Reconstructing Lives Nanthalia W. McJamerson, Ph. D., 2016-02-11 This author is onto something groundbreaking by combining literature counseling education and critical thinking Dr Jean Kerney Educational Consultant Chillicothe Ohio The students and I experienced shocking revelations as they researched their selected celebrities As an Instructor I saw students were excited about learning that each celebrity they chose had a story which inspired drive to reach their glory Students had taken it at face value that these people's lives were always perfect Secondly I think this curriculum project gave students much needed advice Advice impacts differently when it comes from someone you idolize It gave these freshmen ideas of how to handle college and how to navigate issues in their lives Most importantly this project allowed students to exhale they now know whatever their struggles they are not alone Dr Jessie Broussard Researcher and Instructor University of Louisiana Lafayette When I was introduced to the Reconstructing Lives Project I was delighted to have a new way to assess my students comprehension of teaching theories Teacher candidates thought the theories were boring however they eventually found that connecting theories to their icons and later to themselves was meaningful The majority of my students felt the redemption that it brought them They didn't write it all in their papers rather they came to my office and explained what the project meant to them personally What surprised me most in 10 years of using the Project was the fact that it was not only a measure of student learning but also a measure of how much I could teach them about theory about my life and about their own life success Dr Felicie Barnes Professor of Education Retired Grambling State University Companion Workbook available at www.amazon.com RE MAKE AN ICON SO YOU CAN PRODUCE ONE

The Natural and the Human Stephen

Gaukroger,2016-01-21 Stephen Gaukroger presents an original account of the development of empirical science and the understanding of human behaviour from the mid eighteenth century Since the seventeenth century science in the west has undergone a unique form of cumulative development in which it has been consolidated through integration into and shaping of a culture But in the eighteenth century science was cut loose from the legitimating culture in which it had had a public rationale as a fruitful and worthwhile form of enquiry What kept it afloat between the middle of the eighteenth and the middle of the nineteenth centuries when its legitimacy began to hinge on an intimate link with technology The answer lies in large part in an abrupt but fundamental shift in how the tasks of scientific enquiry were conceived from the natural realm to the human realm At the core of this development lies the naturalization of the human that is attempts to understand human behaviour and motivations no longer in theological and metaphysical terms but in empirical terms One of the most striking feature of this development is the variety of forms it took and the book explores anthropological medicine philosophical anthropology the natural history of man and social arithmetic Each of these disciplines re formulated basic questions so that empirical investigation could be drawn upon in answering them but the empirical dimension was conceived very differently in each case with the result that the naturalization of the human took the form of competing and in some respects mutually exclusive projects

Makes Me Wanna Holler Nathan McCall, 2011-01-26 NATIONAL BESTSELLER One of our most visceral and important memoirs on race in America this is the story of Nathan McCall who began life as a smart kid in a close protective family in a black working class neighborhood Yet by the age of fifteen McCall was packing a gun and embarking on a criminal career that five years later would land him in prison for armed robbery In these pages McCall chronicles his passage from the street to the prison yard and later to the newsrooms of The Washington Post and ultimately to the faculty of Emory University His story is at once devastating and inspiring at once an indictment and an elegy *Makes Me Wanna Holler* became an instant classic when it was first published in 1994 and it continues to bear witness to the great troubles and the great hopes of our nation With a new afterword by the author

Head Games Nikitah Okembe-RA Imani, 2010-12-18 *Head Games* is focused on the way in which ethnocentrism and cultural bias can impact public health and in this case psychotherapeutic process It examines a family therapy program being run by a major public university tied to the criminal justice system and the educational establishment aiming to reform perceived dysfunctionality in homes of the patients subjects What follows is a tragic comedy of errors in which theory and practice normed in one sociocultural context is applied or more appropriately misapplied This book questions whether we have come as far as we think in the US in terms of calibrating our mental health systems for multicultural sensitivity and perhaps suggests there are limits to how much we can engage in cross cultural therapy The book uses an Africa centered theoretical framework to tease out these systemic incongruities and will hopefully provide guidance for counselors researchers and those more generally interested in programmatic evaluation research across cultural lines The title *Head Games* is an apt metaphor for the manipulation of the program by all of its participants for the purpose of reifying or resisting its inherent definitions of abnormality
