arts Lanham's *The Electronic Word* was one of the earliest and most influential books on new electronic culture *The Economics of Attention* builds on the best insights of that seminal book to map the new frontier that information technologies have created **Calligraphy Review**, 1992

Literacy and the Politics of Writing Albertine Gaur, 2000-01-01 With the growth of modern information technology it is time to re-examine the concept and purpose of writing and question the long cherished idea that the alphabet stands at the apex of a hierarchy towards which all proper forms of writing must necessarily progress This book shows that the primary purpose of writing is the ability to store and transmit information essential to the social economical and political survival of a particular group Writing in whatever form allows the individual to interact with the group to acquire an amount of knowledge that far outweighs the scope of memory oral traditions and to be free to manipulate this knowledge and arrive at new conclusion Providing a quick and easy entrance to information related to the subject the volume contains a network of references leading the reader towards further information and most entries are listed with bibliographical notes

The Golden Thread Ewan Clayton, 2015-01-20 From the simple representative shapes used to record transactions of goods and services in ancient Mesopotamia to the sophisticated typographical resources available to the twenty first century users of desktop computers the story of writing is the story of human civilization itself Calligraphy expert Ewan Clayton traces the history of an invention which ever since our ancestors made the transition from a nomadic to an agrarian way of life in the eighth century BC has been the method of codification and dissemination of ideas in every field of human endeavour and a motor of cultural scientific and political progress He explores the social and cultural impact of among other stages the invention of the alphabet the replacement of the papyrus scroll with the codex in the late Roman period the perfecting of printing using moveable type in the fifteenth century and the ensuing spread of literacy the industrialization of printing during the Industrial Revolution the impact of artistic Modernism on the written word in the early twentieth century and of the digital switchover at the century's close The Golden Thread also raises issues of urgent interest for a society living in an era of unprecedented change to the tools and technologies of written communication Chief among these is the fundamental question What does it mean to be literate in the early twenty first century The book belongs on the bookshelves of anyone who is inquisitive not just about the centrality of writing in the history of humanity but also about its future it is sure to appeal to lovers of language books and cultural history

More Than Fine Writing Child, Mrs, Heather Child, 1989-06-13 *Art Direction* , 1987 **Letter Arts Review** , 2003 **Edward Johnston** Peter Holliday, 2007 Edward Johnston 1872 1944 was a man of letters mastercalligrapher typeface designer and creator of the lettering and branding for the London Underground Many were and still are influenced by his ideas on calligraphy and lettering and those he tutored took his ideas and views into their own classes and to their own students This detailed book looks at Johnston's work and legacy It considers his friendships and his philosophy the people he worked with and the influence he had on them and others Importantly it gives details of the setting up of the craft community at Ditchling in Sussex and the craftspeople that were drawn to the village as a result *Washington International Arts Letter* , 1985 *AB Bookman's Weekly* , 1992 **The British National Bibliography** Arthur James Wells, 2000 *Design & Applied Arts Index* , 1999 *Annual Report - British Library* British Library.
