Natural History Museum Calendar 2006:

Commemorative Events Warwick Frost, Jennifer Laing, 2013-03-12 Commemorative Events emphasise remembering They are held on the anniversaries of significant past events either annually or after significant time periods Commemorative events provide fascinating insight into how societies see themselves their heritage and their identity These events however carry high propensity for controversy as memory and identity are highly subjective and other stakeholders hold different views of what should be commemorated and why This is the first book to provide an in depth critical examination of commemorative events particularly what they mean to societies and how they are used by governments as well as impacts on other stakeholders The book fully explores these issues by reviewing all the major types of commemorative events including nationhood or independence wars battles famous people and cultural milestones from varying geographical regions and stakeholder perspectives By doing so the book furthers understanding of these types of events in society as well as furthering knowledge of social and political uses and impacts of events This thought provoking volume will be valuable reading for students researchers and academics interested in events

Royal Events Jennifer Laing, Warwick Frost, 2017-12-12 Royal events such as coronations and jubilees encompass a wide spectrum of planned events involving monarchs and their families that are strategically designed to reinforce the role of royalty within social and political structures Royal events may have a long heritage but often involve traditions that are invented revived or undergoing major innovations in response to changing times or to meet different purposes The change from absolutism towards constitutional monarchies has seen a shift towards using royal events to promote national identity community and inclusiveness While the function and meaning of royal ritual and ceremony is a product of its particular political economic and cultural context conversely royal events are often an influence on the broader milieu This book is the first to explore royal events within the context of Events Studies and takes an historical approach examining the development of royal events through different periods It starts with four broad pre modern eras namely Classical Byzantine the Dark Ages and the Medieval Period then moves through to the early modern dynasties such as the Tudors Stuarts Georgians and Bourbons and on to contemporary times incorporating the Victorian and Edwardian eras and the current reign of Elizabeth II including the legacy of Diana and an analysis of current issues affecting royal events Themes emphasised throughout include the institutional dynamism of royalty the invention of tradition the ritual structure of events the impact of the media and the influence of individual tastemakers This multidisciplinary work will appeal to postgraduate students and academics from a wide variety of disciplines including cultural studies history tourism events and sociology

Arts and Cultural Programming Douglas Emerson Blandy, 2008 The first section of

this book is designed to provide an overview of arts and cultural programmes and programme theory while the second contains various theoretical perspectives related to the management of programmes audience development etc The last section invites experts to share successful arts programmes with the readers *International Handbook of Research on Conceptual Change* Stella Vosniadou,2013-07-18 Conceptual change research investigates the processes through which learners substantially revise prior knowledge and acquire new concepts Tracing its heritage to paradigms and paradigm shifts made famous by Thomas Kuhn conceptual change research focuses on understanding and explaining learning of the most the most difficult and counter intuitive concepts Now in its second edition the International Handbook of Research on Conceptual Change provides a comprehensive review of the conceptual change movement and of the impressive research it has spawned on students difficulties in learning In thirty one new and updated chapters organized thematically and introduced by Stella Vosniadou this volume brings together detailed discussions of key theoretical and methodological issues the roots of conceptual change research and mechanisms of conceptual change and learner characteristics Combined with chapters that describe conceptual change research in the fields of physics astronomy biology medicine and health and history this handbook presents writings on interdisciplinary topics written for researchers and students across fields Ice Ages, Climate Dynamics and Biotic Events: The Late Pennsylvanian World S.G. Lucas,W.A. DiMichele,S. Opluštil,X. Wang,2023-06-19 The Late Pennsylvanian was a time of ice ages and associated climate dynamics A major reduction in Gondwana ice volume was followed by a prolonged period of relative global warmth culminating in the last great ice age of the late Paleozoic It also was a major turning point in the evolution of life on land when the coal forests of the Middle Pennsylvanian gave way to new kinds of Late Pennsylvanian wetland vegetation and new kinds of animals appeared Changes in the terrestrial biota began during the Middle Pennsylvanian accelerating and proceeding in a spatially complex manner throughout the Late Pennsylvanian The Late Pennsylvanian is thus a laboratory for studying environmental changes in a glacial world and for assessing coeval biotic changes in part to establish the possible links between the two No book has been dedicated to this time interval so this volume fills a gap in our understanding of a dynamic Late Pennsylvanian world that is much like the late Cenozoic world The Archaeology of Events Zackary I. Gilmore,Jason M. O'Donoghue,2015-03-31 These perspectives are applied to a broad range of archeological contexts stretching across the Southeast and spanning more than 7 000 years of the region s pre Columbian history New data suggest that several of this region s most pivotal historical developments such as the founding of Cahokia the transformation of Moundville from urban center to vacated necropolis and the construction of Poverty Point s Mound A were not protracted incremental processes but rather watershed moments that significantly altered the long term trajectories of indigenous Southeastern societies In addition to exceptional occurrences that impacted entire communities or peoples Southeastern archaeologists are increasingly recognizing the historical importance of localized everyday events such as building a house crafting a pot or depositing shell **Curating the Future**

