Meditation from Buddhist, Hindu, and Taoist Perspectives Robert Altobello, 2009 Engages readers with its original philosophical and pragmatic analysis of traditional Asian religions philosophy meditation practice and the supreme spiritual ideals associated with the Hindu Buddhist and Taoist traditions The text boldly bridges the theory practice distinction A central underpinning rests on the assumption that meditation practice without theory is groundless and that theory without practice is useless Identifies and analyzes common elements found across traditions in which the practice of meditation plays a central role in human development and readers will find a wealth of detailed reflection on the relationship between spiritual growth and meditation practice from the Hindu Buddhist and Taoist perspectives From publisher description

All Natural* Nathanael Johnson, 2013-01-29 In this age of climate change killer germs and obesity it's easy to feel as if we've fallen out of synch with the global ecosystem This ecological anxiety has polarized a new generation of Americans many are drawn to natural solutions and organic lifestyles while others rally around high tech development and industrial efficiencies Johnson argues that both views when taken to extremes can be harmful even deadly Johnson raised in the crunchy granola epicenter of Nevada City California lovingly and rigorously scrutinizes his family's all natural mindset a quest that brings him into the worlds of an outlaw midwife radical doctors renegade farmers and one hermit forester Along the way he uncovers paradoxes at the heart of our ecological condition Why even as medicine improves are we becoming less healthy Why are more American women dying in childbirth Why do we grow fatter the more we diet Why have so many attempts to save the environment backfired In *All Natural* a sparkingly intelligent wry and scrupulously reported narrative Johnson teases fact from faith and offers a rousing and original vision for a middle ground between natural and technological solutions that will assuage frustrated environmentalists perplexed parents and confused consumers alike

Nguyen,2011-12-28 *Nature's Primal Self* examines Corrington's thought called ecstatic naturalism in juxtaposition to both C S Peirce's pragmatic and semiotic concept of the self and Karl Jaspers existential elucidation of Existenz Peirce's and Jaspers anthropocentrism is thus corrected by Corrington's ecstatic naturalism Ecstatic naturalism as a new movement is both a semiotic theoretical method and a metaphysics that probes deeply into the ontological divide between nature naturing and nature natured Author Nam T Nguyen attempts to achieve three goals first to present and elucidate the underlying philosophical concepts of Charles Peirce Karl Jaspers and Robert Corrington second to critique the anthropocentric self of Peirce's semiotic pragmatism and of Jaspers existential anthropology periechontology from the standpoint of ecstatic naturalism and third to introduce the concept of nature's primal self radically grounded in the perspective of ecstatic naturalism as a judicious more encompassing and richer framework compared to Peirce's semiotic construction of the self and Jaspers existential concept of Existenz

Perspective in Perspective Lawrence Wright,2017-03-16 Originally published in 1983 this book is about the way we see things or think we do which is by no means the same and about the ways in which we have tried to reproduce that visual concept in diagrams pictures photographs films and television Whatever the medium if any degree of realism is intended some use of perspective is inevitable and some understanding of it can aid the appreciation of the result But here the technicalities of perspective geometry are treated as far as possible non technically by a common sense approach Students would be artists or architects are warned in the Preface that they will travel second class in the author's train of thought the

general reader coming first but they may well find the journey worthwhile in that it provides a background to a subsequent more detailed studies Lawrence Wright shows that every form of perspective representation has some innate falsity but that most such forms offer an adequate makeshift that rules of geometry often need to be bent that labour saving dodges and shortcuts exist As he says perspective drawing like politics is an art of the possible In reading this book beginners may find it all simpler than they had supposed though the established expert may in some interesting respects find just the opposite The general reader may thereafter find himself seeing things and representations of them in a new light

Transcendental Phenomenological Psychology Jon L. James, 2011-06 From the Preface to the Revised Edition Since its publication in 2007 *Transcendental Phenomenological Psychology* has been sold on every continent except Antarctica and is in the collections of research libraries in North America Europe and Asia Even so its presentation to the academic community rightly provoked many comments corrections suggestions and criticisms Such input while mostly welcome provided the impetus to publish a revised edition A phenomenological explanation of human consciousness has long been sought in regions of psychology since the discipline was first carved out of philosophical concepts and theories about the human condition In its earliest years Western psychology was faced with two possible directions for this explanation an empirical naturalistic approach along with physics and biology or a non empirical eidetic approach along with logic and mathematics Edmund Husserl took up the latter His phenomenological tradition of inquiry successfully spanned nearly forty years until suddenly stopped and largely suppressed during the Second World War This book recovers Husserl's revolutionary approach toward the human sciences just as it was developed and just as it is presented for further study Here the author systematically gathers what Husserl calls the leading clues in the phenomenological method proper for a psychology of affective inner experience and then for the first time applies Husserl's own methodology for introducing a phenomenological psychology in the transcendental register of human consciousness Unlike contemporary phenomenological psychology in the existential register transcendental phenomenological psychology is presented as an eidetic non empirical act psychology in Husserl's mature genetic phenomenology This novel approach takes in the full range of solipsistic and transcendental subjectivity in Husserl's theories of human consciousness and follows Husserl's lead in presenting phenomenological psychology as an applied geometry of intentional experience within a step wise theory of inquiry This book is unique in human science today not only in its presentation of the development and applications of Husserl's key concepts for the discipline of psychology but also for introducing a psychology that could be intuitively grasped as self evidently valid wherever one's interest might lie

History and Nature in the Enlightenment Mr Nathaniel Wolloch,2013-07-28 The mastery of nature was viewed by eighteenth century historians as an important measure of the progress of civilization Modern scholarship has hitherto taken insufficient notice of this important idea This book discusses the topic in connection with the mainstream religious political and philosophical elements of Enlightenment culture It considers works by Edward Gibbon Voltaire Herder Vico Raynal Hume Adam Smith William Robertson and a wide range of lesser and better known figures It also discusses many classical medieval and early modern sources which influenced Enlightenment historiography as well as eighteenth century attitudes toward nature in general

The Summa Halensis Lydia Schumacher,2020-06-22 For generations early Franciscan thought has been widely regarded as unoriginal a mere attempt to systematize the longstanding intellectual tradition of Augustine in the face of the rising popularity of Aristotle This volume brings together leading scholars in the field to undertake a major study of the major doctrines and debates of the so called Summa Halensis 1236 45 which was collaboratively authored by the founding members of the Franciscan school at Paris above all Alexander of Hales and John of La Rochelle in an effort to lay down the Franciscan intellectual tradition or the first time The contributions will highlight that this tradition far from unoriginal laid the groundwork for later Franciscan thought which is often regarded as formative for modern thought Furthermore the volume shows the role this Summa played in the development of the burgeoning field of systematic theology which has its origins in the young university of Paris This is a crucial and groundbreaking study for those
