Women's Work Laurel Smith-Doerr, 2004 Women scientists working in small for-profit companies are eight times more likely than their university counterparts to head a research lab Why Laurel Smith-Doerr reveals that contrary to widely held assumptions

strong career opportunities for women and minorities do not depend on the formal policies and long job ladders that large hierarchical bureaucracies provide In fact highly internally linked bio technology firms are far better workplaces for female scientists when compared to university settings or established pharmaceutical companies offering women richer opportunities for career advancement Based on quantitative analyses of more than two thousand life scientists careers and qualitative studies of scientists in eight biotech and university settings Smith Doerr's work shows clearly that the network form of organization rather than fostering old boy networks provides the organizational flexibility that not only stimulates innovation but also aids women's success

Impure Cultures Daniel Lee Kleinman, 2003-10-15 How are the worlds of university biology and commerce blurring Many university leaders see the amalgamation of academic and commercial cultures as crucial to the future vitality of higher education in the United States In *Impure Cultures* Daniel Lee Kleinman questions the effect of this blending on the character of academic science Using data he gathered as an ethnographic observer in a plant pathology lab at the University of Wisconsin Madison Kleinman examines the infinite and inescapable influence of the commercial world on biology in academia today Contrary to much of the existing literature and common policy practices he argues that the direct and explicit relations between university scientists and industrial concerns are not the gravest threat to academic research Rather Kleinman points to the less direct but more deeply rooted effects of commercial factors on the practice of university biology He shows that to truly understand research done at universities today it is first necessary to explore the systematic pervasive and indirect effects of the commercial world on contemporary academic practice