Jennifer Newell, Libby Robin, Kirsten Wehner, 2016-08-12 *Curating the Future: Museums, Communities and Climate Change* explores the way museums tackle the broad global issue of climate change. It explores the power of real objects and collections to stir hearts and minds to engage communities affected by change. Museums work through exhibitions, events and specific collection projects to reach different communities in different ways. The book emphasises the moral responsibilities of museums to address climate change not just by communicating science but also by enabling people already affected by changes to find their own ways of living with global warming. There are museums of natural history, of art and of social history. The focus of this book is the museum communities like those in the Pacific who have to find new ways to express their culture in a new place. The book considers how collections in museums might help future generations stay in touch with their culture even where they have left their place. It asks what should the people of the present be collecting for museums in a climate changed future. The book is rich with practical museum experience and detailed projects as well as critical and philosophical analyses about where a museum can intervene to speak to this great conundrum of our times. *Curating the Future* is essential reading for all those working in museums and grappling with how to talk about climate change. It also has academic applications in courses of museology and museum studies, cultural studies, heritage studies, digital humanities, design, anthropology and environmental humanities.

The Carboniferous Timescale S.G. Lucas, J-W. Schneider, X. Wang, S. Nikolaeva, 2022-04-26 The print edition is published as 2 hardback volumes, parts A and B, and sold as a set. The Carboniferous was the time of the assembly of Pangaea by the collision of the Gondwanan and Laurussian supercontinents and the principal interval of the late Paleozoic ice ages. These tectonic and climatic events caused dramatic sea level fluctuations and climate changes and produced a Carboniferous world that was diverse topographically and climatologically, perhaps only rivalled in that diversity by the late Cenozoic world. Furthermore, the Carboniferous was a time of the accumulation of vast coal deposits of great economic and societal significance. The temporal ordering of geological and biotic events during Carboniferous time thus is critical to the interpretation of some unique and pivotal events in Earth history. This temporal ordering is based on the Carboniferous timescale which has been developed and refined for nearly two centuries. This book reviews the history of the development of the Carboniferous chronostratigraphic scale and includes comprehensive analyses of Carboniferous radioisotopic ages, magnetostratigraphy, isotope based correlations, cyclostratigraphy and timescale relevant marine and non marine biostratigraphy and biochronology.

The Routledge Handbook of Events Stephen J. Page, Joanne Connell, 2020-04-22 *The Routledge Handbook of Events* explores and critically evaluates the debates and controversies associated with the rapidly expanding domain of Event Studies. It brings together leading specialists from a range of disciplinary backgrounds to provide a state of the art review on the evolution of the subject. The first edition was a landmark study which examined how event research had evolved and developed from a range of different social science subject areas and disciplines. The Handbook was the first critique of the extent to which the subject had developed into a major area of

social science inquiry This second edition has been fully updated to reflect crucial developments in the field and includes brand new sections on ever important aspects of Event Studies such as anthropology hospitality seasonality knowledge management accessibility diversity and human rights as well as new studies on the eventful city and the benefits of events in older life The book is divided into four inter related sections Section 1 introduces and evaluates the concept of events Section 2 critically reviews the relationship between events and other disciplines such as the contribution of economics psychology and geography to the critical discourse of Event Studies Section 3 focuses on the business operational and strategic management of events while the final section crucially focuses on critical events as a new paradigm within the burgeoning literature on Events It offers the reader a comprehensive and critical synthesis of this field conveying the latest thinking associated with events research edited by two of the leading scholars in the field The text will provide an invaluable resource for all those with an interest in Events Studies encouraging dialogue that will span across disciplinary boundaries and other areas of study It is an essential guide for anyone interested in events research

Museums and Social Activism Kylie Message, 2013-11-07 Museums and Social Activism is the first study to bring together historical accounts of the African American and later American Indian civil rights related social and reform movements that took place on the Smithsonian Mall through the 1960s and 1970s in Washington DC with the significant but unknown story about museological transformation and curatorial activism that occurred in the Division of Political and Reform History at the National Museum of American History at this time Based on interdisciplinary field based research that has brought together cross cultural and international perspectives from the fields of Museum Studies Public History Political Science and Social Movement Studies with empirical investigation the book explores and analyses museums specifically curators relationships with political stakeholders past and present By understanding the transformations of an earlier period Museums and Social Activism offers provocative perspectives on the cultural and political significance of contemporary museums It highlights the relevance of past practice and events for museums today and improved ways of understanding the challenges and opportunities that result from the ongoing process of renewal that museums continue to exemplify

