Skover, 2018-05-31 In every era of communications technology whether print radio television or Internet some form of government censorship follows to regulate the medium and its messages Today we are seeing the phenomenon of machine speech enhanced by the development of sophisticated artificial intelligence Ronald K L Collins and David M Skover argue that the First Amendment must provide defenses and justifications for covering and protecting robotic expression It is irrelevant that a robot is not human and cannot have intentions what matters is that a human experiences robotic speech as meaningful This is the constitutional recognition of intentionless free speech at the interface of the robot and receiver Robotica is the first book to develop the legal arguments for these purposes Aimed at law and communication scholars lawyers and free speech activists this work explores important new problems and solutions at the interface of law and technology
