Roth,Günter Merz,2013-06-29 The general interest and attention paid to the use of the renewable natural resources of the world have increased greatly during the last decades This is due to the environmental dilemma into which mankind has got itself by the total disregard of ecological facts and laws the underprizing of natural resources and the overemphasis on economic develop ment coupled with unimpeded rapid population growth and the preponderance of material istic consumption oriented attitudes The management and use of natural resources such as forests grasslands rivers and lakes were formerly considered purely in a financial context whereas latterly a consciousness of their social function and the indirect economic benefits which can be derived from them has developed Thus as regards these traditional resources multi use concepts comprising eco nomically oriented utilisation as well as recreational educational and social use have be come widely accepted Conservation of natural resources for sustainable consumptive as well as non consumptive uses has been recognised as a key element for maintaining eco nomic development