Desert National Wildlife Refuge Complex, Ash Meadows, Desert, Moapa Valley, and Pahrangat National Wildlife Refuges Comprehensive Conservation Plan, 2009 Devonian Climate, Sea Level and Evolutionary Events R. T. Becker, 1st, C. E. Brett, P. Königshof, 2nd, 2016-10-20

The geological and palaeontological records of climate change and evolutionary events reflect Earth's widely fluctuating climate systems Past climates hold the clues to understanding future developments In this context research on linked climate biodiversity and sea level fluctuations of the Devonian contributes to the general knowledge of deep time climate dynamics A fruitful co operation between the International Geoscience Programme IGCP 596 and the International Subcommission on Devonian Stratigraphy SDS addressed the complex succession of climate linked Devonian global events of varying magnitude The primary goal of IGCP 596 was to assess mid Palaeozoic climate changes and their impact on marine and terrestrial

biodiversity using an interdisciplinary approach The focus of SDS includes a revision of the eustatic sea level curve and the integration of refined chrono and biostratigraphy with modern chemo magneto cyclo event and sequence stratigraphy This enabled the much improved dating and correlation of abiotic perturbations evolutionary changes organism and ecosystem ranges Results by 37 authors are presented in 14 chapters which cover the entire Devonian **The Statesman's Yearbook 2009** B. Turner, 2017-01-12 This edition is fully updated and contains more information and analysis than ever before A foldout colour section provides a political world map and flags for all 193 countries Each copy comes with online access to the full text at no extra cost Unlimited user upgrades are also available for libraries who wish to network the data

Museums and Design Education Rebecca Reynolds, 2016-04-15 How can museum educators and higher education tutors enhance the way HE students use museums There are many examples in the UK of museums and universities working together in productive and innovative ways but these relationships tend to be based on individual enthusiasm and opportunistic arrangements Despite the growing importance of museum education departments higher education tends to be overlooked by museums This book looks at the interaction between design students and museums and explores issues projects and emerging ideas about how museums can better support HE students It illustrates the general lessons that can be learnt both strategic and practical which can help to bring about long term and constructive relationships between museums and universities in order to enable effective student learning Early Events in Monocot Evolution Paul Wilkin, Simon J. Mayo, 2013-05-30 Leading scientists in the field trace the evolution of the one of the most ancient major branches of flowering plants **Tourism Management** Stephen J. Page, 2014-12-05 One of the leading texts in the field Tourism Management is the ideal introduction to the fundamentals of tourism as you study for a degree diploma or single module in the subject It is written in an engaging style that assumes no prior knowledge of tourism and builds up your understanding as you progress through this wide ranging global review of the principles of managing tourism It traces the evolution and future development of tourism and the challenges facing tourism managers in this fast growing sector of the world economy This book is highly illustrated with diagrams and colour images and contains short case studies of contemporary themes of interest as well as new data and statistics This fifth edition has been revised and updated to include new content on sports festivals and event tourism social media impacts on tourism and the effects of the global economic downturn on tourism as well as emerging themes in tourism such as slow travel dark tourism volunteer tourism and medical tourism updated case studies on BRIC markets and new case studies from the Middle East and Asia enhanced tourism and sustainable development coverage which runs throughout the book as a major theme highlighting the challenge of climate change and future tourism growth transport section with more international perspectives from China and South America an updated companion website with additional case studies quizzes PPTs further reading web reading and video links and longer reflective case study per chapter to aid both teaching and learning **National Museums** Simon Knell, Peter

Aronsson, Arne Bugge Amundsen, 2014-05-22 *National Museums* is the first book to explore the national museum as a cultural institution in a range of contrasting national contexts. Composed of new studies of countries that rarely make a showing in the English language studies of museums, this book reveals how these national museums have been used to create a sense of national self, place the nation in the arts, deal with the consequences of political change, remake difficult pasts, and confront those issues of nationalism, ethnicity, and multiculturalism which have come to the fore in national politics in recent decades. *National Museums* combines research from both leading and new researchers in the fields of history, museum studies, cultural studies, sociology, history of art, media studies, science and technology studies, and anthropology. It is an interrogation of the origins, purpose, organisation, politics, narratives, and philosophies of national museums.

The Museum Experience Revisited John H Falk, Lynn D Dierking, 2016-06-16 The first book to take a visitor's eye view of the museum visit when it was first published in 1992, *The Museum Experience* revolutionized the way museum professionals understand their constituents. Falk and Dierking have updated this essential reference, incorporating advances in research, theory, and practice in the museum field over the last twenty years. Written in clear, non-technical style, *The Museum Experience Revisited* paints a thorough picture of why people go to museums, what they do there, how they learn, and what museum practitioners can do to enhance these experiences.
