Natural Management Of Woods Continuous Cover Forestry:

Natural Management of Woods John Edward Garfitt, 1995 There is now great awareness of trees and the importance of tree cover In this book the author Ted Garfitt reviews methods of silvicultural practice that maintain forest cover and so could make clear felling of trees a thing of the past His 45 years of practical forestry experience covering a range from tropical rain forest in Malaysia to the gracious woodlands of England s stately homes enable him to offer practical solutions towards the conversion of woodlands to a more natural state in which there is permanent cover and where woods are never clear felled In such woods the conservation of both wildlife and landscape will go hand in hand with the production of valuable timber which alone can make tree growing financially viable Owners and managers of woodland practical conservationists land planners and students of forestry botany soil science and town and country planning will all find useful the ideas and methods presented in this book
